Postcards To Dogs Now. Picture postcards are being sent lo pet dogs on the continent. A young

woman residing in one of the lead. In hotels in Ostend introduced the full time. The postcards are inscribed the dog's name, and addressed of the owner.

> wise man makes few promises aks none possible of ful.

#### \$100 Reward, \$100,

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Make him a Scott's Emulsion baby.

Is your baby thin, weak, fretful?

**@**\$

Scott's Emulsion is Cod Liver Oil and Hypophosphites prepared so that it is easily digested by little folks.

Consequently the baby that is fed on Scott's Emulsion is a sturdy, rosycheeked little fellow full of health and vigor.

ALL DRUGGISTS; 50c. AND \$1.00.

MOVING PICTURES IN ITALY.

The Residents in That Land Are Surfeited With Dancing Women.

Milan, the centre of Italy for the moving picture machine trade, has already about forty such theatres. Every available hall is being turned | cigar he can stare at a wall two or into a moving picture show, while nearly every second and third rate theatre and "cafe chantant" finishes the evening's performance with a few cinematograph pictures. During the dull summer season even the larger theatres are used-

Dramatic and tragic scenes, natural scenery of an interesting nature, and comical farces are sure to fill the ball at any time in Italy. The Italian loves to see living scenery; for instance, a moving picture view of Ni. agara Falls was a huge success here a short time ago. The Italian also likes to see typical scenes of national life, such as for instance, bull fights in Spain and winter sports on the snow and ice in Switzerland. Railway scenery is very acceptable, as are views of large towns. Pictures of the larger towns of the United States would be a huge success in Milan. Occasionally typical scenes from American life have been thrown on the sheeting, such as cowboy life and train wreckers. The Italian is disgusted, if not already surfeited, with pictures of singing and dancing women, neither does he like fantastical scenery from fairy tales.

Plentiful Game in Germany. Half a million sportsmen in Germany, kill annually 40,000 head of red and fallow deer, 200,000 roebuck, 4,000,000 hares, 4,000,000 partridges and 400,000 wild duck, in all some 25,000,000 kilograms of wild game of a value of 25,000,000 marks, or \$5,-000,000, forming nearly 1 per cent of the total meat supply of Germany.

Tobacco in the Philippines. , ohecc) is the fourth largest ex. port of the Philippines, while in point of total crop value it is only exceeded by hemp and rice. The main tobacco belt is embraced in Luzon, Cebu and Panay, the famous Cagayan Valley, in Luzon, producing the bulk of the finer grades. Con. sidered as a manufacture the making of cigars and cigarets is the largest industry in the island today.

12,000 Miles For \$15.

What is probably the cheapest rate for a sea voyage ever offered is that now made available by the Govern. ment of New South Wales, Australia, to young women who are prepared to go out to the colony to undertake domestic service. The charge to these emigrants for the journey from England to Sydney, 12,000 miles, is \$15.

U. S. Behind in Aeronautics.

That the Government and the people of the United States are lagging far behind the European countries in the matter of aerial navigation is the opinion of Major Henry B. Hersey, chief inspector of the Government Meteorological Service. He urges that an aeronautical department be established by the Government to keep pace with the European Pow-

There Were Other Pockets. Nathan Straus was driving his mare, Ida Highwood, on the New York speedway. A company promoter, noted no less for his wealth than his unscrupulousness, dashed by and Mr. Straus said: "There is Blank. When he came to New York in the seventies he had only a dollar in his pocket." Mr. Straus paused and smiled. "However," he said, "there were other pockets."

Burdett's "Owl Nest." George A. Burdett, the noted Boston composer and organist, and dean of the New England chapter of the American Organists' Guild, does all his work in a little room at the top of his house, which he calls "owl nest," in which is a plane and all sorts of things calculated to appeal to the musically inclined.

CASTORIA For Infants and Children. The Kind You Have Always Bought

 .tover in the Limelight.

Jesse Grant, the third son of the great general, is a quiet man, who spends most of his time in New York and is never in the limelight. He does not work, and belongs to two or three clubs. He says he is a splendid "loafer," and if he has a good three hours and be quite happy.

"Barefoot Brigade."

In Paris a "barefoot brigade" is trying to make converts. Their chief is a painter of talent, who believes that going barefooted is absolutely essential to health. In his studio he wears no foot covering of any kind, and when he is out he wears specially made shoes which are perforated so as to allow free access to the air, water and snow.

"Bob" Nearly Perfect,

Guton Borghum, the sculptor, says that Robert Fitzslmmons is one of the best spemimens of physical manhood in the world, and by far the most perfect representative of the fighting man that this age has pro-

Caine an Extensive Landowner.

Hall Caine is an extensive Manx landowner, possessing several large farms, having successfully relaimed tracts of bog land in the vicinity of Sulby, which have been brought under profitable cultivation.

"Birth-day Honors."

Four peers, 11 baronets and 33 knights were created by the King of Great Britain on his last birthday. Nominally, the King did it; in restity, the Liberal ministry did it, the "birthday honors" being one of the perquisites of office.

Celebrating Her Mother's Birthday. A woman 71 years old, accused at Feltham, England, of intoxication and disorderly conduct, said she had been "keeping up" her mother's birthday. Her mother was 98.

Cremation in the Alps. Cremation makes great headway in the Alps. Geneva takes the lead, both in point of number and equipment. but Zurich, Aareu, Berne and Laus, anne are each building a second crematorium. Five other towns are doing !ikewise.

Defied Superstition.

Defying superstition the Herald of Slatington, Pa., began publication as weekly on Friday, September 13. The first copy was taken from the press at 13 minutes before 5 o'clock, in the presence of 12 witnesses.

It is not generally known that s spoonful of ox-gall in one gallon of water will set the colors of almost any goods which are soaked in it before washing; also, that a teacupful of lye in a pail of water will improve the color of any black goods. Vine. gar in the rinsing water will bright. en pink or green calico, and soda will do the same for purple or blue calico.

Scheme to Ilrrigate Sahara. Proposed schemes to irrigate the Desert of Sahara are said to be impracticable because of the great depth of the overlaying deposit of sand.

He who is not afraid to die is

FOUR INDIAN TRIBES.

The Cherokees Are the Most Advanced in Civilization.

The Cherokees, who tracked De Soto's footsteps for many weary days while he was marching through the Southern forests and swamps and who later welcomed Oglethorpe to Georgia, are the most advanced indians in civilization and the most eager for education, epending \$200,000

a year on their schools and colleges. The Chickasaws have five colleges, with 400 students, maintained at a yearly cost of \$47,000. They also have thirteen district schools, costing \$16,-

The Choctaws have 150 schools, in some of which the higher branches are taught.

The Seminoles, one of the smaller tribes, have ten colleges and sixty. five common schools, with a total attendance of 2,500.

Nests of the Golden Eagle.

Every pair of eagles whose habits I have had an opportunity of watch. ing over a period of a few years would seem to have invariably at least two alternative sites for their nests; some have three, and I know of one with four sites. In fact, I only know of one pair out of many which habitually resort to but one place and

The reason for this is, however, apparent, for owing to its situation it has never been disturbed. The nest is in a small cavern on the face of an absolute wall of limestone rock some 800 feet high, at about 400 feet from the summit. Above the cliff is a talus of loose stone at an angle of 45 degrees or so, above which again rise other precipices. To reach the nearest point above this nest would be a long day's work.

The Double Canals on Mars. For the first time the much\_discuss\_

ed double canals on the planet Mars have been caught on a photographic plate. Professor David Todd of Amherst College did it, 15,000 feet above sea level in the Chilean Andes, with his fine celestial camera, made by Gaertner of Chicago, especially for the college telescope, which has an object glass 18 inches in diameter, and is the largest ever used in the Southern bemisphere.

Joke on Governor Hoch.

There seems to be a joke on Gov. ernor Hoch of Kansas. He appoint. ed J. E. Wade of Cloud County a member of the Farmers Congress, "reposing special confidence in his ability and integrity," etc.; but it turned out he was in the penitentiary digging coal. Wade was the default\_ ing treasurer of Cloud County, but was a prominent and respected stock. man when Hoch knew him.

Has the Freedom of Morocco. At least one European has the freedom of Morocco without danger of molestation or capture. Mme. Du Gast, a pretty society woman of Paris, who had visited the country be\_ fore, was commissioned sometime ago by the French Government to investigate and report on the agricul. tural resources of Morocco. She has made many journeys into the interfor, being furnished with escorts sometimes by Raisuli, the famous bandit; sometimes by the pretender Muley Mohammed, and occasionally by the Sultan himself.

Rattles of the Rattlesnake.

The rattles of the rattlesnake, lie edgewise. It is evident that they must do so, inasmuch as they are but continuations of the backbone. The snake carries the rattles on the ground except when he raises them to sound his warning. This will be evidenced by the fact that in every snake of any size that is killed the rattles are worn through on the under side:

Mr. Jacob A. Riis tells of a little boy who earned his living by blacking boots. Every Sunday he attend. ed a mission school. This school, through its well-meaning teachers, decided to have a Christmas tree. The gifts for the pupils were provided for them by the teachers and some pat. rons of the school.

Jimmy, the bootblack was there Christmas Eve, but was much dis. appointed when his present proved to be a copy of Browning's poems. He folded it carefully in the paper in which he received it, and took it

The next Sunday the superintendent of the mission school announced that any child who was disappointed with his or her gift could exchange it. Jimmy marched boldly to the front with his.

"What have you there, Jimmy?" "Browning, sir." "And what do you want in ex-

change?" "Blacking, sir."

Queen of Siam's Jewels. The Queen of Slam possesses the finest collection of jewels in the world.

The walls of her bed chamber are literally ablaze with precious stones. while in a safe in her Majesty's apartments are diamonds, rubles, pearls and emeralds fashioned into quaint necklaces of fabulous value. One little article alone, intended to serve as a thimble, is in the shape of a lotus flower and is valued at £ 15,000.

Only those things that are put into living are learned.
