## IMPORTANT FROM MEXICO.

Late from Vera Cruz and the Capital-Another Revolution Expected .- The brig Titl arrived at New Orleans on the 20th, with Mexican dates to the 19th.

From the tenor of these prints, says the New Orleans Delta, it would seem that the elements of internal commotion are still at work in the Republic of Mexico, and that she is on theere of anotherchange in her government. Rumors of rebellion, are conerriving at the capital, from the provinces, tinually ! and even in the city of Mexico the administration of Herrera and the population are kept in cominual slarm, by the evil dispused, who are actively couployed in preparing the downfall of the present rulers. It is stated that all classes are thoroughly disgusted with the present government, which is only upheld by the terror which the measures of the Minister of War inspires, and the money it has at command .--When the millions of the indemuity are spent, there will be an immediate demonstration, and Herrera must fall.

El Arco Iris, of the 11th inst., says that Santa Anna had written to his friends by the last steamer, the Fourth, protesting that he had no intention to return to Mexico. He was content with his fot in exile, and would not come back, unless, called on by the masses, or the Republic was again invaded,

An express arrived at Vera Cruz on the morning of the 10th, stating that a pronunciamento had been made at Tampico, which the inhabitants had proclaimed the independence of the State, and its annexation to the United States. El Arco Iris states that it is a positive fact. Three hundred stands of arms were immediately, embarked on a vessel at Vera Cruz, and despatched to Tampico. This event, it adds, will prove very untoward for the government, through the latter's scanty finances; but it advises that sacrifices be made, and two or three is believed at Vers Cruz that a similar movement Herald. took place simultaneously at Matamoras.

JALISCO .- Santa Anna's partizans made an abortive attempt at a revolution in his favor, st Guadalsjars, in this State, on the 23d ult., but which was tified in the bud, by the vigor and promptitude of the Governor. The 14th of the line, engaged therain, were marched out of the city, when tranquility was restored.

In Durango, San Luis, and Zacatecas, the Indians have lately committed the most horrid attrucities, the Government having no troops available to send against them.

The frontier States have conceded to the Government, authority to dispose of the National Guards, so as to resist, more effectually, the impending invasion. They become Gardes Mobiles.

TAMPICO .--- Herrerajis actively employed in devisother States, threatened by the Buffoloes. . It is the most imminent of the many dangers that now threaten him. Despatches have been sent to Guanajuato, where the fargest military force is now stationed. with orders for General Bustamente to take command of the troops destined for Tampico. Minon takes the military charge of Guansjuato, and Gen-eral Avalos; Amandor, and Meja will occupy other points which it is deemed necessary to garrison.

YUCATAN .--- A schooner which arrived at Alvarado on the 8th inst, from Campeachy the 5th brought intelligence that a serious reverse had just been experienced by the Lucatecos. The Indians, 10,000 in number, had attacked the town of Yaxes ba, lately captured from them, and drove out the garrison of Dolores Pasos. The latter lost two hundred men in the contest, killed and missing; among the former was Capt. Acosta, in charge of the military operations under Sr. Passoe, A reinforcement of two hundred men had been dispatched from Merida un-Col. Rosado, who was to supersede Pasos, but no one can tell what will be the result of this reaction. It is hoped that it will not be the precursor of fresh disasters.

The body of a woman was found on the night of the 2d inst., in one of the streets of Mexico, with the head cut off. The usual robberies, which are quite a feature in the manuers of the country, are asily perpetrated on the high ways. The diligences indered with impunity. are pi

ALIVE FROM THE DEAD-ALMOST,-Some of our readers may recollect the case of Mr. Phineas Gage, who was injured, supposed mortally, while blasting rocks at Cavendish. Vt., some four or five weeks since. On Wednesday evening, the 18th inst., we conversed with a gentleman who lives in that town, and who states that when he left, on Monday evening, the 16th inst., Mr. Gage was not only living, but hade fair to continue alive and to some extent comfortable for a considerable time yet.

Mr. | tection. Gage, upon meeting with the accident, got into the cart and rode home, first telling a man who was at work with him to be there the next day, as he should be there! Arrived at the house, he walked up one flight of stairs to his chamber. Word was instantly sent to his mother who lived thirty miles off in New Hampshire, as nobody imagined he could live after what had befallen him. The physicians, on dressing the wound, found the fractures of the skull to be fearful. The wound bled freely, which tended 400 whitee, who were under command of Don Jose to prevent inflamation, and portions of the substance of the brain, intermixed with bloud, kept falling into the throat, causing vomiting, Mr. Gage is an unmarried man, some twenty-six

This case is probably the most remarkable one on record. If read of for the first time in a romance it would appear indicrously absurd. But,
