This act applies against land-the ecclesiastical government resident and non-resident and the fact of the denomination-will hold its anthat a party may hold the license prescribed by the act of April 24 gives death of President McKinley Dr. no rights that may conflict with the wishes of the owner or lessee of posted cultivated lands in this Commonwealth.

HUMBLE SANCTUARY.

Where President Roosevelt Will Worship While in Washington.

Grace Reformed Chapel, with a Seating Capacity of 125, Will Be the Presidential Church for Some Years to Come.

The little chapel on the rear of a lot at the corner of Fifteenth and O streets, N. W., has been selected by President Roosevelt as his church in Washington, Rev. John M. Schinek, D. D., will be his pastor. The presiformed church. The congregation which worships in the little chapel is of the German Reformed denomination, but there is no difference in the tenets of faith of the two organizations, and there is no Dutch Reformed church in the city.

President Roosevelt attended service at Grace Reformed chapel, as the church is known, on the only Sunday he has spent in Washington since his inauguration. When President Roosevelt lived here as civil-service commissioner and as assistant secretary of the navy he did not know there was a church of the denomination of his belief in the city. How he came to learn there was one is best told in the language of Dr.

Schinck, who, in discussing the subject, sald: "After the election, as I was read-

ing the papers about the congratulations extended to both the president and vice president, I was struck by the fact that they were all from politicians and business men. None Ducks, geese, brant, swan and snipe were reported from the clergy. at once sat down and wrote each a letter of congratulation. To Mr. Roosevelt I communicated the fact of the existence of our little church. and welcomed him to worship with us. His reply was most hearty and cordial. He said he had believed there was no church of his faith in Washington and that he should accept the the invitation to attend.

> "On Sunday ofter the inauguration the vice president and his family came to the service in the chapel. I have called on him since and he has indicated that he will make the church his spiritual home in Washingington."

The services in Grace Reformed chapel are conducted in English. The

edifice wil seat but 150 persons, and the regular congregation taxes it to its full capacity. Since Dr. Schinck ruary of last year, he has been actively at work in an effort for the Liquid Cream Balm. Price, including sprayconstruction of a new building. The congregation owns the lot and the parsonage property adjoining. It is the desire of Dr. Schinck to crect a one-story structure covering the enwill provide a seating capacity for 500 persons. The estimated cost for the new building is \$30,000, and so far Dr. Schinck has pledges for a little over one-third of that amount. It was the plan to have the corner stone laid next May, when the Classis of Marynual meeting in Baltimore. Since the Schinck is receiving many letters from elergymen and others urging him to press the matter of a new building, so that the church may accommodate those who will want to attend. Dr. Schinck's eyes moistened as he discussed this point. "I have answered," he said, "that I can't take advantage of the death of President McKinley to build up my church. The matter will have to take its regular course. As soon as the way is opened we will build." Dr. Schinck, the pastor, is a scholarly man, 53 years old. He is a native of Richmond, but his college and theological education were obtained in Pennsylvania.

Free from Mountain Streams.

"White coal" is the striking name given by a French paper to the force generating electricity by harnessed mountain streams.

In late years men have made fortunes out

of the tailings of gold mines. The mills in which the ore formerly was crushed and the crude processes then in use allowed a large percentage of the precious metal to escape, and that loss amounted in some cases to a fortune The stomach is just like a stamp mill in this respect, that when it is not in perfect order it allows the escape and waste of much of the precious nutriment contained in the food That loss when continuous means the loss of man's greatest fortunehealth. Science offers a remedy for this condition in Dr. Pierce's Golden Medical Discovery. It corrects the "weakness" of the stomach, prevents waste and loss of nourishment, and puts the stomach and organs of digestion and nutrition into a condiion of health which enables them to save and assimilate all the nutriment contained in the food which is eaten. In all cases of constipation the use of Dr. Pierce's Pleasant Pellets will speedily and permanently cure

Made a Fortune Quick.

Joaquin Miller writes that he has made a tortune in oil. Eighteen months ago he went to Texas to buy pasture lands.

He tound what he thought a good tract and bought seven hundred acres near Beaumont, the centre of the now famous oil fields.

Then there was no thought of oil. He at once began the construction of a large cattle ranch, but scarcely had he begun when a great gusher was drilled, and soon his seven hundred acres were sought after. The land cost him \$10 an acre, and he has refused \$100,000 for the ranch. There is oil all around him, and he is content to hold for a higher offer.

The following letters are held at the Bloomsburg, Pa., postoffice, and will be sent to the dead letter office Oct. 29, 1901. Persons calling for these letters will please say "that they were advertised Oct. 15, 1901":

Miss Bessie Fenstimaker, Miss Leona Kester, Mrs. Minnie Kitchen. One cent will be charged on each

letter advertised.

O. B. MELLICE, P. M.

An Unexpected Honor.

The story is told of three Protestant Indies who walked into a Catholie church in Ireland during high mass. It was raining, and they had gone in for shelter. The priest, one of nature's gentlemen, recognized the ladies, and, stooping down, said to an attendant: "Three chairs for the Protestant ladies." It was a kindly thought, but the priest must have wished he had never thought it when the man stood up in the church and shouted, "Three cheers for the Protestant laties!" It was over in a minute-the cheers were cheered and could not be called back; but it was one of the most uncomfortable moments in the good priest's life.

Automatic Weaving Loom,

The new automatic weaving loom, invented by a mechanic in Burnley, England, is more of a revolutionizer than was at first reported. One person now operating four looms can easily attend to eight and at the same time produce 121/2 per cent. more per looms by the obviation of stoppages than un-

This is very extensive, consisting of four mining prope over one mile in length, on a great copper vein over 100 feet in width, pronounced by Copper experts as among the widest and richest copper veins known, lacking only the necessary development to place same in the front rank of the greatest dividend and copper producing properties.

Property of Company.

It is on the same great Copper Mineral Belt upon which are located the world's present greatest copper mines, each paying many millions of dollars annually in dividends and developed to the depth of from 1000 to 2000 feet, thus fully establishing the fact that the

veins are not alone inexhaustible, but widen and become even more profitable with depth. The great vein on this property is of such unusual width and so prolific in copper ore from surface that only moderate developments are needed to begin the production of ore on a scale to insure large dividends on the shares of this Company.

The Company is sinking a shaft now nearly 100 feet in depth on the vein of one of its four properties, the "Pay Roll." This shaft is entirely in ore, which, by tests, gave values at the surface of from 3 to 4 per cent, copper; at the depth of fifty feet tests gave values of from 8 to 10 per cent, copper; at the depth of seventy feet tests gave values of from 12 to 14 per cent in copper, while selected samples show values as high as 12 per cent, copper and nearly \$15 in gold and silver per ton. The value of the gold per ton will enable the Company to produce copper at very low

cost.

As showing that this great vein is not alone of unusual width, but also of rare richness in ore as compared with some of the richest copper mines, we refer to the great "An-aconda Mine," paying over \$5,000,000 annually in dividends from ore averaging less than five per cent in copper; or to the "Boston and Montana" paying over \$6,000,000 annually from ore averaging less than six per cent. in copper; or to the "Great Verde," paying nearly \$5,000,000 annually in dividends from ore averaging less than six per cent. in copper.

To give an approximate idea of the amount of ore and its value, that can be opened by a moderate development in only a small part of such a vein, the following estimates are given : Estimating pay ore vein at only 25 feet in width, depth of shapft, 500 feet, length of levels, 500 feet, would open up 6,250,000 cubic feet of ore, or over Five Hundred Thousand Tons.

Estimating the net Profits at Twenty Dollars per ton, would give total net profits of Ten Million Dollars, or Ten Times the Amount of the Par Value of the entire Capital Stock of the Company, and sufficient to insure dividends to amount of Ten Dollars for each share As the length of the vein on this one property, the "Pay Roll," is over oneof the stock. quarter mile in length, and the depto to which some can be worked many thousands of feet, it will be seen that as a copper investment the shares of this Company offer an unusual opportunity.

The property of the Company is situated in Rio Arriba County, in the northern part of New Mexico (only 40 miles from the southern boundary line of Colorado), convenient to Railroad Station and in a section heavily timbered and one of the healthiest in the United

The Company has no debts or mortgages. Its property is free and clear and its management is under able mining experience.

One-quarter of the entire Capital Stock of the Company being 50,000 Shares of the par value of \$250,000 has been placed in the Treasury of this Company as a working cap-ital, of which a limited amount is offered for sale at

PER SHA \$1

Until October 1st, when the price will be advanced to \$1.50 per share.

As there are only 200,000 shares in this Company it will require net earnings of only \$200,000 to pay dividends at rate of \$1.00 yearly upon each share. This will require only a moderate development.

Those wishing to purchase shares can make remittance, by check or otherwise, to

The Keystone Copper Mining Co., Harter Building, 208 Main St., BLOOMSBURG, PEN'A.
