one end of the country to the other and learned that the city ge intensifying the race issue. He well knows that all thoughtful men of the South without exception, unless it be politicians who want the votes of the negroes, and every thoughtful man of the bank was able to meet with the the North, has reached the conclusion that no greater crime was ever committed against good government, no greater crime has ever been perpetrated against the women of the South, than the emancipation of the negro by constitutional amendment. The President of the United States with an impulsiveness and thoughtlessness which would hardly be excused in a small boy in this community, has a faculty of expressing himself which has become dangerous to the peace of the community. He has interfered in our state and has tried to stimulate the republicans by inviting them to a harmony meeting and to sit around the table at which Booker

Washington sat.,, He declared further that by his interfering with matters which did not properly belong to his office the President had unsettled business interests. Isidor Rayner, the democratic candidate for the United States Senate spoke along the same lines declaring humself for the disfranchisement of the negro as a matter of self preservation. Senator Gorman now stands out as the leader of the opposition to the President on his attitude on the race question and this will probably be made the issue of the coming presidential campaign : unless the republicans refuse to nominate Mr. Roosevelt who stands for strengthening food. equal opportunity for black and white.

*** According to the official figures our merchant marine has now reached the ighest point in the history of the country, and this remarkable growth was regardless of the fact that there was no ship subsidy act passed. The total tonnage amounts to 6,087,345 tons, which places us second to Great Britain in the merchant marines. As her tonnage exceeds 16,000,000 it will be some time before we can hope to occupy first place. The growth of our marine began in 1900, when the five million mark was passed for the first time in many years. Since then
