## Quail Crop-

Despite the gloomy outlook for quail hunting this year, because of the unusual hard winter, during which many of these game birds starved to death, the quail are breeding rapidly and there will be good quail hunting when the season opens on October 15. Farmers and fishermen report having seen coveys of the birds in various parts of the county and almost everywhere on the hillsides and in the fields is heard the merry "bob white" calls of the birds. Local hunters are very enthusiastic over the prospects for a first class season this

## Putting It Gently,

# WASHINGTON.

From our Regular Correspondent.

Washington, September 15, 1902. "Tax the Trusts" is the text of a etter which Senator John T. Morgan of Alabama has recently made public and which is likely to attract considerable attention. The Senator, after stating in a lengthy preamble the existing problem, says, "The plan I would suggest, in addition to the Sherman law, is a graduated tax on all business corporations with an mestic or foreign commerce.

"The power thus exercised simply the taxing power and is not necessarily connected with the power of Congress to regulate commerce between the states or with toreign countries.

"It is the application of the princito corporations which have made agreements that violate the purposes injury of competitive trade and the general welfare."

enator is simple and easy of application. No constitutional amendment would be required, and no change of the precious tariff schedules. If the that alone. President is in earnest in his desire to control the pernicious trusts the scheme should recommend itself to crats will in all probability nominate him, and to the members of his party as well. A simple revenue tax bill could be promptly enacted which would bear heavily on every corporation but from which exemption could be secured on proof that the corporation was not acting in violation of the spirit or the letter of the law or contrary to the interests of the people. The burden of proof would rest on the corporations and in their efforts to secure exemption the publicity, so strongly advocated by the President. would be secured. The opportunity offered to the Fifty-seventh Congress, by Senator Morgan, to prove that it has the interests of the people rather than those of corporate wealth at heart, is exceptional.

President Roosevelt has just returned from his trip through the south where he joined the Brotherhood of Locomotive Firemen and spoke enthusiastically of his admiration for organized labor. There is little reason to believe, however, that the working man who has to pay \$10 a ton for his coal and 18 cents a pound for his meat will regard the President's action as entitling him or his party to RAILROAD TIME TABLE the support of the laboring The verbal statement that the President is his friend will do little to alleviate the suffering of the man who knows that, as a result of republican legislation, his family is cold and hungry.

Senator Jones of Arkansas passed through Washington this week and spoke enthusiastically of the prospects Briarcrees. of the fall elections. He called attention to the fact that the passage of the McKinley law was followed by a tremendous rise in prices and that in turn, by a great democratic victory. He predicts that history will repeat itself. He said that all over the United States the high cost of hving was proving a serious hardship to the poor man and that the poor man knew that he was suffering that hardship as a result of republican policies.

Like the running brook, the red blood that flows through the veins has to come from somewhere.

The springs of red blood are found in the soft core of the bones called the marrow and some say red blood also comes from the spleen. Healthy bone marrow and healthy spleen are full of fat.

'Scott's Emulsion makes new blood by feeding the bone marrow and the spleen with the richest of all fats, the pure cod liver oil.

For pale school girls and invalids and for all whose blood is thin and pale, Scott's Emulsion is a pleasant and rich blood food. It not only feeds the blood-making organs but gives them strength to do their proper work.

The alleged opposition of Wall Street and Senator Platt to the President, which is being the railway presidents, owned the so widely discussed in the republican mines, that they would pay such press, they declare is entirely for effect. They say that the trusts could ples of taxation which are well settled, desire nothing better than that the their business solely. They have set people be led to believe that a constitutional amendment, which they or which they were created, to the can easily defeat in the state legislatures, is necessary to effect any control over them. On the other hand, the President is carrying out the The proposition of the learned dictates of the republican leaders and of the trust managers by completely sidetracking the tariff revision idea.
