

THE UPPER MISSISSIPPI

From the Literary World.

A thousand miles in a bird's flight from the Atlantic to the Pacific ocean nearly four hundred from the source of the Mississippi, and more than two thousand from its many-mouthed entrance to the Gulf of Mexico, the waters of that river are precipitated over the rocks of St. Anthony.

Two centuries ago, Hennepin, a French priest, who had floated down from the Canadian colonies, on a pious mission among the Indian tribes on the banks of the river, drew his canoe out upon the beach, nearly a mile above these falls.

The Falls of St. Anthony have a perpendicular height of about seventeen feet; they are highly picturesque, and the water, as it comes down, has been named the Plover river, because of the noise it makes as it falls.

The National Era, the leading organ of the Liberty party in its notice of the Philadelphia Convention, says that "the reader who will take the trouble to read the proceedings of that convention will be forced to the conclusion that the Baltimore Convention, when compared with it, was a spirit of Freedom and Order embodied."

By Magnetic Telegraph.

MARKET.—The tendency of the flour market is rather to lower prices; although the change is not very marked. Some parcels of State could be picked up at \$1 1/2 a bushel, fair brands brought \$5 08 a 5 1/2. Mich. and Ohio \$5 12 a 5 25, for good brands.

At a meeting of the Democratic Sparing Band of Erie County, held on Saturday evening the 15th inst., the committee appointed to report officers for the permanent organization of the Club, submitted the following:

Resolved, That in the resignation of Gov. Shunk the Democratic party have lost an able chief magistrate and Statesman, and an honest leader.

Resolved, That while we sincerely regret the great loss of life which occurred in the recent hard-fought struggle in our sister republic of France, we rejoice at the glorious success of our democratic brethren there, and most heartily congratulate them on the overthrow of the monarchial party, and the triumph of liberty, democracy and order, over anarchy, disorganization and military tyranny.

and found nothing, they remove elsewhere, the prospect not being good. When one is found, they either sell out their discovery, or name the vein on a small scale for themselves. Nothing can be more profitable than the mining of lead here accomplished.
