TRIVIAL THINGS THE CAUSE OF ACCIDENTS AND SUICIDES.

Extracts from the Report of the "Society for the Investigation of the Unexpected"-Long and Interesting List.

New York,-By jts annual report, just submitted, the committee on accidents, of "The Society for the investigation of the Unexpected" lays marked emphasis on the triviality of the causes producing tragic results and otherwise during the year ending December 1, 1904, says the Herald, of this city.

"Never before," says the committee, "have little things played so prominent a part in the important affairs as this year. A very careful investigation into almost numberless cases has shown that instead of the great passions, love and hate, this year petty things have held the center of the stage."

The committee instances "murders," and, although acknowledging that such happenings do not necessarily come under the title of unexpected, yet they have thrown this investigation in as good measure, so to speak.

"The number of homicides that have been caused by such petty things as cold coffee, burned beefsteak and 'pies such as mother never could have made' are only surpassed by the number they might have caused," says the committee. "There is on record a case in Dubuque, Ia., where the accidental dropping of salt in ice cream resulted in a homicide which broke up a silver wedding. There is another case in which a statement that 'My first wife, Emma,

A STREET CAR CASE. (This Was an Incident of the Past Year in a Western Town.)

was a wonder at making soup' brought on a calamity.

"There are many cases where a refusal to dance with one man and the acceptance of another man's invitation resulted in an affray. A balky horse brought on a feud in Kentucky, because one of the feudists happened to laugh at the efforts of the other to start the horse. Beans have caused murder this year, and so have grapes and other vegables and fruits, while the cas due to watermelons is very large, principally in the southern states after

So far as suicides are concerned, the list, the report says, is equally large and trivial. "We lost count of the number of cases of self-destruction because the back hair had become disarranged in public' or some portion of the dress had become undone. We hate to think of how many, principally women, have speeded themselves because somebody else was five minutes late, ten minutes 2 late or did not show up at all, or became cold or scornful or argumentative or intoxicated or many other things.

"So far as the lateness is concerned." continues the report, "we have no record of any married man adopting such extreme measures. It is a good thing, or perhaps there would not be any married men.

"Then there is the record of where a street car caused a young man to end all. He was not struck by the car, but in a western town he rode until he espied a young woman of whom he was much enamoured. Seeking to make an impressive exit from the car he swung himself gracefully off a rear step to alight on an unsuspected slippery spot. The spectacle of a flying hat, flying heels and eyeglasses, to say nothing of the further act of the slippery spot on the light summer suit, caused the young woman to laugh. Being supersensitive, the youth in question went home to do his rash act."

One broken pen caused a similar act. A young man in New Madrid, Miss., took the only pen available to write a note inviting a young woman to accompany him on a moonlight excursion. The penbroke, and there was not another to be had. As a result the young woman received another invitation before the young man could go down town and purchase a new pen.

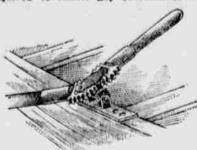

When it comes to accidents the committee fairly revels in small thingsgnats, one flea, birds, all kinds of anihals, from mice and moles up to goats, they say caused troubles of the unexpected kind all summer. A sunbonnet, a flirtatious young woman, one bumblebee, a dress suit case, an innocent Berkshire pig, many pupples, a picture frame, a strand of blonde hair (not domestic). the cough of a boy in church, seven poll parrots, the wink of an eye, a garter snake, a tadpole and earwig. The committee grew tired of counting banana and orange skins to say nothing of the slippery gangplank, the sensitive boat, the broken oar blade and the tin can.

THE ARTICULATED OAR.

An Ingenious Invention That Is Being Widely Talked About in France.

Nantes, France.-An ingenious invention, which may or may not be already known in the United States, is being talked about just now in the French journals. It is an articulated oar for rowboats, which enables the rower to row his boat while facing in the direction in which he is moving instead of turning his back, as the old system requires. The inventor is M. Doyen, of 66 Rue de Namur, Brussels, Belgium.

It is claimed for this invention that while permitting the rower to face in the direction in which he desires to propel the boat, it does not in any other manner affect the old system of rowing or weaken the effect of the stroke. Consequently, no training or practice is required to enable any oarsman to use

MECHANISM OF THE OAR. (Showing How It Is Attached to the Boat and How It Operates.)

the new oar. It is formed of two arms, which are joined at the oarlock by articulating toothed sectors, which are firmly attached to the boat. This mechanism produces an inversion in the movement of the two arms of the oar. The cleats which join the two arms are so adjusted that the oarsman gives to the articulated oar the same movements of raising or lowering and of propulsion as with ordinary oars. The accompanying illustration gives an idea of the | The Following Persons Have Been Drawn to invention BENJ. H. RIDGELY.

New Use for the Potato.

The use of potato alcohol to furnish light, heat and motive power has been developed very rapidly, and to a very high degree in Germany. Germany produces about 55,000,000 tons of potatoes a year, and uses for human food, stock food and starch only about 35,-000,000 tons. The remainder is converted into alcohol, and used as a power generator for both land and water motors, and for cooking, heating and lighting. The alcohol vapor is burnt like gas in chandeliers and street lamps, and gives a very bright light. In districts distant from mines it is cheaper than coal. It is claimed that a ton of potatoes will generate as much candle-power or horse-power as a ton and a half of anthracite coal.

SOME EXPENSIVE FOOTWEAR

A London Woman Has Her Shoes Ornamented with Costly Gems.

London.-Probably the most remarkable shoes ever produced within recent times were those worn at a function in London the other day by a lady well known in society. In keeping with a gorgeous gown, which is said to have cost a fabulous sum, she wore a pair of

(It Is One of a Pair Worn by a Woman of London.

shoes that were literally covered with flashing jewels-diamonds, rubies and pearls. The style of decoration was of a remarkably striking character. Five hundred dollars was the price of each shoe.

Such decoration of shoes is a return to the fashion of the middle ages, when extravagance and gaudy display were the chief characteristic pertaining to footwear, in common with other things.

Fish Law Given Severe Blow-

The present law pertaining to illegal fishing received a severe blow from Judge Woods, at Hunt ingdon on Friday, who declared that persons who used fish baskets in the public streams, which were erected by other persons without their consent were not violating the law. He says:

"The Legislative act applying to the use of fish baske's for the taking of eels during the fall months does not provide a penalty for the violation thereof."

Several defendants who were convicted and fined before a justice of the peace at Huntingdon had their fines and costs remitted.

-Members of the freshman class of Bucknell University who held their annual banquet secretly in Wilkes Barre Monday night, after blocking all efforts of the sophs to abduct their officers, returned to college Tuesday morning jubilant over their success. The sophs had planned to prevent the banquet, but never thought the freshmen would go so far away from college to hold it.

THE MARRIAGE OUESTION.

The professor who announced that "love and romance die out with the sound of the wedding-bells," was the first to start the ball rolling. It would seem a brave woman who marries with this echo in her ears, yet we have not heard that there were fewer marriages during the year. There are unhappy married lives, but a large precentage of these unhappy homes are due to the illness of the wife, mother or daughter.

During a long period of practice, Doetor Pierce found that a prescription made upentirely of roots and herbs, without the use of sleohol, cirred ninety-eight per cent, of such cases. After using this remedy for many years in his private practice he put it up in a form that can be had at any store where medicines are handled. The professor who announced that "love

where medicines are handled. Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Pavorite Prescription now feel fully warranted in offering to pay \$500 in legal money of the United States, for any case of Leworrhea, Fernale Weakness, Prolapsus, or Falling of Womb which they can-not cure. All they ask is a fair and reason-able trial of their means of cure.

able trial of their means of cure.

Dr. Pierce's Favorite Prescription cures headache, backache, nervousness sleep-lessness and other consequences of womanly disease. "Favorite Prescription" makes weak women strong and sick women well. Accept no substitute for the medicine which works wonders for weak women.

The Spirit of Winter-

The Spirit of Winter is with us, making its presence known in many different wayssometimes by cheery sunshine and glistening snows, and sometimes by driving winds and blinding storms. To many people it seems to take a delight in making bad things worse, for rheumatism twists harder, twinges sharper, catarrh becomes more annoying, and the many symptoms of scrofula are developed and aggravated. There is not much poetry in this, but there is "truth," and it is a wonder that more people don't get rid of these ilments. The medicine that cures them-Hood's Sarsaparilla-is easily obtained and there is abundant proof that its cures are radical and permanent.

The average girl has a warm place in her hears for the fellow who treats her to ice cream soda.

Whisky Medicines-

The temperance press is emphasizing the danger to the home in the use of "medicines" which are loaded with whisky or alcohol. In this respect, as well as in the remarkable character of their cures, Dr. Pierce's medicines differ from other preparations. Dr. Pierce's Golden Medical Discovery and Favorite Prescription" contain no alcohol, whisky or other intoxicant, and are equally free from opium, cocaine and other narcotics, Every family should have a copy of the People's Common Sense Medical Adviser, sent absolutely free, on receipt of stamps to pay expense of mailing "only." Send 22 one-cent stamps for the book in paper covers. or 31 stamps for cloth binding. Address Dr. R. V. Pierce, Buffalo, N. V.
