A New Orleans woman was thin. Eccause she did not extract sufficient

nouri.hment from her food. She took Scott's Emulsion.

Result: She gained a pound a day in weight.

ALL DRUGGISTS: 50e. AND \$1.00 KIPLING AND AMERICANS.

Says We Are the Finest People on Surface of the Globe,

Let there be no misunderstanding about the matter. I love this people. and if any contemptuous criticism has to be done I will do it myself. My heart has gone out to them beyond all other peoples; and for the life of me I cannot tell why. They are bleeding-raw at the edges, almost more conceiled than the English, vulgar with a massive vulgarity which is as though the Pyramids were coated with Christmas cake sugar works.

Cocksure they are, lawless and as casual as they are cocksure; but I love them, and I realized it when met an Englishman who laughed that they were all wrong, from the tariff to their go-as-you-please civil service, and beneath the consideration of a true Briton.

"I admit everything," said I "Their government's provisional; their law's the motion of the moment; their railways are made of hairpins and matchsticks, and most of their good luck lies in their woods and mines and rivers and not in their brains; but for all that they be the biggest, finest and best people on the surface of the globe!

"Just you wait a hundred years and see how they'll behave when they've had the screw put on them and have forgotten a few of the patriarchal teachings of the late Mister George Washington.

"Wait till the Anglo-American-German-Jew-the Man of the Future-is properly equipped. He'll have just the least little kink in his hair now and again; he'll carry the English lungs above the Teuton feet that can walk forever; and he will wave long, thin, bony Yankee hands, with the big blue veins on the wrist, from one end of the earth to the other.

"He'll be the finest writer, poet and dramatist, 'specially dramatist, that the world as it recollects itself has over seen. By virtue of his Jew true of all the demonstration blocks in blood-just a little drop-he'll be a musician and painter, too.

"At present there is too much balcony and too little Romeo in the life plays of his fellow citizens. Later on, when the proportion is adjusted and he sees the possibilities of his land, he will produce things that will make the effete East stare. "He will also be a complex and highly composite administrator. There is nothing known to man that he will not be, and his country will sway the world with one foot as a man tilts a seesaw plank."-From "American Notes."

I REEF CONT

Bonaparte Proposes Extreme Penalty.

THE LASH FOR OTHERS Secretary of the Navy Declares That Out Anarchy-Free Discussion of Is Necessary to a Free Country.

In a speech at Cumberland, Md., Secretary of the Navy Charles J, then run off and a fresh solution of on "Anarchism and Its Remedy," Bonaparte suggested the death penalty for Anarchists who seek to take life and whipping and imprisonment for less serious offences. He said:

'We must not imagine that the extradition of Anarchists will rid us of anarchism. A 'concert of the Powers' will not suffice to destroy Anarchism any more than the like 'concert' existing now for many years has sufficed to destroy them.

"In any event, to discourage or even forbid a free expression of pub-

Charles J. Bonaparte. lic opinion as to public men would certainly not destroy or even check

Anarchism. "There was and is much more to be said in favor of those restrictions on immigration which are intended from the house. to shut out foreign anarchists from our shores, and it was undoubtedly well to arm the Federal Executive with wider powers to deport or oth- in butter, but it was all in valn." erwise rid the country of disloyal or turbulent aliens, whether these call themselves 'Anarchists' or not.

"The fewer of such people we have in our midst the better, and, Buddha, and I knew how deeply you although I do not believe it will ever | two were interested in the same subprove practicable to slam the door in | ject." the face of anything like all of them,

MAKING SOAP. The Modern Process Much Like the

Old Time Method. Our great-grandmothers used to

make their own soup by the following process: A barrel was raised off the ground sufficiently high to allow a tab to be placed under it, and the bottom of the barrel was perforated with small holes. It was then filled with word ashes, and now and then a bucket of water was thrown on them, which found its way into the tub beneath. As the water percolated through the a es it dissolved the potash and soda which are always found in the ashes of plants, and thus a solution was attained which was put into an iron boller with a quantity of grease fat and the mixture boiled for an hour or longer. Salt was then added, and as the mixture cooled a solid layer of curd soap solidified on the top of the water. The modern process of soap making

is practically identical, only instead of ashes a weak solution of caustic soda These Are Only Means to Stamp or lye is used. Fats and oils are bolled along with this lye, and the mixture is kept constantly agitated. As Acts of Public Servants, He Says, the temperature increases stronger lye is used until the operation is completed. Salt is then added, and as soap is insoluble in sait water it rises to the top of the sola liquor. The lye is soda added, after which the soap is again bolled. The bollers are then left for several hours to allow impurities to settle, and the soap is finally run off into molds and cut into bars. Fancy soaps are generally made by

remelting ordinary soap and adding coloring matter and perfumes. Glycerin is an important byproduct of sonp making. Mostly all fats consist of glycerin and stearle acid. When they are boiled with soda the soda extracts the stearic acid from the glycerin, and the latter is run off with the soda liquor when the first boiling is completed, but it is subsequently recovered by distillation. - Minneapolis

Thought He Was a Butter Expert. At a party the hostess said to a guest: "I want you to entertain Mr. Blank a little. He looks bored to death. I will introduce him, and you must try to amuse him. You know his strong point is butter, on which he has written a book."

Journal.

The lady guest graciously undertook the task of entertaining the man, inwardly wondering that he should be so interested in butter-of which she knew very little-when his face indicated a mind given to much profound thinking.

However, with butter in view, she began on the weather, gradually got to the country, then on to a farm, from that to cows and at last to butter. The man looked more bored than ever, the magic word butter producing not the slightest effect, and he left her somewhat abruptly and soon withdrew

the hostess. "I went through agonies to prove that I was deeply interested

"Butter!" exclaimed the hostess. "What possessed you to talk to that man, of all men, on butter? I told you he had just written a book on

"I did my best," she explained to Ridge, Berwick and intermediate points as

from time as given above, commencing at

LEAF SPOT DISEASE.

h Attacks Apple Trees-Is Prominent

In Midsummer.

There are several species of fungi

that attack apple leaves, producing

brown, circular spots that range from

mere specks to spots one-fourth of an

mch in diameter and in some cases

case may begin to appear in the spring

soon after the young leaves unfold, but

the spots are usually more prominent

between midsummer and the end of

the season. This diseased condition

causes the leaves to drop prematurely.

frequently leaving the trees denuded in

UNSPRAYED APPLE LEAVES.

[Affected with leaf spot disease.]

before the normal period of leaf fall.

Trees thus deprived of their foliage

cease activity, and as a result the fruit

is small and not properly matured, the

buds for the crops of the following

year are weakened and in some cases

not fully developed, and the life of the

tree is materially shortened. These

leaf diseases are partly responsible for

the failure of the trees to produce crops

and for the early decline of the or-

One of the most striking results of

spraying an apple orchard is the effect

on the foliage. These leaf diseases are

largely prevented by applications of

bordeaux mixture, and the foliage re-

mains fresh and green long after un-

sprayed trees are defoliated. This was

the Ozarks during the past season.

The unsprayed trees began to shed

their leaves in July and were practi-

cally defoliated by the last of August,

a month before the time to pick the

crop.-W. M. Scott, Bureau of Plant

Braking on a High Load.

Teamsters and farmers who haul hay

on roads where a brake is necessary

will no doubt appreciate the idea em-

bodied in the following hint, credited to

a writer in the Prairie Farmer: So con-

struct a brake that it may be operated

from the top of the load of hay or for-

age. In order to do this build the

standard of the rack as high as the

chard.

Industry.

early autumn, six weeks or two months

much larger, as here shown. The dis-

load is liable to be. Secure a gas pipe or rod about one inch in diameter and fasten it in strap iron bearings on the standard. Surmount it with a small balance wheel keyed firmly. At the lower end of the rod attach a chain, which is passed over a pulley in the side of the bed and continued to the brake lever on the rear wheels.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hail's Catarch Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO. Toledo, O

Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Dr. William Henry Perkin,

who was knighted by King Edward, is one of the greatest chemists of Great Britain and is famous as the founder of the aniline or coaltar industry. He discovered the aniline colors in 1856 and through this discovery the dyeing industry has been completely revolutionized.

London's Social Climber.

The social climber in London must, says the Ladies' Field, start equipped with a mansion in one of the most fashionable West End squares, a place in the country, five motor cars, several horses and carriages, three tiaras and a very thick skin.

The labor members of the British farliament have resolved to begin a pro-Zulu campaign throughout the country. They hold that Natal and not the Zulu is responsible for the present rebellion.

Health Cult Unhealthy.

The pursuit of health, like the morphia habit or drunkenness, grows on people, till it really becomes a vice. Continuous thought, and anxiety about one's health is extremely bad for the constitution, and undermines it quicker than port wine .- The Queen.

At the present rate of consumption it is reckoned that the world's supply of coal will last 1,000 years. the kindred ready-made, furnished-The annual production amounts to 23,617,836 metric tons.

The negroes of Tahiti, one of the Society Islands in the South Pacific, play the flute with the nose instead of the mouth.

all that we can bar out will be so much gain. But, while we may thus reduce the number of our Anarchists, it is sadly certain that we cannot thus get rid of anarchism. We have now a homemade brand of the article, and, although the original 'plant' of this 'infant industry' was undoubtedly imported, the domestic product is large enough to gravely trouble us.

"On Anarchists the death penalty should be unequivocally imposed by law and inflexibly executed whenever the prisoner has sought, directly or indirectly, to take life. For offences of less gravity I advise a comparatively brief but very vigorous imprisonment, characterized by complete seclusion, deprivation of all comfort and denial of any form of distraction, and which could be to my mind advantageously supplemented by a sever but not a public whipping. The lash of all punishments, most clearly shows the culprit that he suffers for what his fellowmen hold odious and disgraceful, and not merely for reasons of public policy.

"Any abridgement from fear of the Anarchists of that freedom of speech and of the press guaranteed us by our State and Federal constitutions would be neither a wise nor a worthy policy; but these privileges in no wise shield counsellors of crime or instigators of disorder and rebellion.

"Any changes, however, sweeping. in our laws and government, however wild or grotesque, advanced to justify them, provided the method of change be orderly and lawful; but a published writing recommending the murder of the Chief Magistrate and the violent overthrow of the Government is a seditious libel at common law, and there is no good reason why public utterance of spoken words of the same purport should not be made a like offence by statue.

"The final and most truly vital condition of success in ridding our country of anarchism in practice is that American public opinion should recognize the utter emptiness, the inherent folly of its theory and of all while-you-wait schemes for the social regeneration of mankind."

the The Kind You Have Always Bought Bears the

And they said in chorus, "Crarlous!" 6:00 a. m. -Strand Magazine.

12:00 Feeding Dairy Cows.

Experiments have shown that 60 per cent of all the feed a dairy cow can eat is appropriated to sustain her body. If a cow is fed to 70 per cent of her capacity only 10 per cent of the ration can be used for milk production. Lib eral feeding is necessary, but its profitable extent depends on the individual animal. Successful dairying depends fully as much on the feeder as on the cow. A proportion of two-fifths roughage is widely and successfully used. Of course feed stuffs must be chosen to balance well and with an eye to their market value.-Farming.

Killing Goldenrod.

Years ago we bought a farm that had one field so thickly covered with goldenrod that ten acres would not have pastured a goose. There was absolutely no grass. We mowed it off and put about five sheep to the acre and fed enough wheat bran to keep them in a thriving condition, and the next season a finer blue grass pasture was never seen, says a writer in National Stockman and Farmer. They had killed "every last plant." The cows won't eat it, and it is fortunate that they will not, for if they did no use could be made of their milk, but sheep like it and will thrive on the young growth.

At Druggists, 25 cents, or mailed. Humphreys' Medicine Co., Cor. William and John reets, New York.

NERVOUS DEBILITY.

Vital Weakness and Prostration from overwork and other causes. Humphreys' Homeopathic Specific No. 28, in use over 40 years, the only successful remedy. \$1 per vial, or special package for serious cases, \$5. Sold by Druggists, or sent prepaid on receipt of price. Humphreys' Med. Co., William & John Sts., N. Y.
