(Signed) JAMES K. WILSON

THE SATHER BANKING CO. (Now San Francisco National Bank.)

Mr. Wilson writes, under date of March 3rd, as follows: "Have spent several days with the people of happened at Ephrata just in time the United States Mint here proving our figures, to which you wished me to affix my name.

"These figures are not only absolutely correct as verified by the United States Mint returns at San Francisco, but we can increase these figures previous to January, 1888, if you desire us to do so. In my researches at the Mint, between 1880 and 1885, I have already found\$188,958.00; \$20,466 output January, 18 0, from Mrs. Lydia E. Nagle died at her home on East Eighth street Mon-day evening of cancer of the stom-ach. Her period of suffering was in early days. From the croppings at that time he took away about one hundred pounds of very rich ore showing free gold largely (so he says), which he brought here to melt up and make a present to his wife. "He has that ore now and I presume if the parties who are promoting the sale of this property wished it, it could be obtained at its value. It seems to me it would be a great thing to have it, because what I am saying to you is entirely reliable and authentic. "You may think I have delayed, but you do not know the amount of effort I have put into this since Russel Foust, of Danville, and the receipt of the draft which you wished me to sign, and herewith enclosed. I could not, nor would I, affix Miss Lulu, second daughter of my signature until I knew these figures were exactly correct." This mine has not been worked since the death of the late owner, as the insolvency of his estate caused prolonged litigation, from which the estate has been extricated and an absolutely on Thursday last. Only intimate friends witnessed the ceremony which was performed by Rev. Dougherty of the M., E. Church. The bride and an abbility of all the gold mining portion of the estate and all the necessary machinery for exploration of all the gold mining portion of the estate, and to develop its other industries. The value of the Company's ground, for gold mining, is also proven by the large number of mines, opened in the same formation, in the well-known mining districts of Banner and Julian to the North, and by the development of equally productive mines to the South of the Company's Accurate accounts of the details of the operations of the Stonewall mine and mill are not obtainable, but the record in the Bank shows that Six Hundred and Fifty seven Thousand, Sixty Dollars and Thirty six Cents (\$657,060.36) of value in bullion was produced from January, 1888,to July, 1890, during which time only an old 10-stamp mill was in use. The full capacity of such a was held on Monday. The follow-ing were elected on the part of the time named, the amount of ore handled should have been about twenty-seven thousand (27,000) Stockholders-J. C. Brown, Geo. E. tons, thus showing an average value per ton for the ore of about Twenty-four Dollars (24). This Elwell, Dr. W. M. Reber, Col. J. is extraordinary, and perhaps unequalled, on a strictly free milling proposition. Nothing whatever was done with the tailings, under the old management. Col. S. H. Lucas, our General Manager, states strongly his belief that he can so open up the The following were nominated to Stonewall mine as to block out, during the next eighteen months, sufficient reserves of ore to enable him to work continuously a 40-stamp mill which would have a capacity of one hundred and twenty (120) tons per day, which, at the same average, as is shown in the past, would mean the production of Twenty-eight Hundred and Eighty Dollars (\$2880) per day in gold. As the operation of a stamp mill is practically continuous, barring accident, it is safe to figure on three hundred and fifty (350) working days in the year; this would show a product of One Million and Eight Thousand Dollars (\$1,008,000), equal to 17 per cent, per annum on the entire capital stock of the Company, from a single mine, out of the dozens that may be discovered on the property of this Company, to say nothing of its other great resources. The complete Official Prospectus of this Company, handsomely illustrated, giving the Direct-ors and containing full reports on all resources of the Company, and detailing its plans for develop-ment, is now in press, and will be furnished, on application, to those contemplating investment.
