TALK NO. 27.  
**ITS CARE.**  
A good watch is like a good horse. Treat it right and it will serve you  
well for years. Neglect it and you will shorten its days of usefulness. Good  
treatment consists of regularity in winding and cleaning and oiling. Always  
wind it in the morning. Your time of rising is more regular than your time  
of retiring. You carry your watch during the day and it needs the full strength  
of the mainspring. Don't let it run without attention till it stops. Choose  
some day of the year [your birthday is easy to remember] and have it cleaned  
and oiled regularly on that day. It doesn't take much oil to satisfy a watch,  
but when it does need, it needs badly. Carry a good dust proof case and never  
open the back. Always have a watch maker regulate it. He won't charge  
you for doing it and he knows just how. By following these rules a good  
movement will last you a life time. When you're done with it it will still be a  
good time keeper for your boy and your boy's boy to carry in turn.
