OPERATED FROM WITHIN.

Apparatus Which Eliminates the Nuisance of Raising the Sash.

Every housewife would undoubtedly rejoice if her shutters were equipped with the device shown here, which permits of the manipulation of the shutters from the inner side of the house. The shutters can be opened or closed without the nulsance of raising or lowering the sash. As shown in the illustration, two horizontal slots are cut in the wooden sill. These slots are about an inch below the surface. In the inner corner of each slot is a pivot, to which is secured the rods attached to the shutters. The rods move freely in the slots in the sills. Projecting

SHUTTERS MOVED BY KNOB.

upward from the pivot is a stub, which terminates in a knob, so that the rod can be readily turned. To lock the rods in position pins are attached to the under side of the pivot the pins registering with holes in a plate beneath the pivot. A turn of the knob from the inside serves to move the pivot, which again operates the rods to move the shutters. The shutters can thus be adjusted to any point desired. There is no objectionable mechanism on the inside window frame, the knob being the only part which is exposed.

HOME COOKING.

Potato Apples.

Take two cupfuls of hot, finely mashed or riced potatoes mix throuch them two tablespoonfuls of butter, one-third of a cupful of grated cheese, half a teaspoonful of salt, a little cayenne pepper and grated nutmeg, two tablespoonfuls of thick cream and yolks of two eggs. Heat this up and shape in the form of small apples. Rell in flour eggs and crumbs. Brown in deep, hot fat.

Coffee Cake.

One cupful of sugar, three-quarter cupful butter, two eggs, one-half cupful molasses, one-half cupful cold coffee, two cupfuls flour, one small teaspoonful soda, one cupful of raisins, one cupful of currants, two teaspecufuls cinnamon, one teaspoonful of allspice, one-half teaspoonful ground cloves.

Berlin Salad.

Cut 6 large sardines in pieces and put in the saind dish. Then put over them a layer of peeled and sliced tomatoes, then a layer of cold thin sliced cucumber. Then cover with a little finely chopped onion; garnish the dish with crisp lettuce leaves, and just before serving pour over a French dressing.

How They Hate to Grow Old.

One of the things most apparent about the gallery at the women's tenhis tournament in Newport during the summer season is that the wives of millionaires and women with millions in their own right have not acquired the knack of growing old gracefully. Probably they never will for the simple reason that in their artificial world nothing is so tiresome as old age. The tennis tournament furnishes the first good excure for the gathering of the entire Newport colony, and there is mingled comedy and tragedy in the frequent sight of a woman on the dark side of 50 trying to look like a girl in her teens. Surely there has been a change since our grandmother's days, when nothing was venerated so much as white hairs. Still, the student of the time may console himself by asserting that "society is only a tiny part of our national body."

Beware of Cintments for Catarrh

That Contain Mercury, as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucors surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price, 75c.

Take Hall's Family Pills for constipation.

It builds new blood and tones up your nervous

ALL DRUGGISTS: 50c. AND \$1.00.

AMERICANS' COSTLY CURTSY.

One Girl Expended \$8,000 for Presentation at British Court.

More Americans, year by year, are eeking to be presented at the English court. Probably not even in the breasts of loyal subjects exists such a desire to curtsy to royalty as in those of the freest people on

It isn't the royalty they care a snap for, however, it is the chance to display their beauty and culture in costly garments.

The largest sum ever expended on a presentation outfit was paid by an American girl-it cost over \$8000. And this was 60 times as expensive as the cheapect possible outfit that may be worn with propriety on such an occasion.

Startling to even the swellest dressers in England, who spend large sums yearly to be presented at the court of St. James, was the record gown of this American girl.

The court gown alone cost \$7500. It was composed of white silk chiffon, embroidered with real seed pearls and moonstones, to represent lilies of the valley and white forget-menots.

The court train-every presentation dress must have a train-was composed of real lace, mounted over cooth of silver.

The lace for the lingerie was specially made at Honiton for the occasion. The petticoat was composed of rich brocade and hand-painted chiffon.

This peticoat alone-it cost \$140 was as elaborate as the average coort gown, and yet it could be seen by no one but the French maid.

The cost of the lingerie alone was \$150. The corsets cost \$52. The silk stockings cost \$37. Shoes made necessary an additional expenditure

For bouquet for the momentous occasion the girl sept \$80-it consisted of rare exotic flowers procured at great trouble.

For a real lace handkerchief, with which to dust her cheek every time King Edward happened to look in her direction, she paid \$50. Gloves made an item of \$16; a cloak \$250. How does this outfit compare with

the average worn by a woman in her great curtsying experience? Probably no two debutantes at the last reception given by King Ed-

ward and Queen Alexandra, a little while ago, solved the question in the same manner. The modest sum of \$5,000 is not considered excessive, even by some English women, for this single out-

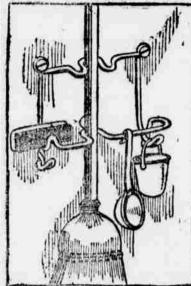

fit, but still there have been many cases where a woman spent but \$25 quite up to the standard.

There is a way of doing every-

thing. The dainty little debutante who some time ago spent but \$25 on her frock was able to save considerable by borrowing the train from a friend who was not to be presented this year.

For Kitchen Use.

A handy article for household use has recently been designed by a New Jersey man, an illustration of which is shown below. Its object is mainly to assist in preserving the old rule of "A place for everything and everything in its place." The busy housewife always gladly welcomes those contrivances which tend to cleanliness and tidiness. Very often she is greatly perplexed to know just

HOLDS NUMEROUS ARTICLES.

where to put the small necessary odds and ends where they can be conveniently reached . A holder like the one shown here helps to solve the question. This wire holder is small, and can be readily secured in convenient position. It provides a place for the broom, a cup or two. a brush and numerous other small kitchen utensile

Simple Device Which Does Away With Troublesome Hatpins,

The insensity of man is shown more to little things than in big ones. Not many years ago a mau-and he was a genius-advertised a new hat fastener for women's hats. Women were advised to throw away hatpins and send 10 cents for the fastener. In reply each purchaser received two rubber bands, with instructions to sew them on the hat and pull the bands over each ear. Since then nothing new in this line has appeared until now, the hat fastener shown in the illustration being the design of a Philadelphian.

COMBS SECURE HAT.

These fasteners consist of combs, one on each side of the hat, which slide in brackets attached to the underside of the brim of the hat. At each end of the brackets are study which protrude through the end teeth of the comb. These studs serve to guide the movement of the comb. in the center of each fastener is a clamp for adjusting and securely fas" tening the comb in position in the hair. Most men will at once declare these fasteners far superior, at least in appearance, than the unsightly hatpins.

HOUSEHOLD SUGGESTIONS.

To clean copper kitchen utensils -Wet a coarse cloth with hot water soap it well and apply to copper. Sprinkle powdered borax over it and polish with a dry cloth.

A scorch mark on linen, if not too brown, may be removed by moistening with water and laying in the sun. Repeat the moistening two or three times and the mark will disap-

To kill cockroaches-Put a mixture of flour and plaster of paris in places infested by cockroaches. The creatures will eat it greedily. The plaster of paris "sets" after they have eaten it and kills them.

Salt will do a great deal toward preserving the color in silk that is to be washed. Soak for a time in and still presented an appearance estate of Ellen E. Harvey, dec'd cold water, to which has been added a pinch of salt, and there will be very little danger of the color run-

Housekeepers should keep a box where the paraffin which is removed from the top of home-made jellies may be placed. This paraffin scrvants usually throw away, but if saved washed and melted it can be used on the jelly glasses in fall.

Holland's Brave Women

How much of her wealth and prosperity Holland owes to her women and children! While her men were away at the wars, or extending their possessions, or carrying their goods to all parts of the world in their stout ships, the women and children stayed at home and worked. They made lace, some of which was so fine and beautiful that it was sold to rich nobles for \$400 a yard. They spun cloth, red or black in color, very fine and soft, which they sold in many countries, using for themselves a coarse, cheap cloth called frieze which they bought in England. They made butter, too, of the best, and this they sold and the money was turned in for their country's use when it was needed.

Besides the lace, the women of Holland made linen from the flax which they grew in their gardens among the tulips and lilies. This linen was so choice that it was in great demand, and it became known by the name of "Hollands."

Loves of Famous Men.

Bryon was foolishly jealous of every woman he ever loved. His love ran well into two figures, and he managed sooner or later to make every one miserable.

Heinrich Heine, the poet, was also terribly jealous. One day he poisoned a parrot belonging to his ladylove for fear it should claim too much of her attention.

"The Rivals" is a true story of SherMan's courtship, the character of Lydia Languish in the life play being taken by Miss Lindley, who afterward became the author's wife.

Thomas Moore was always in love. It one looks through his poems one may find the names of some sixteen different ladies to whom he swore eternal fidelity.
