The Interesting Story of a Faithful

Indian Maiden.

Was Captured by Hostile Tribe, Rescued and Educated by a White Man, But Remained a Yuma at Heart.

#### [Special California Letter.]

HILE many Indian tribes have lived together in close proximity for many years in peace and harmony, it is equally true that in many other cases there has been a great deal of guarreling and fighting. With primitive people as well as with those who are more advanced in civilization it is very true that a tiny spark will often kindle a great flame. A deadly insult has often been read into a few insignificant words. The refusal of the hand of a maiden in marriage has often provoked war. Hundreds, nay, thousands, of lives have been lost in disputes over tiny strips of territory that were practically barren and valueless. Whole villages have been often destroyed because of fancied insults offered to the gods.

The secret of the enmity between the tribes that for centuries inhabited the mountains of what is now San Diego, Cal., and the Yumas, who dwell on the Colorado river, I have never been able to learn. Both people were warlike, proud and brave. The former were supreme in the mountains, the latter in the desert and by the river. Again and again conflicts took place between them. Sometimes the Yumas roamed too far over the desert to the east of the great river, and despite all their precautions they were swooped down upon by the mountain tribes and driven back with great loss of life. At other times the San Diegans would approach too near the river, and they in turn would suffer defeat.

In the neighborhood of 40 years ago the Yumas had been particularly aggressive and had severely punished the San Diegans on several successive occasions. This aroused the national pride of the mountain tribes and they gathered together in a great powwow where the war chiefs unanimously Several children were born to the counseled a large raid upon the Yumas which should so humble and humiliate them as to keep them peaceful for at

Exceptions of Rev. Irvine Overruled by Supreme Court.

## End of Legal Controversy.

The long legal controversy beween the Rev. I. N. W. Irvine and Bishop Talbot and others has at last in all probability come to an end, for the Supreme Court, in a per curiam opinion, has overruled the exceptions taken by Irvine to the Indian acceded to his request. the judgment of Common Pleas Court of Huntingdon county in his suit against Emma D. Elliot, Ethelbert Talbot and Alexander Elliot. The opinion sets out the facts and is in part as follows:

"This appellant and plaintiff in the court below, I. N. W. Irvine, was a priest of the Protestant Episcopal Church, and in April, 1898, was in charge of St. John's parish of Huntingdon, Pa.

"The defendant, Emma D. Elliot, was a member of that congregation; her husband was not a member and had no church connection with the parish; Ethelbert Talbot was bishop of the Diocese of Central Pensylvania in which St. John's parish was situate, and by the canons of the church had supervision and control of the religious affairs of the diocese, and was the ecclesiastical superior of Irvine.

"Plaintiff brings this appeal, assigning many reasons, but there are in substance only two:

"I-That defendants conspired to have plaintiff unlawfully deposed from the ministry.

"2-That they conspired by unlawful means to injure his reputation and standing as a Christian minister.

There is no law which imposed upon a common pleas jury the duty of passing upon the capacity or impartiality of the church court. That court believed the evidence against Irvine; therefore, their udgment, even if not approved by Irvine and his friends, and even though not impartial, is not unlaw-

ful. He had full notice of the charges, appeared and was heard; the proceedings were lawful and pronounced by a lawful court. This court, as we have said time and again, is not a court of review of the proceedings of ecclesiastical courts.

"Nor can we see any evidence that defendants conspired by unlawful means to injure the rector in his reputation and standing. They preferred grave charges, supported by evidence tending to establish them. There is nothing to show they manufactured evidence, committed perjury or suppressed the truth to bring about a false judgment. It is conceded that the native tongue as if she had never members of the court were men of integrity and could not have been

### Reform in Funerals.

The Ministerial association of Reading urges a reform in the conduct of funerals that is commended by sense and a proper regard for the proprieties. They suggest economy in the style of funerals, simplicity and brevity in the service, avoidance of eulogy, no public exposure of the body, and private interment. Only in the case of a man who has been great in public life can any excuse be found for deviation from this simple programme. Almost invariably, however, the practice is quite the reverse. The surreptitious jollification of the wake may no longer be condoned, but many of our funerals, nevertheless, bear revolting resemblance to social affairs, and frequently the love of display and the desire to outdo others are indulged to a shocking extent upon these solemn occasions.

It must be said' too, that the ministers themselves are responsible for one of the most objectionable features of the funeral. The eulogy, spoken often without due regard for the character of the deceased, may be prompted by the kindliest of sentiments, but the harrowing rehearsal of the last illness which usually precedes this discourse is wholly unwarranted. It can have no other effect than to deepen the grief of the bereaved Rather, as these Reading clergymen suggest, should the mourners be cheered by the higher life upon which the departed has entered.

Our funeral ceremonies, like all matters of everyday observance, are firmly imbedded in custom. To change them will be difficult and require time. But emanating from a source which has such immediate control over them, some good may be expected to flow from this movement. -Reading Eagle.

#### To Feed Crude Oil to Hogs

Several well-to-do farmers of Cass county, Ind., have formed a company to drill for oil, and County Anditor Gard, who is president of the company, announces that the crude oil will not be placed on the market, but will be fed to hogs.

Mr. Gard says that experiments made by him and others have shown that hogs thrive better when a liberal supply of oil is given them when being fattened for market, and that while it conduces to health the oil is much cheaper as food than corn at prices which have obtained for the past two years.

The discovery of the beneficial effects of eating the crude oil was made accidentally when hogs were running in the fields where oil was produced, and tests were then made with the result that the company was formed to produce oil for the special purpose of feeding it to hogs.

Bar Oupid's Work.

From the state of Iowa comes the word that a bar will be placed on Cupid's work. The plan to our way of thinking is good, and altogether worthy of following. The preachers have indorsed what they call a marriage commission made up of three men and three women physicians. This commission is to have power to regulate all marriages in the State and to say who shall and who shall not be married. The plan was first advocated by Judge Mc-Vey, ot the District Court. The ministers will draft a bill embodying this idea and submit it to the next Legislature. They believe that such a board would restrict the divorce evil and suppress criminal, degener-

### ate and pauper marriages.

A physician writing on the subject of that often fatal disease, pneumonia, says that the malady may be easily detected by a person not skilled as a diagnostician. There is difficulty in breathing, fever, thirst and a dull, deep-seated pain in the chest. The cheeks are flushed and there is rising and talling of the abdomen in breathing. By placing the ear against the Pottsville, who is the solicitor for the chest a crackling sound, similar to that produced by throwing salt on

red hot coals, may be heard. When these symptoms appear a physician should be sent for at once. While waiting his arrival, poultices may be applied to the chest, and unless the doctor is very near at hand it would be safest to administer a cathartic. Deep breathing is also helpful. Pneumonia acts very quickly, and unless a chai ge for the better soon takes place the disease will rapidly advance until death ensues. When taken in season, however, it is not as serious as is generally supposed. It would be well for the reader to cut this out and preserve it for reference.
