Impressive Ceremony When Announment Is Made-Royal Baby Pre' sented to State and Court Dignitaries by King-Queen Insists on Nursing Infant Herself-

Madrid, May 14 .- A whole city beude itself with delirions joy is the impression gained from the outward aspect of Madrid, A son has been born to the beloved young King and Queen, who miraculously escaped assassination together less than a year ago, and, humanly speaking a male successor to the throne of Spain s assured.

The event appeals to the sympathbegree difficult for outsiders to im-

sgine and impossible to limit. Of the genuineness of the enthusiasm woked by the auspicious occurrence there can be no more doubt than of the sincerity which marked the repicings of the people at the escape of the soverigns from the bomb in the Calle Mayor or of the demonstrations if loyalty since displayed on every ecasion of their public appearance a the capital or provinces.

The birth of an heir to the throne neans more to Spain than to perhaps my other great civilized nation, with he exception of Russia. For Spain so torn with the revolutionary, Carlist and Socialist fractions that vere there not a well recognized mecessor to the present head of the myal family sedition and revolution sould not only threaten the kingiom at the death of Alfonso XIII. nt even endanger the King's tenure in the throne while still alive, giving pe to claims of any pretender who | Cuts Off Index Finger of Right Hand ight thrust himself forward. Thirty Reported Killed And Many Injured.

Los Angeles, Cal., May 14 .- Thirty persons were killed and probably fifty injured in the wreck of the first and second sections of Northbound No. 21 and the Southern Pacific Rail\* road near Surf, a small station sixty miles north of Santa Barbara, at 2:05 o'clock Saturday afternoon.

When word of the accident was received at Shriners' headquarters here Alexandria, Masonic Temple and hotels were besieged by frantic friends, but little early information beyond bulletins was obtainable. The trains both bore hundreds of Shriners bound for San Francisco on their way home

The bulletins said that the first section ran into a boulder and that the second section plunged into the wreckage of the first and went over an embankment. Recent rains had dislodged several boulders, but all had apparently been promptly detect ed and removed by section forces.

The locomotive turned a somersault into the yielding sands. It tore up the track, twisting the hugo es and sentiment of Spaniards in a steel rails into fish hooks. The baggage car half buried inself in the sand on the right side of the locomotive. It was smashed almost to kindling wood. The dining car, in which were thirty-two persons eating luncheon, leaped into the air, and fell directly on the demolished locomotive. The rear coaches rushed on the first wreckage, jamming it on those who might otherwise have escaped.

#### INVESTIGATION OF GREAT LUM-BER TRUST.

#### Lumber Market is Controlled and Profits Are Enormous.

Washington, May 14 .- The great Lumber Trust has now become the target of the Bureau of Corporations. The most comprehensive investigattion yet undertaken will be made of this combination. If sufficient evidence can be collected prosecutions will be brought by the Department of Justice, says a special dispatch to the New York World.

The investigation is regarded as the most difficult yet undertaken by the bureau. More preplexing factors enter into this inquiry than into those of the Beef Trust and the Standard Oil Company.

Commissioner Smith will follow the same lines as those, adopted by Mr. Garfield in his investigation of the Standard Oil combination and the Beef trust. Special agents are now being sent into different sections of the country to gather data on production and on the restraint of competition.

In the mean time a preliminary inquiry concerning the prices of lum. ber has been concluded. It shows that during the past ten years the prices of all kinds of lumber has steadily increased and that the diminishing supply of timber is not alone responsible.

# PLAN OF LAZY CONVICT.

# to Escape Work.

nbus, Ohio, May penitentiary officials believe they have discovered the laziest man in the world in Albert Gornes, a convict serving five years from Franklin County, for burglary and larency.

In order to escape work Gornes de. liberately clipped off the index finger of his right hand with a pair of shears. This will class him among the infirm, and will entitle him to a light job at the worst, with chances favorable to his entire divorce from labor of any kind. Officers say, that Gornes has resorted to every other known means to escape work but without success.

# Bees Exterminating Bugs.

Lawrence, Kan., May 16 .- Professor S. J. Hunter, of the Entomological Department of the State University, who, for the past month, has been collecting and sending free to the farmers of the Southwest parasite bees to kill the green bugs that have been destroying wheat, received a telegram from Secretary his work.

Professor Hunter replied that he had distributed two thousand boxes containing the parasites to Kansas farmers with uniform good results, but that a larger fund was needed to make the work comprehensive and decisive. Reports from Texas and Oklahoma are that the bees have practically exterminated all the bugs in those States.

Corey wished to be married by an Episcopal clergyman, but one after another they refused his tempting offer to officiate.

When it looked as if a civil ceremony would have to be performed, one of Corey's friends telephoned that he had found a clergyman who was willing to tie the knot. He was the Rev. J. L. Clark of the Bushwick Avenue Congregational Church, Brooklyn, and the announement that he had consented to officiate came as a great relief to Corey and Miss Gill-

# WHEAT AT A DOLLAR.

#### Traders Try to Stem the Rush Upward, but Are Overwhelmed.

Chicago, May 15 .- Dollar wheat was ushered in in an outburst of the wildest and most spontaneous fever that has ever characterized trading on the Board of Trade. Heavy realizing sales pushed the price backward somewhat, but at the close the market was strong, and, according to the majority of speculators, the demand upon which the late advance had been made was still unsatisfied.

Before the expectant traders, huddled to the capacity of the pit, were fully awakened to the fact that the market had opened, the September future had been hoisted to \$1.00 1/2. and the December to \$1.03 a bushel. The moment \$1 was reached a wild shout was lifted. In the uproar the marker found himself unable to keep track of the jumbled trading. Consequently opening quotations were chalked officially as 95c. to \$1.00 1/2 for September and 96 1/2 c. to \$1.03 for December. July, the month in which the trade was chiefly interested, soared to 97c, in the moments of uncontrollable bullish fever.
