WHAT TO WEAR AND HOW TO WEAR

Our Special Correspondent Writes Entertainingly to Women.

FROMTHEMBTROPOLIS

BY JULES THEROW.

the small girl is having her inring this summer in the game of by dressmaking, and some of the atest models for her frocks are in axing contrast to the simpler dene shown earlier in the season, yet nawing the dictates of good sense and youthful requirements at the game time. Any soit, inexpensive fabric could be used for the design pictured today,

Gauged about the waistline under a best of its own material stitched with Valenciennes, the skirt is trim-

AN ELABORATE SUMMER DRESS. med with insertion of Valenciennes and ruffles of imitation Cluny. Tha Cluny lace is soft and rich looking and makes a more effective trimming for very dressy frocks than combinations of Valenciennes and embroid. ery. The imitation trimming, too, is less expensive than much of the embroidery used for such purposes.

The blouse waist too, is joined to skirt, giving the dress the preting one-piece effect. Bands of enciennes and a border of Cluny e trim the round neck, which is away sufficiently to expose the aroat. The sleeves are elbow length trimmed with Vaienciennes and Cluny. Little rosettes of satin ribbon added to the yoke, sleeves and beit, back and front, make pretty de-

it is seldom that all over embroidery is used to better advantage than in this French seashore gown. the skirt is made with a tunic of the embroidery, mounted on a petticoat of soft hand terchief linen trimmed with two broad tucks on either side of a wide fold of embroidered wash net set in at the bottom.

The heightened waistline is accentuated by a girdle of tucked linen and the blouses trimmed with folds of the same material stitched about the square neck. The linen folds are stitcaed under fine linen

FROCKS OF FRENCH DESIGON. soutache and the guimpe is of coarse net simply ornamented with polka dots of mercerized linen. Undersleeves of plain net fall to the elbow and have rather close-fitting cuffs formed of several layers of knifeplaited net.

it is one of the iron-clad rules of fashion that skirts hang softly and gracefully, and if there is a single note of uniformity in the wide va-

riesy of skirts, this is it. Gowns of this kind are worn with the softest and least assertive petitcoats possible, for which nainsook, China silk and even pure linen are the favorite fabrics.

Although designed as mid-summer frocks, these models might be made of material that would render them serviceable until late in the fall. The model in pale blue linen, with trimmings of morcerized cretonne is exquisite. It takes the fashionable

princesse form, the upper part of the corsage being made of cretonne, while bands of plain dark blue lines ornament the bottom of the sk'rt. The yoke and under sleeves are of sheer embroidered linen, and clossfitting over-sleeves, of cretonne fail over them. The yoke and oversleeves and also faced with dark blue linen and there is a tiny suspicion of an Empire vest in the same trim-

LOOK WELL IN SUMMER, ming, finished with buttons and lin-

en pendant trimmings.

Completing the costume is a hat in natural straw trimmed with flowers in light and dark shades of cornflower blue, and waving algreties.

The second frock is a checked voile, accompanied by a coat in plain taffetas trimmed with heavy lace and silk soutache braid. The coat is curved into the lines of the figure, though not close-fitting, the sides being clashed and connected by little folds of silk with fancy buttons at either end.

The dress is trimmed with bands of plain silk, matching the coat. while the blouse bodice has stitchings of the same material, inset with medallions of embroidered grass lin-

Every woman of fashion realizes how vastly important is the matter of properly cut and fitted lingerie in these days of princesses and onepiece fracks. A splendid example of what is correct in lingerie is given here, the combination corset cover and pantelettes being made of the softest nainsook, trimmed with beading, tucks, Valenciennes insertion and fine embroidery. Ribbon must not be omitted from the list of decorations, and although there is not a great deal of any one kind, the

LINGERIE FOR FROCKS. combination makes a lovely bit of underwear. The garment is fitted

for the figure with groups of handrun tucks.

The pantelettes are quite full enough to obviate the necessity of wearing a short petticoat, and it is wise to wear as little underwear as possible under a tight-fitting gown cut in one piece. Fashionable lingerie is expensive because it has been developed to such a degree that it requires skill in the making as well as do gowns. The novice who formerly contented herself with lingerie pulled in with strings at the waistline, clumsy with folds or shirred fulness and punctuated here and there with little bumps of tape-knots, finds herself miserably out of proportion unless the new way of dressing underneath is adopted.

The Baby's Education. A lady who is an expert on baby culture, stated at the toy exhibition in London that play was a means of a baby's mental growth. When it dropped its ball or rattle twenty times running, and then threw it down for the list time, it was learned something-though the tired parent might not think so. When the baby carried its plaything to its month it was not because the baby wanted to such something, but be cause instinct told it to learn by touch the nature of things.

Rolls may be freshened even when very stale, by dipping each one quick. ly in ice water and heating in the oven until crisp. If eaten while hot tney resemble zweibach.

The skin of muskrats is largely made use of in the manufacture of the cheeper grades of fur coats.

ARMY BALLOON SQUAD TESTING AIRSHIPS

Trying Out Craft of Various Make and Mastering Aerial Problems.

PICKED BODY OF MEN

Slow to Recognize the Utility of Air Navigation, the Lost Time is Now Rapidly Made Up-Well Equipped Works for the Purpose Installed at Fort Myer, Near Washington.

Washington, D. C .- The present land. Government tests of airships of various types will serve to bring prom!and personnel of the newest and one of the most interesting branches of Squad. The little group of men who qualified as experts in the handling of sky craft will serve as the nucleus of what will ultimately become one in Uncle Sam's military establishment-a trained body such as is essential, if this nation is to overcome the long lead already gained by France, Germany and Great Britain in military aeronautics.

The Balloon Squad is a branch of the United States Signal Corps. For a number of years ballooning has been regarded in military circles, as an essential adjunct to the signal work of the army, but Americans have been unaccountably tardy in exploiting its possibilities.

Picturesque indeed, were the circumstances which finally aroused the Yankee officers to action. The spark that set interest and energy affame in this direction was the winning of the first international balloon race by Lieut. Frank P. Lahm. That young American army officer. barely twenty-eight years of age and almost a novice in the work, should defeat the most experienced aeronauts of Europe and win a decisive victory in what was, up to that time, the greatest areial sporting event the word had ever seen, could not help but kindle the patriotism and the aeronautic interest of his fellow officers at home and abroad.

The outcome of the sentiment thus aroused was the issuance of an order creating the Aeronautical Division of the Signal Corps. It was arranged to get out of storage the geveral balloons of foreign make which had been bought by the United States during the Spanish war and had been in storage ever since, and it was decided that the headquarters of the new activities should be at a "balloon house" at Fort Myer, Va., just across the Potomac from Washington, and where the progress could be closely watched by the administrative officials of the War Department. It is the expectation that ere many months elapse a second detachment of the Aeronautic division will be organized at Fort Omaha, Neb., where the government is now building a model balloon house and is installup-to-date plant in the world for the manufacture of the hydrogen gas used for the inflation of balloons. The baloonists at Fort Myer have

the care of all the balloons owned by the War Department. These include a French balloon of 9,000 cubic feet capacity, which was bought during the Spanish War; a balloon, 26,000 cubic feet capacity, of German manufacture, which was acquired at the same time; the famous Balloon No. 10, of 76,000 cubic feet capacity, which was built especially for the Signal Corps by Leo Stevens and three small balloons of German manufacture, 400 cubic feet capacity each, which are intended primarily for signal work but which are proving very useful at Fort Myer as reserve reservoirs for the storage of a surplus supply of hydrogen during the inflation of the big balloons.

Uncle Sam's establishment is pretty well equipped, in addition to a vast array of such standard adjuncts as ballast bags, anchors, baskets and the like, there are instruments for registering the lifting power of a gas bag and for testing the quality of the gas in use. One ingenius mechanical assistant is an apparatus, operated by turning a crank, which inflates a balloon with air so that it may be tested for leaks or to facilitate repair work.

For the time being the hydrogen gas used as the lifting medium in the dirigible and all other balloons is manufactured at a temporary plant at Fort Myer, but ultimately all the gas required for army balloon operations anywhere in this country will be manufactured at the Fort Omaha plant and will be shipped wherever needed in tanks somewhat resembling, save for their larger size, the gas tanks used in connection with soda water fountains.

The balloon squad has its regular drills just as do other branches of the military service. The most important of these has for its object the inflation of a balloon.

10,000 Wed from One School. Cincinnati, Ohio.-President Hill of Lebanon University declares that fully 10,900 matrimonial matches had been made through the influence of the school since it was founded fifty-two years ago.

COL. NEVIUS CHOSEN HEAD OF THE G. A. R.

Former President of New Jersey State Senate Wins Over Ex-Gov. Van Sant.

Toledo, Ohio, Sept. 10 .- Col. M. Nevius, of Red Bank, N. J., a former President of the New Jersey State Senate, was chosen commander-inchief of the Grand Army of the Republic. He was elected on the first ballot over his chief competitor for the nonor, former Gov. Van Sant, of Minnesota. The other officers selected were: senior Vice-Commander. J. Kent Hamilton, of Ohio; Junior Vice-Comman.er, C. C. Royce, of California; Chaplain-in-Chief, J. F. Spence of Tennessee; Surgeon-inthief, G. Lane Tannehill of Mary-

Col. Nevius, a native of New Jersey, was studying law with the late nently before the public the functions | Russell A. Alger, of Michigan, when the civil war broke out, and enlisted from the State with the Lincoln Cavthe United States army-the Balloon | airy. Young Nevius rose to a commission with the Seventh Michigan within the past few months have and the Twenty-fifth New Yor Cavalry regiments, and lost an arm in front of Fort Stevens when the Union army was engaged with Gen. Early. of the most important organizations Col. Nevius, besides being twice Department Commander of New Jersey. has been a Judge and President of the New Jersey State Senate.

The Woman's Relief Corps elected Mrs. W. L. Gillman, of Roxbury, Mass., President.

FINDS DEAD WIFE SEATED AT TABLE.

William de Billier, Broker, Discovers Body in Apartments.

New York, N. Y., Sept. 8 .- With a fork in her hand and a half-finished breakfast on a table before her, Mrs. Martha De Billier, 'thirty-five years old, wife of William De Billier, a broker, was found dead at half-past five o'clock p. m., in her apartments in Rosleith Court, No. 1 West Eightyfifth street.

Presumably death had occured soon after Mr. De Billier's departure for business a few minutes after nine o'clock a. m., and the body had rested in position in which it was found thoughout the day.

WITCHES KIDNAPPING.

Four Cases Reported in Cuba-Peo ple Greatly Wrought Up.

Havana, Sept. 9 .- Within a week four cases of kidnapping of children by "witches" have been reported.

Three of these were in the vicinity of Cardenas, where the community is much worked up.

Wealthy Girl a Suicide.

San Francisco, Cal., Sept. 8 .-Evading her nurse, Miss Helen Cullen, who was worth more than \$1,-000,000, swallowed todine, made her way to a third-story window at the Waldemar apartments, and leaped to the courtyard. She died a few hours

Uses Hold-up Man's Gun.

uperior, Wis., Sept. 8.-Jacob ing what it is hoped to be the most | Meismen a farmer, mortally wounded a highway robber after a fierce fight, in which Meismen took the holp-up man's gun awa; from him and used

Tweed's Old Gardener Dead.

Stamford, Conn., Sept. 10 .- Henry Fitzroy, who was gardener for "Boss" Tweed in the Tammany leader's palmy days, died here, aged eighty-one years.

Breaking in New Men.

A large corporation has lately shown its appreciation of the value of giving new employees a thorough general knowledge of the business by publishing a book describing in an interesting fashion all the details of the company's work. A copy is furnished every employee and he is expected to master not merely the portions pertaining to his own work tut the entire book.

It costs us about \$2,000 a year to publish this book," says the president of the company, "but we consider it money well invested. When a man enters our employ he is told to read this manual and do nothing else until he has mastered it. This gives him a general knowledge of the business, and if there are any points he does not understand they are cleared up before he begins work."

Back to Rum.

Mince ples are more injurious to hearth and morals than rum, according to Dr. Wiley, the food chemist. This is awful-to have to go back to rum again.-Auburn Citizen.

MAKE A NOTE NOW to get Ely's Cream Balm if you are troubled with nasal catarrh, hay fever or cold in the head. It is purifying and soothing to the sansitive membrane that lines the air-passages. It is made to overcome the disease, not to fool the patient by a short, deceptive relief. There is no cocame nor mercury in it. Do not be talked into taking a substitute for Ely's Cream Balm. All druggists sell it. Price 50c. Mailed by Ely Bros., 56 Warren Street, New York.

If you ask a man how he is and says "I can't complain," his wife may tell another story.

Old Age.

Old age as it comes in the orderly process of Nature is a beautiful and majestic thing. The very shadow of eclipse which threatens it, makes it the more prized. It stands for experience, knowledge, wisdom and counsel. That is old age as it should be. But old age as it so often is means nothing but a second childhood of mind and body. What makes the difference between the difference between the stomach. In youth and the full strength of manhood it doesn't come to the stomach. hood it doesn't seem to matter how we treat the stomach. We abuse it, over-work it, injure it. We don't suffer work it, lajure it. We don't suffer from it much. But when age comes the stomach is worn out. It can't prepare and distribute the needed nourishment to the body, and the body, unnourished, falls into senile decay. Dr. Pierce's Golden Medical Discovery is a wonderful medicine for old people whose stomachs are "weak" and whose digestions are "poor." Its invigorating effects are felt by mind as well as body. It takes the sting from old age, and makes old people strong. makes old people strong.
