**WASHINGTON.**

From our Regular Correspondent.

Washington, Nov. 23, 1905.

Another has been added to the list of scandals associated with the republican party. Senator Dietrich of Nebraska is appealing to the President, the Attorney General and his republican colleagues of the Senate to save him from conviction on indictments for bribery and conspiracy which have just been returned against him by the Federal Grand Jury. The Senator is accused of accepting \$1,300 in money and property in consideration for his endorsing the appointment of Jacob Fisher to be Postmaster of Hastings, Nebraska. Although the jury, selected from all over the state, voted 19 to 1 in favor of returning the indictment, the Senator declares that it is the result of a political conspiracy, and is trying to remove from office W. S. Summers, the United States District Attorney who prepared the charges. It appears that the Senator has erected a building at Hastings and indeed the Post Office Department to transfer the local office to it from a building owned by the Grand Army. The Senator received less rent for the office than he had asked, and the Grand Army men in Hastings regretted the loss incurred by their having bought post office fixtures which were of no use to them. A new postmaster was to be appointed, and whichever of the applicants received Senator Dietrich's endorsement was certain to receive the appointment. Fisher promised that if he got the position, he would buy the fixtures from the Grand Army men and also pay the Senator the difference between what he got and what he asked as rent for the office. Fisher is now the postmaster and is under indictment with the Senator. For several months he paid Dietrich the money to make up the rent, until the Senator realized that he was violating the law and returned the money to the Postmaster. This may prove an extenuating circumstance in the case, but the buying of the fixtures still remains as an illegal consideration. The penalty for the accepting considerations in making public appointments is two years imprisonment or \$10,000 fine. The Senator says he will waive his constitutional immunity from arrest and return to Nebraska to stand trial. It remains to be seen whether he can convince the jury that the indictment was the result of a "political conspiracy."

Aided by democratic votes, the Cuban reciprocity bill passed the House of Representatives. By an arbitrary disregard for the rights of the minority the republicans prevented the submitting of any amendments, and the democrats were forced to accept the bill for want of something better. It will no doubt pass the Senate for with democratic assistance, the necessary two-thirds majority for the treaty has been obtained already in that body. The bill may be passed in time to adjourn the extra session before Thanksgiving. Representative McClellan, democratic mayor-elect of Greater New York made an eloquent speech in the House in favor of the bill. He said in part, "Now at last, after years of wait-

ing, after the spectacle of an insistent lobby practically dominating Congress, we propose to partially fulfill our pledge to Cuba by giving her this two-penny measure of relief, that is warranted not to offend the susceptibilities of the most sensitive trust in existence. We have a solemn promise to Cuba, if a Republican majority, in its might, is only willing to partially keep the promise, the blame and the shame rest with the Republican party. This bill is but a partial fulfillment of our obligation, but as we are confronted with the alternative of either not fulfilling that obligation at all, or of fulfilling it in part, there should be no difference of opinion on this side of the chamber as to the necessity of enacting the bill."

Mr. Clarke, democrat from Missouri, also favored the bill in a humorous speech in which he taunted the republicans. "Your Uncle Mark," he said "invented 'let well enough alone.' He afterwards converted this in to 'stand pat', and then the able chairman of the Ways and Means Committee, Mr. Payne, added a little, 'keep on letting well enough alone,' and then when your Uncle Mark was being punched over the ropes out in Ohio, by Col. Theodore Roosevelt and Joseph B. Foraker, he added, 'for God's sake, Let's keep on letting well enough alone.'" Mr. Clarke declared that when, after the next election, the democrats got control of the House they would take revenge on the republicans, who are making such frequent use of the "gag rule," to silence the opposition of the minority.

The Administration has committed itself to the Panama canal and Secretary Hay has signed a canal treaty with Minister Varilla which gives this country absolute sovereignty over the canal territory as well as the right to insure public peace and sanitary conditions in the cities of Colon and Panama. The two commissioners from the Isthmus are in Washington. They are Dr. Manuel E. Amador, minister of finance of the new republic and head of the revolutionary party, and Frederico Boyd, a popular representative of the business interests of the Isthmus. They arrived in New York on a ship flying Panama's flag and will ratify the treaty signed by Mr. Varilla. They will get the \$10,000,000 which was to go to Colombia, although it is thought by some officers of the Administration that part, or all, of this money should be paid to the Bogota government as an indemnity for losses incurred by the revolution. \$40,000,000 will have to be paid to the Panama Canal Company and as Secretary Shaw has deposited so much of the cash of the Treasury in the national banks, that enough does not remain to pay this sum, many of the republicans are worried lest the withdrawing of the money from the banks will have a bad effect on the business of our country, and reveal to the voters the precarious condition of our financial system which the republicans say ought not to be changed until after the presidential election. Although the democrats in the Senate condemn the President's rash haste in recognizing Panama and his gross blunder in publishing a discarded part of his coming message in which he threatened Colombia, they will support a canal treaty if the President sends one to the Senate. Their assistance is necessary because the republicans have not the two-thirds majority, required for the ratification of a treaty. Senator Bacon of Georgia expressed the general opinion of his party colleagues when he said, "The majority of the Democrats do not intend to permit the President to put them in a position which can be considered as antagonistic to the canal. I have no doubt the Republicans would be very glad to see the Democrats occupy that position, and it is a very safe rule in politics as well as in war, not to do what your enemy wants you to do." At the same time he declared that our government violated every recognized principle of international law and every obligation of one nation to another with which she was at peace, by recognizing Panama almost before the news of the revolution reached Colombia.

Knew She Would See It.

A lad, says an exchange, in the geography class, was deeply interested in learning the points of the compass. Said the teacher: "You have in front of you the north, on your right the east and on your left the west. What have you behind you?"

After a few moments reflection Charlie exclaimed: "A patch on my pants." And to make the information more binding Charlie continued in a shamefaced manner: "I knew you'd see it; I told mamma you would."

**Radium "Missing Link" of Science.**

Whole Series of Discoveries Which Will Revolutionize All Known Laws May Result from It. Says Mineral Expert.

George F. Kunz, of New York, a well-known mineral expert, has been making experiments recently with radium the results of which lead him to believe that existing scientific laws may be revolutionized.

He stated that probably the world is on the threshold of new discoveries, which would give as startling results in the twentieth century as the electrical discoveries of the nineteenth. Some of the remarkable properties of radium are already discovered, but they are not at all understood. He says:

Radium surpasses light and electricity and every known substance in its penetrative power. It kills mice and animals that are subjected to it. It turns glass black. It is always two or five degrees hotter than the surrounding air and yet never decreases in energy. In fact, all its properties are so utterly different from anything else that has ever been discovered that it belongs to a new class of substances. It may result in a discovery of a whole series of new elements and revolutionize all scientific laws of to-day. It may be the connecting link between the sun and the earth, as far as we know; the sun is the only other known body which continually gives off heat without losing its own energy.

"Have by some surgeon Shylock on thy charge to stop his wounds lest he do bleed to death." People can bleed to death. The loss of blood weakens the body. It most follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is in large part due to its action on the blood-making glands and the increased supply of pure, rich blood it produces. It is only when the blood is impoverished and impure that disease finds a soil in which to root. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is emaciated, the lungs are weak, and there is obstinate lingering cough, "Golden Medical Discovery" puts the body on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health perfectly and permanently restored. It has cured thousands who were hopeless and helpless, and who had tried all other means of cure without avail.

Twenty-one one-cent stamps to cover expense of mailing only will obtain a copy of Dr. Pierce's Common Sense Medical Ad- viser, 1008 pages, in paper cover. Send thirty-one stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

**What the Farmer Wants.**

The Farmers' National Congress which was in session at Niagara Falls recently with 300 delegates representing thirty-eight states, adopted resolutions favoring a reduced income tax, the direct election of Senators, the parcel post and postal telegraph and saving bank, laws to control trusts, more rural delivery, the referendum, and an agricultural census every ten years, beginning next year.
