

WASHINGTON

From our Regular Correspondent. Washington, D. C., Dec. 9, 1907. When the Sixtieth Congress met last week it was with the increase of approximately fifty Democrats in the House and two Democrats in the Senate.

Because of the death of the two distinguished Senators from Alabama, John T. Morgan and Edmund Winston Pettus, there was a somber tone injected in the opening proceedings of the Senate and both houses adjourned as a mark of respect as soon as they had completed their organization.

On Tuesday the President's message came in to Congress and was listened to with attention. It is a noticeable fact that the Republicans in Congress are thoroughly disgusted with their President and few of them had a good word to say of his message.

There seems to be something in the atmosphere which is provocative of rows. It was only last week that Mr. Bryan and Senator Daniel of Virginia had a row in one of the leading hotels.

Whatever may or may not be the result to the country, it is perfectly evident that the Republican leaders have no intention of passing any financial legislation at the dictation of the President.

How's This?

Girlhood and Scott's Emulsion are linked together.

The girl who takes Scott's Emulsion has plenty of rich, red blood; she is plump, active and energetic.

The reason is that at a period when a girl's digestion is weak, Scott's Emulsion provides her with powerful nourishment in easily digested form.

It is a food that builds and keeps up a girl's strength.

SCIENTIFIC BURGLARY.

An enterprising burglar in Germany has brought science to his aid and has the loot to show for it. But he is keeping himself and the loot well concealed. With a can of oxygen and some calcium carbide the criminal rigged a blowpipe with which he fused the steel fastenings of a safe and made off with its contents.

The silly Brownsville inquiry which Senator Foraker brought about with the sole hope of injuring the President and Secretary Taft is rapidly coming to a close with just the result that was to have been expected.

The Republican National Committee is meeting here this week to select a place and time for the convention. It now looks as if Chicago would be the place and the middle of June the time.

She Had No Faith in Banks.

Induced to leave her home at Stanford, Conn., on the pretext of visiting a sick person, Mrs. Antonio Arimaska, an elderly woman, was escorted to a lonely part of the city late on Monday night by two men and robbed of \$600 which she carried in her bosom.

Robbers and bunco men are taking advantage of such "knowing" ones to rob or swindle them out of their hard-earned savings.

The next stage is that "At meals there ought to be a cessation of all unpleasant discussion—in fact, the less said the better. So, when assembling food and drink, we should, as far as in our power lies, have congenial surroundings, and think our highest thoughts, and in this way salt our bread with our own best ideals."

"Human singing, particularly when combined with droning music, is a powerful means of getting at the B, and producing a highly suggestive state."

CORPORATION REGULATION OF MANNERS.

Railway companies now prescribe the kind of neckties conductors and trainmen shall wear. Business houses in Chicago and elsewhere make drinking and race-track betting ground for dismissal.

For a free people we put up with a good deal of regulation. But what critic can truthfully charge us with deterioration in morals and manners when corporations take on themselves the former duties of Sunday school teachers and professors of polite deportment?

One important difference, between the automobile and the horse is that the latter can exercise a veto power over a reckless driver.

LONGEVITY AND SOLAR PLEXUS.

By Cultivating This Important System We May Live Forever. Dr. Cornwall Round, a medical practitioner in London, claims to have discovered how to live forever—barring accidents. As he is only 40 years old himself it cannot be said that in his own person he offers even presumptive evidence of the truth of his theories.

He tells how to do it. Firstly, there is the cultivation and the training of the solar plexus. Concentrate your mind on the plexus, think hard of something, and that something will happen.

These three states of consciousness correspond exactly with three primary colors—namely S—blood-red; I—yellow sunlight; and O—true blood.

That seems very easy. And so does this: "Human singing, particularly when combined with droning music, is a powerful means of getting at the B, and producing a highly suggestive state."

Then, from eating, the author proceeds to smelling. "Smells," he says, "among all our senses, seems to be one that has the longest memory for associated ideas. Thus we can also make the sense of smell an avenue for healthful impressions by mentally connecting some chosen ideals with a particular odor."

"HEALTH IS NATURAL"

What could be simpler or surer than that? Or this: "Write or have printed in large white letters on a black ground: 'I feel and look YOUNGER Every Day!'"

To The King's Disadvantage. When King Edward agreed to place the hereditary revenues of the crown at the disposal of the nation he made a bad bargain. Instead of the revenues, he agreed to accept a clear yearly sum of \$2,350,000 and the nation is making a profit on the bargain. It amounted to \$112,500 last year and is increasing.
