Egg Production.

AUTHORITIES DIFFER VERY WIDELY AS La t Year's Product Was Valued at \$12,-TO ITS VALUE.

One Bureau Says it is \$300,000.000 and the Agriculture Dapt. Says \$600,000.000.

The full importance of the egg industry of the United States cau be realized only by consulting the red lemonade made a crop last year official statistics, and the attention given the matter is evidence of the Few indeed of the people who degovernment's watchfulness over all vour the peanut know about the tional prosperity. According to the census of 1900 the production they can buy the little fellows raw, of eggs in this country was 1,293. | parched, or salted at almost every 662,433 dozens, or about seventeen street corner, and that they are one dozens per capita. The value of of the items on the circus grounds. the egg crop that year was placed at \$300,000,000. But the Bureau of Animal Industry of the Department of Agriculture at Washington places the annual egg output of the present time at \$600,000,000. It appears from this that there has egg production than others. Iowa | cial factor until 1870. It is now having turned out 99 621,920 dozens in 1900, and is keeping up the farm where there is a light sandy good work. Ohio, Missouri and soil with plenty of lime and a little hind. Egg packing is carried on the same time corn is, and is put extensively in Iowa, and not long into the ground in much the same since an order was placed there for way, in rows thirty to thirty-six fifty-one carloads of eggs, to be delivered in Seattle during the com-ing exposition and paid for at the nuts grow under ground and are price prevailing at the time of delivery. That means 336 tons of eggs, and an estimate puts the From the farm the peanuts go to probable value of the consignment | the factory, where they are brushat \$122,000. How many of the 7,- ed, cleaned and bagged, and when off to patrons of the big show as "strictly fresh" is, of course, a ing purposes or ground up, the oil matter about which exact information is not forthcoming. Still, the cold storage egg of modern commerce is not always bad. Nor, on uable for cooking purposes, and it the other hand, is it without exception surperlatively good. And candies, Botanically the peanut certainly the hens are not at fault | belongs to the same group of plants in that direction.

WESTON, Ocean-to-Ocean Walker.

Said recently; "When you feel down and out, feel there is no use living. just take your bad thoughts with you and walk them off. Before you have walked a mile things will look rosier. Just try Have you noticed the increase in walking of late in every community? Many attribute it to the comfort which Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes, gives to the millions now using it. As Weston has said, "It has real merit." 6-3-4t.

Lion Hunting Tame.

Dr. Seaman Declares Roosevelt Runs Little Risk.

Dr. Louis L. Seaman, of New York, who returned last week by the Lusitania from a hunting trip in Africa, in the same region that Mr. Roosevelt will traverse, has little patience with the talk that some travelers have indulged in concerning the dangers the former President will run.

"A lion stands no chance at all." said Dr. Seaman. "Before the hunters get a shot at him, he has been chased by the beaters until he is so winded that there is little harm left in him. For the most part, African hunting is about as thrilling as in an English park.

"The one real danger is the tsetse fly in the lowlands.

Dr. Seaman is a friend of the former President and was at the dinner given in honor of Mr. Roosevelt at Mombasa on April 21.

Will Give The Facts.

For years it has been the policy of the railroad companies to maintain a reserved reticence in regard to facts concerning any accident which might occur on their system but recognizing the fact that the day has come when the public demands the most complete and explicit facts in regard to any happening the Pennsylvania railroad company last week put forth a promulgation that in the future every effort possible would be made upon the part of the company to give full details of any accident or happening of interest which may occur on its road. All officers of the company at every station of importance will be instructed to give facts to both press and public as soon as possible.

Sports! Sports! Sports!

extracted, and the pulp made into butter. This method of treating If you are an enthusiastic lover of sports you certainly try to keep in touch with all sporting events. It may not be possible for you to attend all games personally, but you can keep informed by reading "The Philadelphia Press," which as do beans and peas, and properly covers all important sporting events. speaking the peanut is a pea, rather than a nut, the term "nut" hav-The scores of the major and minor baseball leagues are published in ing been applied on account of the full, as well as the many other flavor. The "goober" is growing games. "The Philadelphia Press" employs a large staff of skilled writers, and with specially leased wire crowd wherein the crunch of the service, gives you the news of all the games and sporting events, completely, accurately, fairly and first. Be a real fan and read "The Souvenir Post Cards are printed Philadelphia Press," daily and Sunat this office. Half tones supplied. day.

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants.

THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under onth.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine of known composition. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.

Passing of Wedding Rings.

"Perhaps because rings as simple ernaments are so completely out of cashion few married women wear the symbolic gold band at present," said a fashionable New York manicurist the other day. "Of the several dozen patrons who frequent our establishment in the busy season every day not one in six or seven of the married matrons is so distinguished. The tragile looking circle which of past years has gradually been losing something of its solidity is carefully preserved no doubt with other interesting souvenirs and keepsakes. It is seldom wort.'

To Extract a Splinter.

When a splinter has been driven deep into the hand, it can be extracted without pain by steam. Nearly fill a wide-mouthed bottle with hot water, place the injured part over the mouth of the bottle, and press tightly. The suction will draw the flesh down, and in a minute or two the steam will extricate the splinter and the inflammation will disappear.

One of the most curious of the natural phenomena peculiar to the Rocky mountains is the mysterious storm known to the Indians as "the white death."

Not many years ago a party of three women and two men were crossing a part of Colorado in a wagon during the month of February. It was a delightful morning, very frosty, but with brilliant sunshine, and the atmosphere as clear as crystal.

Suddenly one of the women put her hand to her face and said that she had ocen stung; then other members of the party did the same thing, but no insect could possibly live in that temrerature.

A moment later they noticed that the distant mountains were disappearing behind a cloud of mist, a most unusual thing for that time of year. They drove on and in a few minutes a gentle wind began to blow and the air became filled with fine particles of something that scintillated like diamond dust in the sunshine.

Still they drove on until they came to a cabin, where a man signalled them to stop. With his head all muffled up he rushed out and handed the driver a piece of paper on which was written:

"Come into the house quickly or the storm will kill all of you. Don't talk outside here."

No time was lost in getting inside and putting the horses under cover, but in less than an hour the whole party was seized with violent coughs and fever, and before the next morning one of the women had died with all the symptoms of pneumonia. The others managed to pull through after long illnesses.

Scientists caff this phenomena frozen fog, but whence it comes has not at present been traced.

They Worked on Benches.

The dignified dame was not really English, but she had mastered the dialect to some extent.

"My nevvew 'Erbert," she said, wants to marry a school teacher! Fawncy! A person who works for a living! To be sure, now that I think of it, that is not always a disgrace. You, my dear, write for the press now and then, I am told, but you don't 'ave to, you know. That is different." 'Yes," replied the young person to

be said to have inherited a tendency to work. My father and grandfather both worked for a living, and they were not allowed even the luxury of a chair to sit on. They worked on benches.'

"Dear me!" exclaimed the dignified dame, greatly shocked. "What did they-ah-work at?"

"Well, my father was a judge of the superior court, and my grandfather was one of the justices of the United States supreme court."

Directions for Amateurs. A writer in the Munich Jugend has

published five signs which should be helpful to all wno have to criticise pictures. 1. If the artist paints the sky gray

and the grass black, he belongs to the good old classical school. 2. If he paints the sky blue and

the grass green, he is a realist.

3. If he paints the sky green, and the grass blue, he is an impressionist. 4. If he paints the sky yellow and the grass purple, he is a colorist.

5. If he paints the sky black and the grass red, he shows possession of great decorative talent.

Japan's Railroad Extensions.

The Japanese government intends to spend \$75,000,000 during the next five years on railway construction and equipment. Among other items, appropriations are made for doubling 830 miles of track, and for constructing 900 locomotives, 1,000 passenger cars, and 19,000 freight cars.

The Weather and the Shoe Trade. As long as t'e ground is dry the old shoes do not show their hidden weaknesses and defects, but let a heavy, cold rain or even a slight snow fall arrive, and then the almost invisible cracks in the uppers and the worn places in the soles will prove their pregnability, and the rush to the shoe store will amount almost to an invasion.

A Formula.

Right ideas, backed by persistence and promulgated at psychological moments, will gain a foothold and become a great force for good, no matter how determined may be the opposition.-Detroit News
