### Sell Less Wheat Abroad.

The calendar year 1909 will show a smaller exportation of wheat than any year in the last decade, and an increased home consumption, both in amount and per capita average, says a report of the Bureau of Statistics on wheat production, exportation and consumption of the United States.

The continued decline in exports of breadstuffs lends interest to the statement. The exportation of wheat for the nine months ending with September amounted to only be covered is 67 and there will be 27,768,901 bushels, against 68,178,-935 bushels in the same month of 1908; flour exports were 6,288,283 reduction in exports of wheat seems to be due to increased consumption at home rather than to any decline production for the last five years has exceeded any earlier five-year period.

### Forest Fires near Pottsville.

Forests covered with dried leaves northeast of Pottsville were the scenes of great fires on Sunday, the smoke and flames compelling a number of families to flee for their lives

The State having withdrawn its appropriation for fire wardens, there was a lack of organized opposition to the progress of the flames, and thousands of dollars worth of damage is reported to young timber.

PHONE ON P. & R. Catawissa Division Being Equipped With Instruments as Auxiliaries to Telegraph.

### The Reading Railway company is introducing the telephone service at all passing sidings on the Catawissa division between East Mahanoy Junction and West Milton.

The number of miles of trac's to 18 telephone stations, located at East Mahanoy Junction, Lofty, Girard, Brandonville, Krebs, Ringtown, Ferndale, Beaver Valley, McAuley, Mainville, Catawissa, Rupert, Grovania, Danville, Mausdale, Mooresburg, Dougal and West Milton. It is not the purpose to do away with the telegraph in the running of trains but to use the telephones as an accessory. It will enable the trainman who is not a telegraph operator and who may be miles away from a telegraph office to get into instant communication with the train dispatchers and, in many instances, save valuable time. It will enable train crews to know just where the train they are lying out for is and often times will enable it to get a right of way which it could not get for hours if it had to get word by a telegraph office first.

This system is now in operation throughout the yards and on the basin branch where telephone boxes have been installed and the train crews, by using them, save much time in getting a right of way and making the necessary movements.
