

SETH LOW FOR MAYOR

Tammany's Foes in Greater New York United.

THREE CONVENTIONS NOMINATE.

Republicans, Citizens' Union and Independent Democrats at Enthusiastic Gatherings Name a Complete Union City Ticket.

NEW YORK, Sept. 25.—Simultaneously last night conventions of Tammany's foes, the Republicans, Citizens' Union and Greater New York Democracy, were called to order to nominate Seth Low, Republican, for mayor; Edward M. Grout, Democrat, of Brooklyn for comptroller, and Charles V. Fornes, Independent Democrat of Manhattan, for president of the board of aldermen.

The Republicans met in the Grand Central Palace, the Citizens' Union at Cooper Union and the Greater New York Democracy at Broadway and Twenty-eighth street.

Amid scenes of great enthusiasm Seth Low was placed in nomination by General Anson G. McCook for the Republicans.

Grand Central Palace was jammed to the doors when Lieutenant Governor Timothy V. Woodruff assumed the chairmanship of the Republican convention.

When the hosts of the Citizens' Union had assembled in Cooper Union, it was a foregone conclusion that the fusion ticket, with Seth Low at its head, would be placed in nomination.

Before the convention opened A. J. Boulton and M. J. Flaherty had received from Mr. Coler a request that his name be not presented in opposition to Mr. Low's.

Mr. Flaherty, it had already been determined, was to have offered a minority report proposing Mr. Coler's name, but this scheme was now abandoned.

Mr. Boulton assured the convention that Mr. Coler's Brooklyn friends in the Citizens' Union would all rally to the support of Seth Low.

The convention was an adjourned meeting from that of April, so that there was little preliminary business to do.

Roosevelts Leave Oyster Bay. NEW YORK, Sept. 25.—This morning marked the departure of the Roosevelt family from Oyster Bay, not to return until next summer probably, although the president may elect to spend Christmas at his own home for the sake of the children.

The house on Sagamore hill will be closed, but a couple of servants will remain in it constantly so that it will be ready for use at any time the president may elect to occupy it. Mrs. Roosevelt left Oyster Bay shortly after 8 o'clock. The Long Island railroad had a special car attached to the regular train.

The party consisted of Mrs. Roosevelt, William Loeb, the president's private secretary; Miss Young, the governess; Miss Ethel and Edith, Kermit and Quinten went a charge of a maid on a later train.

Mrs. McKinley's Friends Hopeful. CANTON, O., Sept. 25.—Relatives and friends of Mrs. McKinley have a more substantial foundation for their hopes than they have had at any time since apprehension of a collapse under the burden of her deep sorrow was roused. Dr. Rixey states that she is long as well as can be expected and that if there is any change it is in the way of improvement.

Yesterday morning a visit to the cemetery was followed by rather an extended drive into the country.

Serious Railway Collision. NEW YORK, Sept. 25.—In a head on collision between a Central Railroad of New Jersey passenger train and a Philadelphia and Reading passenger train near Somerville, N. J., three persons were seriously hurt and several others slightly injured.

The accident is said to have been caused by the fact that the Central is making changes in the roadbed and the Reading engineer was not familiar with these and the special signals which had been set.

A GUILTY NATION.

President Washington Says We Have Repented as We Have Sinned. TUSKEGEE, Ala., Sept. 25.—Booker T. Washington of the Tuskegee Normal and Industrial Institute has given out a statement in reference to the assassination of President McKinley, in which he says:

"In all sincerity I want to ask, is Colozoz guilty? Has not the entire nation had a part in this greatest crime of the century? What is anarchy but a defiance of law, and has not the nation repented what it has been sowing? According to records, 2,516 persons have been lynched in the United States during the past sixteen years. There are or have been engaged in this anarchy of lynching nearly 125,800 persons.

"To check the present tendency it seems to me there are two duties that face us: "First.—For all classes to unite in an earnest effort to create such a public sentiment as will make crime disappear, and especially is it needful that we see that there is no idle, dissolute, purposeless class permitted in our midst.

"Second.—For all to unite in a brave effort to bring criminals to justice and where a supposed criminal is found to see that he has a fair, patient, legal trial.

"Let us heed the words of our departed and beloved chief as he lay upon his dying bed, referring to his murderer, 'I hope he will be treated with fairness.'

"If William McKinley as he was offering up his life in behalf of the nation could be brave enough, thoughtful and patriotic enough, to request that his assassin should be fairly and honestly tried and punished, surely we can afford to heed the lesson."

Santiago Rehearsed. WASHINGTON, Sept. 24.—The part played by the battleship Texas in the naval battle off Santiago July 3, 1898, in which the Spanish fleet under Admiral Cervera was sunk, was the basis of the greater part of yesterday's proceedings in the Schley naval court of inquiry.

Of the four witnesses examined during the day three had been officers on board the Texas during the battle and two of them were new witnesses. These were Commander George C. Heilner, who was navigator on the Texas, and Commander Alexander B. Bates, who was the chief engineer on that battleship.

Commander Harber, executive officer and the chief surviving officer of the ship since the death of Captain Phillip, was recalled. The fourth witness was Commander Seaton Schroeder, executive officer on the Massachusetts and now governor of the island of Guam.

The Oregon Arrives. PORT TOWNSEND, Wash., Sept. 25.—The overdue steamship Oregon has arrived from Nome, bringing 474 passengers and \$750,000 in gold. The Oregon sailed Sept. 6. The third day out she encountered heavy weather and lost her rudder and broke her rudder post. The gale lasted ten days, and during that time the craft floundered around at the mercy of the elements. Finally when the storm abated somewhat a jury rudder was rigged, and under a slow bell the Oregon steamed 1,700 miles. Provisions ran low, and the passengers were placed on short rations. When she arrived here, they were reduced to the verge of starvation.

Agnaldo's Bodyguard Surrenders. MANILA, Sept. 23.—Agnaldo's bodyguard, Major Alhambra, two captains, two lieutenants and twenty-nine men, with twenty-eight rifles, surrendered about forty miles north of Baler, island of Luzon, to Captain George A. Detchemeny of the Twenty-second United States Infantry, took the oath of allegiance and were released. After Alhambra kidnapped the president of Casiguran Sept. 12 Captain Detchemeny requisitioned a steamer and pursued him closely. He would have been captured within an hour if he had not surrendered.

McClure's Magazine.—The October Number.

No man in America to day is more in the public eye than J. Pierpont Morgan. In recognition of this fact, the October number of "McClure's Magazine" opens with a sketch of Mr. Morgan, carefully prepared by Ray Stannard Baker, author of the character sketches of Roosevelt, Sampson and Wood. The article is concise and dignified, and is, according to a friend of Mr. Morgan's, "the best and most complete presentation of a great subject. Of almost equal importance is Josiah Flint's 'The Tammany Commandment.' At this time, when fresh revelations of the protection of vice in New York City are being made continually, and when the campaign for the overthrow of Tammany is in full swing, Mr. Flint's startling expose is particularly timely. It is a complete exposition of the system of police protection of vice and crime as that system is understood by those protected. Other articles are Clara Morris' entertaining account of the 'Staging of Miss Multon,' Cyrus Townsend Brady's 'appreciation' of 'Frontenac, the Savior of Canada,' and William Stamp's 'Cherry' (the African explorer), thrilling description of 'Elephant Hunting in Africa.'

A new barrack-room ballad is contributed by Rudyard Kipling. Kipling also appears in the number in the last instalment of "Kim." Aside from the serial, there are five stories, remarkably well chosen, and balancing one another. 'I Sing of Honor and the Faithful Heart' chronicles the experiences of Emory Lou in the Third Reader; 'The Roadmaster's Story—The Spider Water,' completes Frank H. Spearman's series of exciting railroad tales; 'The Other Man' is a sweet love story; 'The Honor of the Transgressor' is a 'Tale of the Nebraska Pioneers'—humorous, pathetic, and full of adventure; and 'The King's Visit' is another of Robert Barr's entertaining Jimmy stories. Both the quality of the contributions and the beauty of the illustrations are up to the very high standard set by the August and September numbers. 'McClure's' never gets below its own level, and its own level is the standard of excellence.

HER HEART LIKE A POLLUTED SPRING.—Mrs. James Sibley, Pelee Island, Ont., says: "I was for five years afflicted with dyspepsia, constipation, heart disease and nervous prostration. THE KEYSTONE COPPER MINING CO., Incorporated Under the Laws of South Dakota, June 15, 1901.

Capital Stock, \$1,000,000. Divided into 200,000 Shares of Par Value of \$5.00 Each. FULL PAID AND NON-ASSESSABLE.

We call special attention to the fact that one share of this Company, whose entire Capital Stock consists of only 200,000 shares of the par value of Five Dollars each, secures an interest in its property equal to 5 shares in a Company of One Million Shares of the par value of, only One Dollar each, as is the case with nearly all Mining Companies offering shares at a price seemingly lower than the present price of the shares of this Company, but in reality much higher.

Property of Company.

This is very extensive, consisting of four mining properties, each over one mile in length, on a great copper vein over 100 feet in width, pronounced by Copper experts as among the widest and richest copper veins known, lacking only the necessary development to place same in the front rank of the greatest dividend and copper producing properties.

It is on the same great Copper Mineral Belt upon which are located the world's present greatest copper mines, each paying many millions of dollars annually in dividends and developed to the depth of from 1000 to 2000 feet, thus fully establishing the fact that the veins are not alone inexhaustible, but wide and become even more profitable with depth.

The great vein on this property is of such unusual width and so prolific in copper ore from surface that only moderate developments are needed to begin the production of ore on a scale to insure large dividends on the shares of this Company.

The Company is sinking a shaft now nearly 100 feet in depth on the vein of one of its four properties, the "Pay Roll." This shaft is entirely in ore, which, by tests, gave values at the surface of from 3 to 14 per cent. copper; at the depth of fifty feet tests gave values of from 8 to 10 per cent. copper; at the depth of seventy feet tests gave values of from 12 to 14 per cent. copper, while selected samples show values as high as 12 per cent. copper and nearly \$15 in gold and silver per ton.

The value of the gold per ton will enable the Company to produce copper at very low cost.

As showing that this great vein is not alone of unusual width, but also of rare richness in ore as compared with some of the richest copper mines, we refer to the great "Anacostia Mine," paying over \$5,000,000 annually in dividends from ore averaging less than five per cent. in copper; or to the "Boston and Montana" paying over \$6,000,000 annually from ore averaging less than six per cent. in copper; or to the "Great Verde," paying nearly \$5,000,000 annually in dividends from ore averaging less than six per cent. in copper.

To give an approximate idea of the amount of ore and its value, that can be opened by a moderate development in only a small part of such a vein, the following estimates are given: Estimating pay ore vein at only 25 feet in width, depth of shaft, 500 feet, length of levels, 500 feet, would open up 6,250,000 cubic feet of ore, or over Five Hundred Thousand Tons.

Estimating the net Profits at Twenty Dollars per ton, would give total net profits of Ten Million Dollars, or Ten Times the Amount of the Par Value of the entire Capital Stock of the Company, and sufficient to insure dividends to amount of Ten Dollars for each share of the stock. As the length of the vein on this one property, the "Pay Roll," is over one-quarter mile in length, and the depth to which it can be worked many thousands of feet, it will be seen that as a copper investment the shares of this Company offer an unusual opportunity.

The property of the Company is situated in Rio Arriba County, in the northern part of New Mexico (only 40 miles from the southern boundary line of Colorado), convenient to Railroad Station and in a section heavily timbered and one of the healthiest in the United States.

The Company has no debts or mortgages. Its property is free and clear and its management is under able mining experience.

One-quarter of the entire Capital Stock of the Company being 50,000 Shares of the par value of \$5.00 each has been placed in the Treasury of this Company as a working capital, of which a limited amount is offered for sale at

\$1.00 PER SHARE Until October 1st, when the price will be advanced to \$1.50 per share.

As there are only 200,000 shares in this Company it will require net earnings of only \$200,000 to pay dividends at rate of \$1.00 yearly upon each share. This will require only a moderate development. Those wishing to purchase shares can make remittance, by check or otherwise, to

The Keystone Copper Mining Co., Harter Building, 208 Main St., BLOOMSBURG, PEN'A.
