25 Knittle, Daniel, merchant, Cata, T.,
26 Kelchner, John W. mould, Berwick A woodsman friend of mine who lives marriage of a member of the expedition which found (and immediately thereafter forever lost track of) the famous Long Tinker's mine, the story of which was told at length a little more than a year ago.

The writer visited him yesterday in his home at the foot of the Timp Pass, and in the course of a conversation about a fine raccoon the Doodletown hunter had just brought in was informed of the bobcat episode.

"The boy shot a link on the mounthin early last January." he said, 'an' not long ago He gold him fur \$25 to a man at Tompkins Cove, who had him stuffed. It was a yearling kitten, an' when the boy brought him in I seed it was thin and poorly from the hard feedin' of winter, but even then it weighed forty-five pounds. If it hadn't been so poorly it'd weighed seventy five pounds.'

Any one who doubts this story may easily obtain proof of its genuineness. This bobcat happened to be shot just south of the Orange county line, but my informant asserts that a friend of his hid an encounter with one last summer near Fort Montgomery -W. T. H. In New York Sun.

Making Precious Stones.

After describing how diamonds may be made by the employment of tremendous pressure, Henry Smith A illiams in an article on modern chemistry in "Everybody's" says:

ners and Be a True Children. " we the subject of the Rev. Lienry 344-Hanson's sermon at 51, isone's link eran church, Allegheny. He said a strange misconception was prevatual regarding the relation between plety and prosperity. Not all was success that seemed such, as not all was failure that seemed failure. he instanced Nebuchadnezzar at the height of his power, still far from the heights to which he might have obtained and, on the other hand. Moses dying in sight of the promised land; the prophets tolling ana pleading, only to die with all their dreams unrealized; Christ moving among the sons of men in all the beauty of a sinless glory only to die upon the cross. The true measure of success depended not upon what we had, but what we were.

PIETY AND PROSPENITY.

To be a Christian in life meant to bring down the noble impulses and principles revealed to us in the life and teaching of Christ into our daily thought and duties. Continuing the preacher said:

Any man who is engaged in a business directly or indirectly into which he cannot infuse these exalted ideals had better leave it. If your business unmans you, leave it-for what doth it profit a man if he gain the whole world and yet lose his self-respect and his soul?

It is possible to bring these ideals into our business life and achieve success? Even in the eyes of the world, honesty, manliness and Christian virtue are possessions recognized and admired. There has never been an age when sinverity and high Christian honor have had grander opportunity awaiting them. No matter what be your walk in life, to make the best man that you can be to all that God intended you should be, you must take religion into every phase of your work.

"I see no reason why ones' piety should be an obstacle to one's prosperity, but I see many reasons why true piety should bring the highest prosperity. Plety and goodness are not a weight, but a power -they do not hamper, but they lift men higher.

The Uses of a Husband.

Vira, the Morses's sable cook, announced to her mistress that she intended to be married the next week-Mrs. Morse was filled with regret. "Oh, Vira," she cried "I was afraid. Wiiliam would persuade you at last-You said you'd never leave us."

"Why, I isn't gwine to leabe you, honey," and Vira patted the shoulder of her young mistress in a comforting way. "I's jes' nachelly marrying dat William now to keep him from pestering me. He's been roun' too much lately, an' yet if I cas' him off, he'll get into mixtrious comp'ny. I's marrying dat boy to sabe him." "Yes," said Mrs. Morse, somewhat reassured by Vira's tone, but slightly bewildered, nevertheless, "I know it will be a fine thing for him. Vira, but won't he want to take you away?" "Whar he get de money?" inquired Vira, returning to her work of beating eggs with renewed vigor. "I's sabed

and cut out with a cover or saucer in form of turnovers and use the following filling: One egg. 1 cup sugar, 1 cup chopped raisins, little salt. grated rind and juice of 1 lemon. Put tablespoonful in each turnover

Perhaps one of the most curious remedies ever involved to offset seasickness was the piece of churchyard turf that the Fins once believed to be a certain preventive.

So f.r the census of living cresures who inhabit the deep sea has amounted to something over 100,-000 different kinds.

Crabs chew their food with their legs.

\$100 Reward, \$100,

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the pa-tient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

facturing relatively large gems of other kinds-rubles, sapphires, emeralds, the Oriental amethyst, and the Oriental topaz-has yielded its full secret to science.

"Just as the brilliant diamond is only a particular state of so familiar and inexpensive substatice as carbon, so these sister gems-some of them even exceeding the diamona in value, weight for weight-are merely crystalline forms of the clayey earth alumina-a compound of aluminum and oxygen.

"If no coloring matter is preseent, this crystal is called a white sapphire. Usually, however, a trace of some chromium or cobalt salt he found, and then the gem becomes a true sapphire, a ruby, an amethyst, an emerald, or a topaz, according to color.

"Gems of the true sapphire order are manufactured by bringing alumma to a liquid state, through the agency of extreme heat; the gems crystallize from the solution on cooltog.

"Unfortunately the gem thus formed breaks into fragments when touched; but the fragments are still or marketable size; and true rubles and emeralds thus manufactured have now entered the field of commerce."

"There are many women to whom an automobile appeals simply as a means for getting there, but there are a great number who are beginning to wonder if the high-priced authority at the steering wheel migh. not be dispensed with and the feminine brain succeed in grasping the knowledge necessary to operate a car. To these women I would say from experience that there is no more delightful way of spending

one's hours than in learing to run and take care of an automobile, and that it is by no means so difficult as one would suppose.

"As soon as she knows enough about her car as to feel confidence in going out alone with it, and especially to make an intelligent diagnosis of the reason for its occasional bad behavior, she will get more fun out of her machine than she ever had befere."-Hilda Ward 1 nSuburban Life for November.

Get Their Living by Dying. "In Chine, fear friends," said absent-minded missionary, the 'human life is regarded as of but slight value. Indeed, if a wealthy Chinese is condemned to death he can easily hire another to die for him; and I believe many poor fellows get their living by thus acting

s got his plans all laid out fo' him. He's got a ticket out to Californy an' to bring my ole farder back Eas'; an' den I's gwine send him down Souf fo' my sister, an' den up in Canady fo' my brudder, an' when he gets dat fam'ly all rounded up an' has to suppo't 'em mostly, you t'ink he's gwine be in a hurry to hab me to suppo't honey?"-Youth's Companion.

The President Makes Hay. Senator Knox told this story at the Elks convention in Philadelphia: A delegation from Kansas visited President Roosevelt at Oyster Bay not long ago. The President met them with coat and collar off, mopping hic brow.

"Ah, gentlemen," he said, "delighted to see you. Dee-lighted. But I'm very busy putting in my hay just now. Come down to the barn with me and we'll talk things over while I work."

Down to the barn hustled President and delegation. Mr. Roosevelt seized a pitchfork and-but where was the hav? "John!" shouled the President.

"John- where's all the hay?" "Sorry, sir," came John's voice from

the loft, "but I ain't had time to throw it back since you threw it up esterday's delegation." - Everybody's Magazine.

every respect, their humps being simply padding and framework strapped upon their shoulders. One such was recently exposed and punished summarily.

A rumor had spread among the gaming fraternity that he was a fraud, so one of his patrons, instead of patting him gently on the back as usual, gave him a resounding thwack, which effectually dislodged the bogus hump.

Having thus effected a record quick cure, the gamesters determined that their patient must also take the waters in the lake of the Casino gardens in case he should have a relapse.

After a lengthy dip he was so thoroughly cured that he left Monte Carto never to return. But there are still bogus mascots at the doors of the gaming hall, and there always will be till the foolish superstition dies out ---Answers.

In Preston, England, the power generated by the burning of the city's waste sufflices to operate the electric raftways.

Dover, England, will have a new harbor, which will be completed in 1910, when it will accommodate 59 men of war.
