Such were the sentiments entertained by Mr. Clay in 1,28, during Gen. Jackson's canyass for the Presidency. He prayed that pestilence or famine should visit our beloved country, rather than subject it to military men, who were eminent only in military life. Of course It is no expected that the sentiments of this extract should receive any attention or meet with any concurrence in the whig party. Neither can it be suspected that the sneaker ever was a member of that party while entertaining ocrats have gained two Senators; also, nett gain of four such wishes! Happy, thrico happy would it be for the Whigs, if this could be as we have supposed; most fortu- Congress. Democratic gain of two members.—[Editor nate would it be if Mr. Clay had never uttered these sen- Herald? timents.

It is astonishing to see how much ill luck befalls the Whig party. If they elect a President, he soon dies .-If their leaders avow a sot of principles, and the party adopt them, they soon become obselete ideas. If their most honored and respected Statesmen condemn a course of conduct, as a curse to the country, they, through some way wardness, are soon found adopting this very course and hurrying on the predicted national curse. At the same time the prophet is continually regarded as inspired, Pelk a majority of over 8,000. Members of Congress in and his subsequent speeches and letters are received with as much reverence as the oracle of Delphi. The appa- | Natives, 1 Native being doubtful. In the Legislature, a pent respect paid to him is intended to soothe his morti- majority of 15 for the Whigs, and in the Senate 5. fied feelings at soeing his counsel treated so coldly. This is a way of buying off, peculiar to the wings,

But the ill-fortune that befulls Mr. Clay is still more inexpressible. Arrived at that extreme period of life when his strength and feelings will no longer suffer him to take an active part in the severe labors of public life, and nature forces him to retire to peaceful scenes, where the shades of evening are beginning to fall, it is then that he looks around to see what has been the fruit of his life lor, 1,577; Leherie, Cass, 1,359. Among the mem-_what has been the influence of his example and what is the effect of his opinions upon his fellow citizens .-Like the old Roman Statesmen, sitting in the entrance of their houses, he would desire to drink by deep satisfaction from such reflections. But, how bitter to him must be the draught! For for

to years of his life, devoted to his party and their service and using all his oratorical powers for the elevation of his party and now in the decline of his life to find himself thrust aside and a military chieftain taken in his stead, whose only recommendation in his military services. Not only so; but if his thoughts turn to the great measmes of his life, the American system, he sees it rejected as false in principle and fraught with ruin in practice. If the golden vision of a Bank rises to his view, the voice of his friends declaring it to be an obselete idea, echocs in his cars. If he attempts to scan the actions of his fellow citizens, the conduct of his own friends spreads over terrible than war, pestilence and famine, which, they, in defiance and contempt of all his admonitions, are striving to bring upon his country. Unfortunate man! He has outhved his time. He has not kept pace even with the progress of the whig party. He survives, a monument of desertion-cast uside by his friends-as the worshipers of graven images become weary of idolizing the same old statue throw it aside as a useless leg. Well may be now exclaim, blow, blowt bou winter wind.

THE WHIG PARTY.

Everything, wittily says the Philadelphia Herald, means something, if one had but the gift to understand it. It. is unphilosophical to dispose of a puzzle by calling it a humbug. Whatever comes into existence has some designain it, and as soon as it becomes utterly useless, it ferthwith goes to pieces. There are "sermons in stones." hard subjects as they are, and "good in everything," bowever difficult to find it, and the whig party must be nature and providential drift of our institutions gives us a Democratic Government, and in practice demands demscratte functionaries. The creed and the discipleships must, in the nature of things, he kept in some tolerable degree of correspondence. In Natural Philosophy and Theology there may be parties antagonizing each other both in theory and in action, because first principles are ix dispute, and there is no authoritative expositor; but the doctrines and policy of our civil Government are matters el concention and construction by the proper authority is absolute and certain. There can, therefore, be but one legitimate, permament, or substantive party in politics; but there may be any number of temporary, adjective sects, through whom con-conformity and abuses are to be exposed and remedied. The whig party, we take it, results from this necessity, and is legitimately devoted to to this reformatory function. Its fortunes and history acconlinell with this view. The Democratic party holds the Government from the proprietaries in fee, and the whig partly has a sort of a tinker's lien upon it for repurs. Once in a dozen or twenty years, when the demcomis, in the presumption of an indefensible title, behave so hadly that they cannot endure themselves any longer, the Whigs find their true usefulness in helping the best of them to turn the rascals out of office. But the whigs thereupon make the egregious blunder of imaginagihat they are a party, instead of a patch for the regulators and Moreland 28 for Johnston.

The conduct and action of the Whigs sustains the Frankford, 119 same view. While the Democrats are always preaching West Failure, 67 principles, they are always exposing abuses, and com- Blockley, 35 planing of mal-administration. It is tyrany, not usurp | Mungunk, 111 ation, that they charge upon their antagonists. And it Bristol 60 Germantown 135 Party, though they neither know the fact nor wish it to Kensington 102 majority for Longstreth. be so, that they are able to appeal, as they always do, to Lower Dublin 85 the progressive and better sentiment of the country, with plausible claims for its support. They always behave a District 785 little better on the questions of peace, anti-slavery, and the right of petition, than their rivals, but they mistake their office; because they physic and plaster the diseased body politic. they take it into their heads that they ought to be received as the head of the family and the manager dusaflars. If they could once get it fairly into their heads that they are only a "segregated association" of degusted Democrats, and conduct themselves accordinghe they would truly answer their providential purpose; lathe thing of setting up for a regular, permanent, inder adent, and integral organization, puts them entirely but of harmony with the established order of things, and waters what would otherwise be a symmetrical moveis a miserable shuffle, and a confounded fuss genď.

Boor on the other Lec.—The great electioneering Grage which was committed a day or two ago at Balmore, proves to have originated with some "ultra "higs" congregated at the door of a Federal newspaper They threw bricks at the Democratic procession, 43d struck one or more persons,-the Democrats passed ca qu'etly, but were followed by the rowdy gang, until bestance became a matter of necessity. This is the last secount and no doubt the true one.

The almost unlimited success it has met with, stamps in at once the GREATEST DISCOVERY OF THE AGE. It is containly effecting cures of the utmost importance. The most introduces are CONVINCED—the most faithless are compelled to belie e in the power and virtue of this great rechedy.

It is universally admitted to be the MOST WONFIERFUL COMBINATION KNOWN to the WORLD for the IMMEDIATE RELIEF of discase and pain.

It never fails while there remains sufficient life to restore a ratural and healthy action to the capillary vestels of the body, and to equalize the circulation of the blood. By this means, a controlling power is gained over the most malignant forms of DISEASE, that cannot be obtained from any other remedy. Such is the fower of this combination that it penetrates to every portion of the human frame; every bone and muscle, vein, nerve and ligament is scarched out and made sensible of purifying and healing influence.—Hence, it copes as readily with internal as external diseases.

Numerous instances are on record where this remedy has restored health to patients so near the grave that the most powerful internal remedies failed to produce any effect. Such has frequently been the case in INFLAMMATION of the BOW ELS—no patient ever need the with this disease where the Magnetic Oinment can be cultained. That dangerous ep d mic. DR. BINGHAM'S CERTIFICATE.

Interly to your queries with regard to the results of the Experiments I have made with your justly effectived Magnetic Cintment (I can say with pleasure, that I deen it one of the GREAT-EST DISCOVERIES OF THE AGE.

It is now nearly two years since I commenced using it in my practice, and I have theird it in cases of Inflammation, both local and general, of the most unalignant kind, with universal success; even where all internal remedies failed, I have succeeded with this.

I have treated cases of Inflammation of the Brain, Inflammation of the James. Inflammation of the Howels, Inflammatory Rheusers. of the Lunes, Inflammation of the Bowels, Inflammatory Rheu-matism, and Child-led Fevers with perfect success, also eases of Scarlet Fever, Canker Rash, and Ulcerated Lungs and Threat with the success. Scarlet Fevry, United Ready and Oriented Environment, with the success.

In the Epidemic known as the Purid Erysipelas, by which so many valuable lives were lost, I tested it frequently, and it never failed of effecting a speedy and certain cure.

In cases of Burns, Sprains, Brujses, Frozen Limbs & C., it acts

like a chatm.

No Physician or family will be a single day without this medicine, after becoming acquainted with its power to cure.

CCARC'ELY have ten short years elapsed since an humble atDiempt was made to combine, in a suitable medical preparation,
a few of the herbs of the Indian. All was dark at the time as to
the result. The most that could be estimated was, that the principles adopted as the basis to build upon were sound. So much rebiance was placed upon calonnel and the lancet, that the ill success
of the new experiment would have tended to confirm that relinace, while it shook the purpose of the projector.

Now, however, all doubt and difficulty is at an end. Everywhere this medicine has been greeted with welcome; everywhere
has its use been attended with the most gratifying success. Erom
