

WASHINGTON.

From our Regular Correspondent.

Washington, Sept. 2, 1901. Washington would be peaceful at present were it not for the Sampson-Schley controversy, but both sides are so busy in considering what they will do to each other that there is a semi-sulphurous suggestion of war.

The latest development in the case is the discovery of the fact that the Cuban, General Garcia, knew, or surmised, that Cervera was coming out of the harbor of Santiago on the morning of July 3.

That Schley is the hero of the enlisted men there is no doubt. The "jackies" on his ship swear by him, and so do the gunners and sailors on other ships, not including, of course, the New York.

It has been suggested that General Shafter should be called as a witness when the court of inquiry meets. It is not known just what Sampson's supporters in the Navy Department think of this suggestion, and for obvious reasons it is not likely to be known.

Little can be learned at present, from any authoritative source, of the actual facts in the controversy. The reason is that Secretary Long has ordered every man connected with the Navy Department or with the service to keep his mouth shut.

What an exaggeration; what a whopper. It has been disapproved a thousand times; it is a case of airy fancy. It doesn't take money to run a newspaper. It is run without money.

STAT OF OHIO, CITY OF Toledo, LECO, LUCAS COUNTY. Frank J. Cheney makes oath that he is the senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

A. W. GLEASON, Notary Public. Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.

It is probable that that little word was never more badly overworked in Washington than it has been during the preliminary proceedings of the Sampson-Schley investigation. In his leisure moments, the secretary of the Navy has been considering the matter of certain vouchers submitted by the Bethlehem Steel Company and the Carnegie Steel Company for royalties paid by these companies to the Harvey Steel Company for the use of the Harvey process in hardening steel.

The steel companies claim that the government had a contract, in which it agreed to reimburse them if they were "required to pay" these royalties to the Harvey people. Secretary Long has withheld his approval until the Court of Claims decides whether the government process infringes on the Harvey system.

The Anti-Trust League is trying to reach Attorney-General Knox and bring charges against the big steel corporation, which it wants prosecuted under the Sherman act. Thus far Mr. Knox has calmly ignored the whole business.

There is a rumor that the British Foreign Office has some sensational news to give out regarding the Nicaragua Canal, but Washington is not giving as much credence to the rumor as if it did not come from Birmingham.

By experience correspondents have discovered that most of these yarns are pure creations of their author's fancy; and hence, to say that a sensational disclosure about the British Foreign Office hails from Birmingham is now about the same as saying it is a natural born lie.

This particular rumor is to the effect that England will abandon the position she has held for some years, and acknowledge the right of the United States to construct, maintain and fortify the Nicaragua Canal.

So it takes money to run a newspaper.—St. John (Kan.) News. What an exaggeration; what a whopper. It has been disapproved a thousand times; it is a case of airy fancy.

Then when you die, after having stood around and sneered at the editor and his little jim-crow paper, be sure and have your wife send in for the extra copies by one of your weeping children, and when she reads about you, forewarn her to send fifteen cents to the editor. It would overwhelm him. Money is a corrupt thing.

"For eight years I suffered with inflammation of the womb and bladder, profuse and painful menstruation, and at times it seemed as though I should die. I doctored most of the time, but seemed to fall every time. A short time ago I began to take LYDIA E. PINKHAM'S VEGETABLE COMPOUND, and thanks to it, to-day I am a well woman."—MRS. L. L. TOWNE, Littleton, N. H.

Mrs. Towne, like many other suffering women, was a victim of theory. Her physician did his best. He had battled with her case steadily and could do no more. If Mrs. Towne had asked advice of Mrs. Pinkham seven or eight years earlier, she would have had just so many more years of happiness and comfort and health.

It is not reasonable to expect that any living person can advise for female troubles as safely as Mrs. Pinkham, whose experience is without parallel in the world. This should appeal to the common sense of any woman, especially when nearly every newspaper in this country is printing in almost every issue the letter of some woman who has been cured by Mrs. Pinkham when doctors had given her up.

There is no female complaint, however simple or however serious, that Lydia E. Pinkham's Vegetable Compound will not help; of this there is monumental evidence in its thirty years' record of constant success.

Lydia E. Pinkham's Vegetable Compound. We have deposited with the National City Bank, of Lynn, \$5,000, which will be paid to any person who can find that the above testimonial letter is not genuine, or was published before obtaining the writer's special permission.

Thank the printers and they can thank the grocers. Take your work to the job offices, and then come and ask for half rates for the church notices. Get your lodge letter heads and stationery printed out of town, and then flood the editor with beautiful thoughts in resolutions and cards of thanks.

But money—scorn the filthy thing. Don't let the pure, innocent editor know anything about it. Keep that for sordid tradespeople who charge for their wares.

The farmers are not worrying about the rise in the price of coal nor are they looking well to their woodpiles. They are sure the winter is going to be mild and that precautions against extreme cold will be unnecessary.

When the nests are built only on stout trees, high from the ground and close to the trunk, then the following winter will be a rough one and there will be plenty of snow.

Predict an Open Winter. The farmers are not worrying about the rise in the price of coal nor are they looking well to their woodpiles.

Persons have been known to gain a pound a day by taking an ounce of SCOTT'S EMULSION. It is strange, but it often happens.

Somehow the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food, which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking Scott's Emulsion.
