The Scotch Consciunce in Russia Russia contains many more Scotch

immigrants than would be believed. Some of these are in curious occupations. Not long ago a traveler from North Britain, touring in Russia, was attending service in a Greek church, and had his attention riveted by a gigantic attendant in the procession, who flourished an esperge with great skill, uttering the while some words which seemed familiar to the tourist's ear. Listening intently he made out the sentence to run: "It's jist pickle o' clean cauld watter. If it does ye nae guid, it does ye na hairm." After the service he sought out the attendant, who took him into a side chamber, and disclosed himself as a Dunfermline man who had wandered in many lands and had at last got a temporary job with the local Greek priest. -Boston Transcript.

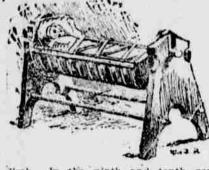

The New Hebrides.

Australia is afraid that France will annex the New Hebrides Islands, but there are many people living in these isles of the western Pacific who would be glad if they could be annexed by any power. For the blessings of rule under an Anglo-French convention are somewhat mixed. The Briton is forbidden by his own rulers from importing spirits, while the Frenchmen does a merry trade, selling his liquid fire for substantial acres, thus gradually establishing his predominance over the fettered Anglo-Saxon. England has a historic claim to rule in these regions, for it was Capt. Cook, who, in 1773, gave the islands their name, under the belief that they were the most westerly isles in the Pacific.

Longfellow's Birthplace.

In Portland, Me., the house where Longfellow was born is now a tenement in the poorer part of the city. A few years ago a teacher in Portland was giving a lesson on the life of the pot. At the end of the hour she began to question her class. "Where was Longfellow born?" she asked. A small boy waved his hand vigorously. When the teacher called on him his answer did not seem to astonish the rest of the class, but it was a cold shock to her, "In Patsy Magee a bedroom," he said.

How Baby Slept in the Middle Ages. Baby newadays has things so much his own way that he would doubtless feel very indignant if he were put to sleep like the baby of the middle The picture shows a style of cradle in use some eight centuries ago, when the custom prevailed of swarthing the limbs of the poor little mites of humanity in the tightest of swaddling bands. They were strapped down in their cradles so that they not fall out, or even move

In the ninth and tenth centuries cradles were made of a section may be attached to the faucet. The of the trunk of a tree scooped out. holes were bored at the sides and through these straps were passed to fasten the baby in. Later on rockers were used. Sometimes the cradle was hing by cords or, as in the picture, slung between two wooden supports. In the sixteenth century cradles were often very elaborate and beautiful. Sometimes they were made of silver and again they were of wood, richly carved and ornamented with gilt moraic work.

English as She is Spoke.

A story is told of a German teacher at Vassar who is not thoroughly acquainted with the English language and the college slang has not helped her in solving the puzzle. She had heard the girls talk about going on larks. Returning one day from a picnic she said to some of the girls: "Oh, I have been on such a canary." She started her class one day by complaining against some of the cold days of September, saying: "Why, it was so cold one day I had to stay in my room all the morning and sit with my feet over the transom trying te keep warm."

an inquisitive child can take the conceit out of a wise man in short order.

\$100 Reward. \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a his hat. If he wears it at the next constitutional disease, requires a bull fight it is considered a match. In constitutional treatment. Hail's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much taith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address:

Convulsion.

Fits, then
Epilepsy.

Dr. Miles' Restorative Nerv-

ine has been so successful in curing these brain-wrecking diseases that there is every reason to believe that even the most hopeless cases can be benefited, if not fully restored.

We will be pleased to refer any one thus afflicted to many who now enjoy the blessing of health, after years of hopeless suffering.

'I have a son that had brain fever when two years old, followed by fits of the worst type, and he was pronounced incurable. I spent hundreds of dollars for him, without relief. After about fifteen years he became so bad that we sent him to Longelift heepital for the insane, at Logansport. Ind. He was there nearly three years, but he continued to grow worse, so we brought him home July 36, 1902, in an awful condition. He had lost his mind almost entirely. He had lost his mind almost entirely. He had lost his mind shoet; was a total wreck. He had from 5 to 10 fits a day. We were urged to try Dr. Miles' Nervine, and before the first bottle was used, we could see a change for the better. We have given it to him ever since, and he has had but two very light spells since last August, 1903, and then he was not well other ways. We pronounce him cured, as he can work and go anywhere. If any one wishes to ask any questions concerning this, they are at liberty to do so."

E. H. BUNNELL, Lincoln, Ind.

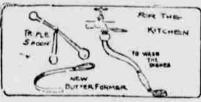

Dr. Miles' Nervine is sold by your druggist, who will quaranter the.

Dr. Miles' Nervine is sold by your druggist, who will guarantee that the first bottle will benefit. If it falls, he will refund your money. Miles Medical Co., Elkhart, Ind

FOR THE UP-TO-DATE WOMAN.

Household Helps Recently Invented to Make Work Easier for Them.

The up-to-date woman, particularly the housewife, makes frequent tours of the housefurnishing sections of the big shops just as she does of the other departments, and she is generally rewarded for her 'rouble. In fact, if she wants to keep informed about the new things that are constantly appearing for kitchen use she cannot afford to pass the housefurnishing section by Bayers, make annual trips to Europe in search of novelties in the line of culinary utersils and housekeeping help, and the inventors and manufacturers of our own and keep things humaning so

there is generally something interesting to be found among the housefurnishings.

One of the latest inventions is designed for the service of the woman who must wash dishes whether she wants to or not. This contrivance, as pictured above, is a brush fitted to a strip of rubber tubing which dishes are washed by means of the brush and the fair presiding genius of the operation need not put her hands into dish water at all.

A triplicate spoon as shown in the accompanying group is another comparatively recent invention. It is intended for measuring salt or other seasonings, and the sizes are respectively those of tea, dessert and table spoons.

The familiar styles of butter molds now have a rival in this latest production shown here, and which is said to be both serviceable and economical.

Beauties Must Sleep.

Women who sleep a great deal and comfortably, who are addicted to naps and regard nine hours of wholesome rest as absolutely requisite to their physical well-being are the women who defy the frosting hand of time. These are the women whose wrinkles are few and far between and whose eyes remain the brightest and cheeks the rosiest for the longest period after the bloom of youth has fled. No less notable a beauty than Diana de Poictiers, who retained her irresistible loveliness until her 77th year, recognized the value of sleep as a preventive of wrinkles. Indeed, so fearful was she of losing a moment of perfect rest that, mistrusting the beds of her friends, she carried her own, with its splendid fittings, on all her journeys.

Proposals in Spain. In southern Spain the cigarettemakers form almost a class by themselves. Among them it is customary for a girl who fancies a lad to twist her powder puff into a pompon for some parts of northern Spain a pumpkin pie is held by the peasant girls to be the proper offering to the object of their affection. When a young man receives such a ple his eating it or not signifies his acceptance or refusal of the offerer's proposal of mar-

CROSSES BY THE ROADSIDE.

County Waxford, Ireland, Still Prac-

tices Qualit Funeral Custom. In the district known as "the barony of Forth, in County Wesford, Ireland, is to be found a race of mardworking, industrious peasants, hving in thatched cottages with clean, whitewashed walls, which by their perfect whiteness at once arrest the attention of the visitor. These people differ in many respects from the inhabitants of the other parts of the same country and have habits and customs peculiar to themselves. They are strong believers in the efficacy of prayers for the dead. When a funeral takes place two wooden crosses are provided. On the way to the cemetery a halt is made at a certain spot by the side of the road. Here prayers are said for the deceased, after which one cross is deposited in a hawthern bush or under it. The procession then goes on its way, and after the interment the other cross is fixed at the head of the grave. This strange custom dates from time immemorial, as the great pile of crosses by the roadside indicate.

Burial Right Secure.

There is a strange custom prevalent among the old fishermen and halidloom weavers of Girvan, Scotland. The industries of the town are fast decaying, only a very few weavers being kept busy now, so the younger generation have to migrate in search of fresh fields. When the grown-up sons and daughters have been successful in their new spheres, often at the other side of the world, their thoughts are busy with the "auld folks." A very common present to the latter is that of a "certificate" giving the right to be buried in the old churchyard. Thus their parents' last resting place is secured, and so common is the custom that only to a stranger does its grewsomeness appeal. The old people tell of the possession with pride and thankfulness.

Strange Burial Custom.

Natives of the northeast coast of Scotland observe a curious custom at funerals. After the burial service the coffin is carried outside the house and placed upon the two chairs on which it had rested within doors. As soon as the pallbearers lift up their burden and begin their journey to the graveyard these chairs are at once thrown sharply on their backs. In this position they are kept until the interment has taken place, when they are taken indoors again. Any attempt to place the chairs on their legs or to take them in before the proper time is at once frustrated by the relatives of the dead.

Tobacco Growing Prohibited.

In Spain, although all the tobaccogrowing colonies have been seized by the United States, the growing of tobacco in Spain itself, for which the provinces of Malaga, Almeria and Zeres are admirably adapted, is prohibited. All the same, tobacco is not only grown but is cultivated in sufficient quantities to employ four factories, of which the products are on sale throughout Spain. After a recen council the king produced a packet of cigars, and, offering one to each of the ministers, said pleasantly: "Try these. To my thinking they are excellent cigars. They have been sent to me as a present from Andalusia, where, I am told, they are manufactured by contraband from Spanish-grown tobaco." This incident is expected to put matters on a better footing.

Engine and Train Without Driver. Germany possesses a miniature but most useful railway to which no parallel is found in this country. Its peculiarity is that its trains have no drivers. It is used for carrying salt from the salt mines at Stasfurt. The trains consist of thirty trucks, each carrying half a ton of salt. The engines are electric, of twenty-four horse-power each. As it approaches a station, of which there are five along the line, the train automatically rings a bell and the station attendant turns a switch to receive it. He is able to stop it at any moment. To start it again he stands on the locomotive, switches the current and then descends again before the engine has gained speed.

Russian Justice.

A short time ago when a train on the Russian railway from Tashkend stopped at Tcherneievo a well-dressed man got into a carriage marked, "no smoking allowed" and, taking out his case, began to smoke a cigarette. The attention to the fact that he was not attention to the fact that he paid no Sold by C. A. Kleim. other passengers politely called his heed to them and went on smoking. It so happened that one of the travelers was a justice of the peace, who thereupon got up, took his chain of office out of his bag and declared the carriage a court of law. The smoker was found guilty and fined fifty rubles and, as he would not give his name and declared that he had no money, he was imprisoned in the guard's van until he paid the fine.

England's Milk Bill.

The laborer, it seems, is content with 5 gallons of milk, 9 pounds of cheese and 15 pounds of butter in the twelve months. Artisans and mechanics have 12 gallons of milk, 11 pounds of cheese, and the same quantity of butter. Each member of the upper class, however, drinks on an average of 31 gallons of milk in a year, eats 101/2 pounds of cheese and 41 pounds of butter.

A single log of mahogany often brings as much as \$5,000 at a sale.

Consumption

C There is no specific for consumption. Fresh air, exercise, nourishing food and Scott's Emulsion will come pretty near curing it, if there is anything to build on. Millions of people throughout the world are living and in good health on one lung.

From time immemorial the doctors prescribed cod liver oil for consumption. Of course the patient could not take it in its old form, hence it did very little good. They can take

SCOTT'S **EMULSION**

and tolerate it for a long time. There is no oil, not excepting butter, so easily digested and absorbed by the system as cod liver oil in the form of Scott's Emulsion. and that is the reason it is so helpful in consumption where its use must be continuous.

We will send you a sample free.

G Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. Scott & Bowne

Hope may be a humbug, but he's the best kind of a comrade on a gloomy day.

In late years men have made fortunes out of the tailings of gold mmes. The mills in which the ore formerly was crushed and the crude processes then in use allowed a large percentage of the precious metal to escape, and that loss amounted in some cases to a fortune. The stomach is just like a stemp mill in this respect, that when it is not in perfect order it allows the escape and waste of much of the precious nutriment contained in the food. That loss when continuous means the loss of man's greatest fortune-health. Science, offers a remedy for this condition in Dr. Pierce's Golden Medical Discovery It corrects the "weakness" of the stomach, prevents waste and loss of the stomach, prevents waste and loss of nourishment, and puts the stomach and organs of digestion and nutrition into a conorgans of health which enables them to save and assimilate all the nutriment contained in the food which is eaten. In all cases of Pellets will speedily and permanendy cure the disease.

ing point in a man's life is sometimes when he has an ax to grind.

Strong Words by a New York Specialist .- "After years of testing and comparison I have no hesitation in saying that Dr. Agnew's Cure for the Heart is the quickest, safest, and surest known to medical science. I use it in my own practice, It relieves the most acute forms of heart ailment inside of thirty minu-tes and never fails."-37 Sold by C. A. Kleim.

The spring poet doesn't seem to realize that there is always room for one more in the waste basket.

Itching, Burning Skin Diseases relieved in a day, Eczema, Salt Rheum, Barber's Itch, and all eruptions of the skin quickly relieved and speedly cured by Dr. Agnew's Ointment. It will give instant comfort in cases of Itching, Bleeding or Blind Piles, and will cure in from three to six nights. 35c .- 38 Sold by C. A. Kleim

A woman has only one tongue and two ears, but he can generally talk faster than she can listen.

Apoplexy.-Dr. Agnew's Cure for the Heart is effective in apoplectic symptoms. If you have unpleasant dizziness, lightness or sudden rush of blood to the head, take precaution against a recurrence. This great remedy will remove the cause. The press of the land has daily a list of sudden deaths which would not be chronicled if Dr. Agnew's Cure for the Heart were

The people who want the earth should realize that there is enough of it to go around -- on its axis.

Heart relief in half an hour.

A lady in New York State, writing of her cure by Dr. Agnew's Cure for the Heart, says: "I feel like one brought back from the dead, so great was my suffering from heart trouble and so almost miraculous my recovery through the agency of this power-ful treatment. I owe my life to it."-40 Sold by C. A. Kleim.

Some people talk against time, but the man who sells clocks shouldn't.

While there is life there is hope I was afflicted with catarrh; could neither taste nor smell and could hear but little, Ely's Cream Balm cured it .- Marcus G.

Shautz, Rahway, N. J. CREAM BALM reached me safely and the effect is surprising. My son says the first application gave decided relief. Respectfully, Mrs. Franklin Freeman, Dover, N. H.

The Balm does not irritate or cause sneezing. Sold by druggists at 50 cts. or mailed by Ely Brothers, 56 Warren St., New York.
