THE PATRICK TRIAL.

Texas Lawyer Says Rice and Accused Man Never Met.

NEW YORK, Jan. 29.-Captain James A. Baker of Houston, Tex., member of a law firm that for forty rears was counsel to the late William Marsh Rice, an aged millionaire, whose murder Albert T. Patrick is accused of. was called as a witness yesterday at the trial of Patrick before Recorder Goff. Captain Baker said Patrick had been an attorney opposed to Rice in the litigation following bequests of millions by Mrs. Rice which Mr. Rice claimed as his property. Once Patrick offered Baker \$350,000 to settle the litigatton. The offer was spurned.

After Rice's death Captain Baker said he was astounded to find Patrick in charge of the old millionaire's affairs. He told Patrick that Rice had often expressed an intense bitterness toward him because of Patrick's part in the litigation.

The witness swore that to the best of his knowledge Rice and Patrick had never met.

Captain Baker at the afternoon sesthat he (Patrick) had met Rice through files, 75,000 people, very comfortable, Patrick would give part of the fortune to charitable institutions and exploit Rice's name as a philanthropist. Patrick said, however, that he was to get nine-tenths of the estate unconditionally, according to Captain Baker's story.

#### TWENTY-ONE MINERS KILLED. Gas Explosion In an Iowa Mine

Causes Great Loss. OSKALOOSA, Ia., Jan. 25.-As the result of a terrible mine disaster at Lost Creek yesterday afternoon twenty-one are dead in an improvised morgue and eight are in a temporary bospital.

The explosion occurred at the noon hour and was what is known as a "dust" explosion. The miners had just fired their usual noon shots, one of which proved to be a fizzle. The burning powder ignited the gas, and the explosion followed. Smoke and debris were blown out of the shaft 200 feet away, and the fans and cages were partially wrecked.

Extracto From Various Sources Indicating Democratic Opinion Regard-Ing Questions of the Day.

Reciprocity is a good deal nearer free trade than was the revenue re form advocated by Cleveland and the Democratic party in 1888 and 1892. It's a wonder, therefore, that the extreme protectionists don't denounce the reciprocityites as traitors-as they denounced the Democrats when they advocated the same thing under another name.-Titusville (Pa.) Advance Guard.

What a bargain we got when we bought from Spain her Philippine war for a beggarly \$20,000,000! Instead of a cheap insurrection, our purchase turns out to be a \$400,000,000 affair at least, and there is no limit to the possible expansion of the figures. The greatest luck Spain has had in three hundred years came to her in Manila Bay and off Santiago.-Philadelphia North American (Rep.)

The trouble with the old major is that he did not become honest soon enough. Remorse of conscience, such as Brown is now experiencing, comes too late to be of benefit to the people, unless he tells the whole story. He will hardly do that, as a lot of other "reformers" now patting him on the back would be in the hole as deep if not deeper than Goldbrick Bill.-Clearfield Republican.

"The Philippine Tariff measure passed the house of representatives by a party vote. It is one of the most shameless pieces of legislation ever proposed by any party and ought to seal the political fate of every man who supports it. England, in her oppression of American colonies, never was guilty of anything more tyrannical, and even Spain, whose despotism aroused our country's armed protection in behalf of Cuba-even Spain lacked the refined cruelty which the Republican leaders practiced with seeming enjoyment. We said, the other day, that Presi

dent Roosevelt had evidently been imposed upon by the Pennsylvania senators when he nominated their man, Saylor, for consul at Dawson, Canada If Mr. Roosevelt found that Saylor had been booked for this appointment by President McKinley, and if he sent the name in without other information as to the character and antecedents of the appointee, we can understand how the mistake came to be made. The en dorsement of Quay and Penrose ought, perhaps, to have been considered as a suspicious circumstance, but under the press and rush of business and the necessity of seeing an average of 100 visitors per day the natural suspicion which attaches to a recommendation from that quarter might have been overlooked. Now that the bad record of the man, however, has been brought to light, the president should promptly withdraw the nomination. The naming of Saylor as consul at Matanzas by Mr. McKinley was one of the most deplorable appointments of the latter's career. The good people of Philadelphia are not easily shocked by the doings of their politicians, but the appointment of a man who has just been detected in attempting to swindle the state while serving on an investigating committee of the legislature, stirred them mightily. They sent a delegation to Washington to remonstrate with the president against this galling indignity, but in vain. The would-be swindler was appointed consul at Matanzas. The war with Spain swept away a great many abuses of one kind and another, and it was supposed that Saylor's consulship had gone with the rest, but now it appears that he was only reserved for a more important position at the capital of the Klondike, where the disgrace of his appointment will be more conspicuous and glaring than it could be in a second-rate Spanish-American town.—New York Evening Post.

POHOTOGRAPHS THAT TALK.

Lagest Talking-Machine Invented in England Which Operates on an Entirely New Principle.

The physical properties of sound embrace a wide field, and, though one might suppose that the possible varieties of talking-machines had been pretty well exhausted, such does not appear to be the case. A new one has appeared in England which is based a principle altogether novel, depending upon photography for its effects, says the Philadelphia Saturday Evening Post.

The contrivance in question utilizes a flame, lighted at the mouth of a pipe which is expanded below into a sort of box. On one side of the box is a diaphragm, against which a person talks. The vibrations of the diaphragm thus produced cause the flame, as one might expect, to jump up and down.

Now, while the talking goes on, the jumping flame is photographed on a moving film, the result being a band of varying intensity. To reproduce the sounds, a beam of light is projected through this band upon a selenium cell which is included in a circuit with a battery and a telephone.

The electrical conductivity of the sclenium is varied by light, and the result of the passing of the beam is to cause variations in the current of the telephone circuit. Any variations in air-waves make sound, and thus the original voice of the speaker is accurately reproduced.

Sound records made in this way can be multiplied indefinitely by the use of photography.

Thrilling Snake Experience.

One of the most thrilling affairs in the way of a snake experience happened to a young son of C. B Royal, an employe of the Seaboard Air Line railway at Yulce, Fla. The young fellow, who is only about 12 or 13 years old, was riding from Amelia Beach into Fernandina on his bicycle, when, near the residence of Jimmie Drummond, he ran over an immense rattlesnake which was crossing the road. When the wheel came in contact with the snake he was thrown to the ground and the snake immediately put himself in coil and struck at the boy, missing him with his fangs and striking the body of the bicycle, on which can now be seen their imprint. The body of the snake came in contact with the shoulder of the boy, who was almost paralyzed with fear. At about that time Drummond appeared on the scene and captured the snake, which was a tremendous one, being eight feet long and fully 12 inches in circumference.
