THE REASON

People ask me very often why it is that more glasses are worn now than formerly. There are several reasons. We are using our eyes much more than our forefathers did. We are doing office work on books, shop work in a bad light, type-writing, sewing and reading. While there used to be but one newspaper a week we now try to read four or five a day. The eyes are worked from early morning until late at night. Nature simply won't stand it and we have to wear glasses. Another reason is because we understand the eye better. We know the good and bad effects of lenses. We know how to relieve discomfort and suffering which a few years ago had to be endured. Thousands of people had sick headaches all their lives and knew no permanent remedy. Now more than six out of ten are cured with lenses. When we consider how slight a defect will throw the eyes out of adjustment it is a wonder that glasses are not worn even more than they are.

CHANGED CONDITIONS

REQUIRE NEW METHODS.

The Hour Glass of our Great Grand-fathers did very well in those days, but times have changed. The successful men of today reckon time as money, a missed train or broken engagement means something lost.

A GOOD TIME KEEPER
