THE COLUMBIAN, BLOOMSBURG, PA.

SEPTEMBERS JURORS.

The following is a list of Junors drawn by e Sheriff and Jury Commissioners Thurs-y morning to serve at the September term Court, commencing Monday, September 7th, 1903.

GRAND JURONA. Brink, Wm. farmer, Sugarloaf. Savits, Charles laborer, Bloomsburg, Beishilne, E. B. teacher, Stillwater Creasy, Harvey farmer, Catawissa Twp. Freas, B. B. farmer, Centre Rarig, Adam farmer, Locust Gottshall, Samuel farmer, Franklin Barwick, Clarence tailor, Catawissa bore. McNeal, Peter miner, Conyngham Shultz, William laborer, Franklin Wolf, H. W. farmer, Mimin Dorr, Charles printer, Berwick Lee, Oscar farmer, Orange Twp. Weaver, Samuel gent, Fishingereek Whitenight, George E. laborer, Centre Girton, C. L. farmer, Pine Rink, Charles farmer, Scott Campbell, James S. farmer Fishingcreek Reichart, Isaac merchant, Scott Kase, L. D. gent, Bloom Miller, C. W. farmer, Locust Hirleman, P. B. farmer, Jackson Larish, James laborer, Benton Two.

PRTIT JURORS-FIRST WEEK. Shultz, M. B. Benton Borough Laubach, P. C. Benton Township Hawk, Michael Greenwood Redline, Joseph Mimin Kitchen, John Greenwood Laubach, E. M., Fishingcreek Hartzell, Michael Mifflin Yeager, Wilson Locust Iseler, William Greenwood Keller, Samuel J. Mifflin McBride, Neil Conyngham Whitmer, William H. Beaver Loreman, Andrew Franklin Christian, Frederick Berwick Artman, Isaac Mt. Pleasant McGraw, Peter, Scott E. Harder, Frank H. Catawissa Borough Fetterolt, P. A. Mimin Fortner, A. B. Centralia Borough Ohl, E. J. Hemlock Welliver, Ell Jr. Greenwood Evans, A. J. Bloom Dewitt, James Bloom Swank Joseph Mifflin John, Charles Main Lunger, John H. Jackson Miller, Oliver Conyngham Hess, R. E. Sugarloaf Hess, Clarence Sugarloaf Harington, Frank Sugarloaf Wood, Frederick Benton Borough Erff, Charles Centralla Borough Demott, Cyrus Millville Quick, Hugh Montour Brumstetter, Charles Millville Stackhouse, Samuel Pine Basin, James L. Centre Breece, Uzal, Bloom Deemer, J. R. Catawissa Borough Miller, J. K., Bloom Neyhard, Amos Orangeville Borough Gibbons, Lloyd Sugarloaf Geiger, H. W. Bloom Fetter, Harvey Montour Jones, F. B. Fishingereek Steadman, D. A. Benton Borough Cole, O D. Sugarloaf Fry, Lloyd, Montour Keiffer, Weilington Catawissa Twp? Grant, Michael Centralia Boro. Eyer, Luther Catawissa Boro. .makson, S. W. Centre Whitman, F. A., Berwick Langfield, C. W., Hemlock Stackhouse, William Berwick Harman, A. F. Catawissa Boro. Nagle, M. F. Sugarloat Angel, R. B., Bloom SECOND WEEK.

Shugars, J. Harvey Catawissa Twp. Kern, C. E., Cleveland Twp. McKinney, W. C., Berwick Hagenbuch, George Benton Boro. Bomboy, John Mifflin Twp. Ash, William Briarcreek Craig, Henry Locust Hileman, W. D. Greenwood Dimmick, Adam Cleveland Munson, David A., Franklin Kelchner, E. W. Briarcreek Brobst, William Bloomsburg House, W. H. Bloomsburg Fenstemacher, Frank Briarcreek Casey, Edward Bloomsburg Eves, Milton Madison Karns, Russel Benton Boro Whitenight, Harry Main Knouse, G. Washington Benton Twp. Vanderslice, A. B., Hemlock Sullivan, Thomas Montour Gordner, Benjamin J., Pine Appleman, H. D. Hemlock Johnston, Charles Scott Gibbons, Charles Benton Twp. Bidleman, William J., Bloomsburg Kester, Juda C., Locust Morris, John Greenwood Millard, Reuben O., Catawissa Boro. Raup, A. L. Catawissa Boro. Dildine, Henry Madison Mears, Reber H., Montour Gillespy, Patrick Centralia Boro. DeLong, J. B. Orangeville Boro.

A VALUABLE CARPET.

Ine from Room in San Francisco Mint Vields \$9,000 in Gold When Burned.

One of the most valuable carpets it the country was burned the other day When it was put down, in the adjuster's room, at the San Francisco mint, six years ago, it cost \$300. When it was burned it yielded \$9,600 in gold dust In the adjuster's room the blanks from which gold pleces are made, are filed to exactly the required size. The filings are carefully swept up every night, but the finer particles sink into the carpet, which is burned at intervals to recover the gold it contains, says a Washington report.

The annual clean-up of the well at the San Francisco mint, which is the most interesting feature of the intricate system by which the loss of gold in particles so small that they cannot be seen except with the aid of a strong microscope, is reduced to the very minimum soon will be made. All of the rain water that falls on the roof of the mint is caught in a large well and allowed to settle thoroughly before the well is partly emptied in readiness for the next rain. The rains clean the roof of the invisible atoms of gold and silver, which are carried off in the smoke from the furnaces in the melting and refining rooms. The annual clean-up of the sediment in the bottom of the well yields from \$500 to \$1,000 in gold and silver. The burning in a retort of the clothes of the workmen, the ashes from the furnaces, the floors of the rooms in which the gold is handled, and other odds and ends, largely swell the annual revenue from these little known sources. Everything on which the finest gold dust can settle is burned once a year or at longer intervals.

CONSUMPTION OF JEWELRY.

What Becomes of Good Watches and Other Articles of Value is Something of a Mystery.

A periodical devoted to the jewelry trade tries to account for the continued sale of certain lines of merchandise. As cheap plated stuff is thrown away as soon as the coating wears off, one can understand why such articles disappear. Rings, pins, and other objects of real value, as well as jewelry, may be lost, of course, but they don't wear out. They last a lifetime. Owing to a change in style, possibly they may be laid aside, but this does not happen often.

Perhaps the most puzzling phase of the question is the demand for watches and watch movements. This is encouraged by the fact that a really good timekeeper in a nickel case can be bought for \$5 or \$10, yet the number of watches sold increases much faster than the population. Where do all these go? durable are the old watches that thousands which have been in service for nearly a lifetime may be seen still in use. A Pittsburg dealer said the other day: "The railroad man is about as fair an example as you can find. While his case is only an ordinary one his watch movement is usually good, and in many instances his children earn their own watch before he is in a position to pass it to the heir. The majority of watches are kept the same way, and what becomes of them is more than the average dealer can tell."

FLOUR AND THE TEETH.

the Flour, Poorer the Bread

WASHINGTON.

From our Regular Correspondent. Washington, August 13, 1903.

Secretary Root has completed his investigation of the Littauer Lyon practically exonerates Congressman Littauer, the President's "intimate friend and most trusted political advisor." Mr. Littauer claims that it was not until after Lyon had secured the contract that he became interested in it and then only because he felt obliged, as a manufacturer of the gloves, to charge Lyon as much for them as Lyon had bid, the profit being purely incidental and unexpected by himself and Lyon. In this explanation Littauer is practically upheld by Root. The one point which Littauer fails to explain is why he appeared at the War Department on several occasions and used his influence as a member of Congress to secure the contract for Lyon, especially as Lyon was not a constituent of his. With a recommendation that, as stated above, practically exonerates Littauer, Secretary Root has referred the whole matter to the Attorney General, for his advice.

Since last week's letter the postal officials have made another generous haul, securing indictments against August W. Machen and seven of his confederates who had, according to the evidence presented to the grand jury, divided among them funds of which the government has been defrauded amounting to upwards of \$75,000. By his machinations Machen had secured a "rake off" on every registered letter case, on every carrier's satchel and on every mail box that had been painted. Among those indicted with Machen were William Gordon Crawford, manager of the Postal Device and Lock Company, "Cliff" Long and several others. Long was a protege of Senator Hanna's and had on several occasions represented Abner McKinley, attempting to sell goods, of which he claimed McKinley was the owner, to the Department and threatening with dismissal, as a result of McKinley's influence at the White House, those who refused to purchase the inferior grades of goods he offered. The grand jury is still in session and is known to be working on Postoffice cases and some more startling indictments are promised at an early date.

"Many of the people of Texas" said Representative S. B. Cooper to your correspondent this week, are not tariff reformers of the Cleveland stripe; that is to say, they want some incidental protection. In other words, they are more on the line of the late Samuel J. Randall's contention than on that principle of the Wilson bill, as reported from the Ways and Means Committee. In southwest Texas the sheep and cattle interests are important and those engaged in them are naturally opposed to the free-rawmaterial theory of the tariff. The same is the case in my district, where the rice and lumber industries are NORTH thriving. This large infusion of pro-Came tectionist ideas of the Democratic Danv1 latav variety tends to give popularity to Ruper Bloon such candidates for the presidential Espy. nomination as do not wish to push Willo tariff re-adjustments beyond a safe point. Mr. Gorman is not only popular on this account, but also because Hick's Shicks Hunlo Nantis Avond Plymo Kings Benne Forty Wyom West of his attitude on what is known as the Force bill, and that not only in Texas but throughout the south. I have some doubt of the accuracy of the interview telegraphed from New York upon his arrival there from Europe. He is not given to saying Busqu things which reflect upon those in the Dury party who differ from him on public Taylo Bellev BORAN questions." Representative Bankhead of Alabama, who is in Washington on some matters of interest to his constitutents, observed in regard to the race ques-SCRAN Belley Taylo Lacka tion in that state: "It is settled. Our new constitutional provisions as to suffrage give the negroes who can Durye read and write, or who own three West hundred dollars worth of property the right to vote. The amendment pre-Forty vents some whites, a few, from voting. Benne Kings Plymo Avono Nanti Time was afforded to all to prepare themselves for the suffrage, and since January the permanent voting list has gone into operation. It was considered necessary to have a constitutional check on suffrage because we had tried other checks and found Willo them, for one reason or another inefficient in the long run. It would Blor. not do to use violence on people any Russ more tha of viciou of industr

pensioners on the bounty of their forthere from their cabins to sit down two races. and make themselves comfortable. These old people were fully grown at PHILADELPHIA & READING the close of the civil war and did not go away. They said they could do better for themselves by staying with people who knew them and would treat them kindly and fairly. They

treat them kindly and fairly. They have never left the premises during all the long years since and now in their extreme old age and decrepitude they look to me and my family to smooth the pathway of life, for them, clear to the end. The old man's name is Pete, the old woman's Sal. They have some nephews who belong to the stock born and grown up since the civil war and who are as different the civil war and who are as different the civil war and who are as different from them as chalk differs from them as chalk differs when the civil war and who are as different from them as chalk differs from the civil war and who are as different the civil war and the civil war the civil war and who are as different cheese. Worthless and unruly, when-

Capwell's Studio,

(Over Hartman's Store) BLOOMSBURG, PA.

It is coming. Yes, sure as the sun rises out of the east and sets in the west will the values of all things settle down to a rational basis soon and the settling will be called a period of depression. It has been so ever since men have played with value as a child does with a toy balloon and it will be so until there is a permanent end of stock watering and stock gambling. Good times and bad will come and go and the wise man is the one who is prepared for either.

\$100 REWARD, \$100. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, O,

Sold by Druggists, 75c. Hall's Family Pills are the best. Worse the Teeth and Better the Deutists.

A valuable letter from a correspondent drew attention to an important and admitted cause of the national degeneration of physique which we have striven to emphasize in these columns, says the London Chronicle. The roller mill has indubitably diminished the dietetic value of our bread. The entire wheat grain is of value; the husk (which is a valuable intestinal stimulant), the brown exterior, and the white central core. Except for certain invalids, white bread is an indefensible absurdity. Better is brown bread, consisting of all but the husk, and best is a whole meal bread, assuming such to be obtainable. The deficiency of salts in white bread is unquestionably related to the deterioration-also familiar to our readersin the national teeth. We may illustrate this by an argument from Sir Thomas Lauder Brunton. "Why has An-

America the cleverest dentists?" swer: "Because she has the best flourmill makers." The better the mill is, the finer the flour, the poorer the bread, the worse the teeth, and the better the dentists. Perfectly simple.

National Museum Meteorites.

More than 300 meteorites from outer space are seen in the National museum, at Washington, their range in weight being from a few ounces to 6,000 pounds. The monster one is roughened from its surface, being melted by friction with the earth's atmosphere. One weighing 1,400 pounds is almost pure iron. Precious metals are not found in these aerial excursionists, but microscopic diamonds are sometimes formed by combustion with the earth's atmosphere. They are made up from iron, nickel, sulphur, carbon, phosphorus oxygen, silicon, magnesium, aluminum and calcium.

After the Funeral.

A Japanese Buddhist dignitary was buried a few weeks ago. The police made the following terse return of the side issues of the ceremony: "Three hundred and eleven injuries, 75 fainting, 121 thefts, 374 pickpockets captured, 1,021 articles lost. Seventy-nine people fell into creeks or ditches."

a sho and he Would Be Burled at Sea. Admiral Sir Harry Keppel, "the father of the British fleet," has begun his ninety-fifth year. The venerable officer is a sailor by instinct, and has often declared that he hopes to die and be buried at sea.
