

HOW WALL STREET STARTED.

Defense, Was Origin of the Best-Known Thoroughfare in America.

On the morning of March 31, 1644, a man of clerical appearance might have been seen standing at the entrance to the dilapidated fortress of New Amsterdam...

The man at the fort did not, however, waste much time in gazing at these discouraging surroundings. They were familiar to him in every dreary detail...

Van Tienhoven's handwriting was easily read. Indeed, good penmanship was the only qualification he had ever displayed for his office...

It was not long, therefore, before the colonists were hard at work at the projected cattle guard...

If You Want to Be Loved.

Don't contradict people even if you are sure you are right.

Don't be inquisitive about the affairs of even your most intimate friend.

Don't underrate anything because you don't possess it.

Don't believe that everybody else in the world is happier than you.

Don't declare that you have never had any opportunities in life.

Don't believe all the evils you hear.

Don't be rude to your inferiors in social position.

Don't repeat gossip even if it does interest a crowd.

Don't jeer at anybody's religious belief.

Candle Grease.

Lay out the garment, put a blotter (common white blotter) on the under side below point where the spot is...

Germany's Hunters.

Consul Ifft of Annaberg reports that 600,000 hunting permits are issued every year in Germany.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease...

F. J. CHENEY & Co., Props., Toledo, O.

Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

DR. HUMPHREYS' SPECIFICS.

Directions with each Vial in Five Languages: English, German, Spanish, Portuguese and French.

- No. FOR Price 1. Fevers, Congestions, Inflammations... 25 2. Worms, Worm Fever, or Worm Disease... 25

A small bottle of Pleasant Pellets, fits the vest pocket. Sold by druggists, or sent on receipt of price.

MEN THAT ARE POISONOUS.

An Experiment That Convinced an Inveterate Cigarette Smoker.

"You smoke 30 cigarettes a day?" "Yes, on the average."

"Yet you don't blame them for your run-down condition?" "Not in the least. I blame my hard work."

"The physician shook his head. He smiled in a vexed way. Then he took a leech out of a glass jar."

"Let me show you something," he said. "Bare your arm."

The cigarette fiend bared his forearm, and the other laid the leech black leech upon it. The leech fell to work busily.

"That is what your blood did to that leech," said the physician. He took up the little corpse between his finger and thumb.

"Quite dead, you see. You poisoned it."

"I guess it wasn't a healthy leech in the first place," said the cigarette smoker sullenly.

"Wasn't healthy, eh? Well, we'll try again."

And the physician clapped two leeches on the young man's arm.

"If they both die," said the patient, "I'll swear off—or, at least, I'll cut down my daily allowance from 30 cigarettes to 10."

Even as he spoke the smaller leech shivered and dropped on his knee dead, and a moment later the larger one fell beside it.

"This is ghastly," said the young man. "I am worse than the pestilence to these leeches."

"It is the emphysematic oil in your blood," said the medical man. "All cigarette fiends have it. Smoke reasonably, and this oil will disappear, and you will be no longer deadly to the leech."

Furthermore, your appetite will return, you will sleep better, and your muddy color will clear up. It is not hard work but hard smoking that has brought these troubles down on you."

"Doc," said the young man, regarding the three dead leeches thoughtfully, "I half believe you're right."

Follow Instructions.

A prominent physician tells of an amusing experience of the early days of his practice when he was residing in a small town where by far the majority of the workers were coal miners.

"I was greatly distressed by the unsanitary conditions prevailing in their cottages," says the doctor, "and among other things I tried to explain to each household the importance of maintaining a wholesome atmosphere in their sleeping rooms."

"I laid in a stock of thermometers, where they were most needed. I took pains to point out to each family in turn just how the thermometer would indicate the proper degrees of temperature."

"As I was making the rounds one day I inquired of the woman head of one establishment whether she had followed my instructions."

"Yes sir," answered she. "I'm very careful about the temperature. I watch the thing all the time as it hangs up there."

"What do you do when the temperature rises above 68?"

"I take it down, sir, an' put it outside till it cools off a bit."—Modern Society.

NEST OF EAGLES.

It Was Discovered on the Famous Frankenstein Ledge, Crawford Notch.

More eagles have been seen in and about the White Mountains in New Hampshire recently than since early pioneer days and the only nest of the national bird known in New Hampshire was discovered on the crest of the famous Frankenstein ledge in Crawford Notch.

The species is the bald eagle of the mountains, from which the traditional emblem of the United States was designed, but it is not garbed so extensively in trowsers as represented by artist Saint-Gaudens's bird on the new gold coins.

Certain portions of the White Mountains afford a natural habitation for the eagle, the numbers of which have largely increased since the stringent game laws of the state prevented the general rifle shooting which once prevailed, especially throughout the "north country."

The nest of Frankenstein ledge was located by men in the employ of Charles H. Morey of Bemis. They were attracted by a pair of large eagles flying about in evident anger and distress, and they searched for the nest till they found it in a cleft in the rocks on the highest point of the cliff. There was an almost perpendicular rise on all sides to reach the break, and the birds evidently supposed the site to be beyond molestation.

Several younger eagles were seen in the vicinity, but they were all beyond the age requiring the fostering care of the older birds, and hustled across the notch to get away from the intruders.

The older birds, however, hung about the lumbermen and showed evidence of a willingness to take part in a mixup if too serious danger threatened their home in the rocky cleft.

The men got near enough the nest to note the general characteristics of its construction, but no attempt was made to despoil it, and those who have since been to the spot, say that the birds have returned to their abode and are now living in comfort.

The locality of the nest is almost inaccessible, except to the most hardened woodmen and mountain climbers but it may easily be found by those who have the fortitude to attempt the climb up Frankenstein ledge.

It is several years since any of the birds have been shot in northern New Hampshire, although numbers frequently have been seen about Lake Winnepesaukee in the summer. Rattlesnake Island is a favorite feeding ground for them until the snakes hibernate. The island is made up of ledges and is reputed to be the home of thousands of reptiles. It is one of the few bodies of land in Lake Winnepesaukee which does not boast summer cottages or camps.—Boston Herald.

Chinese Weights and Measures.

The measures and weights which were in vogue in the reign of King H. early in the present dynasty, are again to be put in force in China with slight modifications.

Pumice Stones.

Pumice is a mineral, agreeing in chemical composition with obsidian, of which it may be regarded as a peculiar form, rapidly cooled from a melted and boiling state, and it generally contains some prophery.

The stone is very hard, and at the same time very brittle, but its most singular property is that of floating on water. In the arts it is used for polishing wood, ivory, metals, glass, slates, marble and lithographic stones, and in the preparation of vellum, parchment and some kinds of leather.

By Astronomer Discovers Comets.

With only a home-made telescope J. E. Mellish of Cottage Grove, Wis., a farmer's boy scarcely out of his teens, and having only a country school education, has discovered two comets and attracted the notice of the astronomical world. Prominent scientists have become interested in him, and opportunity has been made whereby he can pursue more effectively the study of his favorite science.

At the last general election in New Zealand there were 263,597 men and 212,875 women on the roll. There actually voted 221,611 men and 175,846 women. In 14 contests the women voters outnumbered the men. Of the candidates elected in these 14 constituencies only one was unmarried.

BIG OFFER

To All Our Subscribers

The Great AMERICAN FARMER

Indianapolis, Indiana.

The Leading Agricultural Journal of the Nation. Edited by an Able Corps of Writers.

The American Farmer is the only Literary Farm Journal published. It fills a position of its own and has taken the leading place in the homes of rural people in every section of the United States.

Every Issue Contains an Original Poem by SOLOM GOODE

WE MAKE THE EXCEPTIONAL OFFER OF Two for the Price of One: THE COLUMBIAN

The Oldest County Paper and THE AMERICAN FARMER BOTH ONE YEAR FOR \$1.00

This unparalleled offer is made to all new subscribers, and all old ones who pay all arrears and renew within thirty days. Sample copies free. Address:

PENNSYLVANIA RAILROAD

Bulletin.

JUNE ON THE GREAT LAKES.

Restful, delightful, interesting, and instructive, there is no trip like that on the Great Lakes; those inland seas which form the border line between the United States and Canada.

For comfort the fine passenger steamships of the Anchor Line have no superiors. As well-appointed as the palatial ocean greyhounds which plow the Atlantic, their schedule allows sufficient time at all stopping places to enable the traveler to see something of the great lake cities and to view in daylight the most distinctive sights of the lakes, and the scenery which frames them.

The trip through the Detroit River, and through Lake St. Clair, with its great ship canal in the middle of the lake, thence through Lake Huron, the locking of the steamer through the great locks at the Soo, and the passage of the Portage Entry, lake and canal, across the upper end of Michigan are novel and interesting features.

The voyage from Buffalo to Duluth covers over eleven hundred miles in the five days' journey. Leaving Buffalo, the steamships Juniata and Tionesta, make stops at Erie, Cleveland, Detroit, Mackinac Island, the Soo, Marquette, Houghton and Hancock, and Duluth.

The 1908 season opens on June 16, when the Steamer Tionesta will make her first sailing from Buffalo.

The Anchor Line is the Great Lake Annex of the Pennsylvania Railroad, and the service measures up to the high standard set by the "Standard Railroad of America."

An illustrated folder, giving sailing dates of steamers, rates of fare, and other information is in course of preparation, and may be obtained when ready from any Pennsylvania Railroad Ticket Agent, who is also prepared to book passengers who may desire to take this trip through the Great Lakes and back.

6-11-18.

Columbia & Montour El. Ry.

TIME TABLE IN EFFECT June 1, 1904, and until further notice.

Cars leave Bloom for Espy, Almedia, Lima Ridge, Berwick and intermediate points as follows:

A. M. 5:00, 5:40, 6:20, 7:00, 7:40, 8:20, 9:00, 9:40, 10:20, 11:00, 11:40.

P. M. 12:20, 1:00, 1:40, 2:20, 3:00, 3:40, 4:20, 5:00, 5:40, 6:20, 7:00, 7:40, 8:20, 9:00, 9:40, 10:20, 11:00.

Leaving depart from Berwick one hour from time as given above, commencing at 6:00 a. m.

Leave Bloom for Catawissa A. M. 5:00, 6:15, 7:30, 8:00, 9:00, 10:00, 11:00, 12:00.

P. M. 1:00, 1:20, 3:00, 4:00, 5:00, 6:00, 7:00, 8:00, 9:00, 10:20, 11:00.

Cars returning depart from Catawissa 20 minutes from time as given above.

First car leaves Market Square for Berwick on Sundays at 7:00 a. m.

First car for Catawissa Sundays 7:00 a. m.

First car from Berwick for Bloom Sundays leaves at 8:00 a. m.

First car leaves Catawissa Sundays at 7:30 a. m.
