Twenty-three of a total of forty Parliaments are already represented, making a membership of more than a thousand.

Although active work in the formation of committees and other details will be begun at once, probably the first strong impetus for the Association for International Conciliation will be given at the National Arbitration and Peace Congress in Carnegie Hall, from April 14 to April 17. The above is a new reduction of rations for the four legged members of Uncle Sam's service. That the army is getting poor and expenses are being reduced came out yesterday in an order from Major-Gen. Frederick D. Grant, commanding the Department of the East, ordering the short rations.

At the same time an order came out from Gen. Grant that no more extra issues of fuel will be granted to post commanders and that fuel consumption for the remainder of the fiscal year must be reduced to the lowest possible limit. The reason given is "the existing condition of the regular supplies appropriation."

The forage and fuel reduction orders go into effect on March 15.

Is Willing for the Government to Run the Great Northern.

Minneapolis, March 14.—President James J. Hill of the Great Northern Railroad told the Senate legislative committee that he would be only too willing to have the United States Government take over his road.

He stated further, however, that if the Government should go into the railroad business the country would have an "elephant" on its hands.

"Then," said Mr. Hill, "The Government would be obliged to engage in another lottery to get rid of the elephant."

"If the Government had charge of the railroads Congress would be kept busy making appropriations, the districts with poor representations and sparse population would be left in the lurch, and the railroads would become less valuable."

Dr. Bernard Hollanded, a well known mental specialist, performed an operation and found a morbid condition of the skull together with an excess of cerebro-spinal fluid; which prevented the arteries of the brain from pulsating.

KILLS ANTI-JAPANESE BILL

California Assembly Stops Legislation Upon Request from President.

HINDER TREATY PLANS

Action Was About To Be Taken on School Measure When White House Message came—Member Expressed Willingness to Trust the President and Governor.

Sacramento, Cal., Mar. 14.—President Roosevelt duly stopped all Japanese legislation in the California Legislature by the following telegram to Governor Gillette, who sent it to the Assembly:—

"Action of Legislature reported in this morning's papers most unfortunate in effect upon my efforts to obtain exclusion of Japanese laborers by friendly agreement, and if continued will probably render receipt of legislation of Congress for that purpose ineffective. Please secure suspension of further action until receipt of letter from me."

The Assembly intended to act at once on two bills and a resolution adopted by the Senate on Saturday. Governor Gillette sent with the telegram a message urging the House to comply with the President's request. The Assembly by a viva voce vote decided to take no action on the bills on file.

The Legislative action referred to by the President was the passage by the Senate of a bill limiting the age of children of all races to ten years when first entering primary schools, a measure prepared by the Japanese-Corean Exclusion League, submitting the question of Asiatic exclusion to a vote of the people against Japanese naturalization.

The message created momentary excitement in the lower house. Then Grover L. Johnson expressed his confidence in the Governor and the President, said the question should be left to them, and moved that the Assembly take no action on the Japanese question at this session.

The motion was carried without debate.

The wisdom of this course was shown when a report was received from the laboratory, where the brain of the cat had been examined microscopically and given the usual tests employed by Pasteur to determine the characteristic disintegration of the brain matter as it appears in hydrophobia.

The report was specific and positive in determining that the animal was suffering from rabies in its most violent and dangerous form.
