which complaints arise from one simple cause, namely,

A Derangement of the Nervous System. fig- in NERVOUS COMPLAINTS, Drogs and Medicines increase the discase, for they weaken the vital energies of the discase, for they weaken the vital energies of the discase, for they weaken the vital energies of the discase, so they weaken the vital energies of the discase, so they weaken the vital energies ing, lifegiving, vitalizing influence of Galvansen, as applied by this becauting and wonderful discovery, the exhausted i thent and weakened sufferer is restored to forguer health, there is a vitalizing in the sufficiency of the sufficien strength, elasticity and vigor. The great peculiarity and excellence of

Dr. Christie's Galvanic Curatives,

consists, in the fact that they airest and cure discase by out-card application, in place of the usual mode of drugging and physicking the patient, till exhausted Nature sinks hope-lessly usdor the influction. They strengthen the whole system, equalize the circulation of the blood, promote the scattions, and need the elightest into y moder, any circumstances. Since their introduction in the United States, only three years since, more than

when all hope of relief had been given up, and every thing else been tried in vain! To illustrate the use of the GALVANIC BELT, suppose the case of a person adheted with that bone of critization, DYSPERSIA, or any other Chronic or Nervous bisolet. In ordinory cases, stimulants are taken, which, by their action on the nerves and muscles of the stomach, afterd temporary relief, but which leave the patient in a lower state, and with injured faculties; after the action thus excited has censed. Now compare this with the effect resulting from the applica-tion of the GALVANIC BELT. Take a Dyspectic sufferen-eren in the worse symptoms of on attack, and simply the tho Belt around the body, using the Magnetic Fluid as directed. In a short period the insensible perpiration will act on the positive element of the Belt, thereby causing a 6 dyname tered-lation which will pass on to the megative, and thence back again to the positive, thus keeping up a continuous Galanne cicculation throughout the system.
