THE ADVANTAGE OF ADVERTISING. Everybody has heard, or ought to, of the celebrated

'Oak Hall'' Clothing establishment, in Boston. It is one of the most extensive in the United States, if not in he world, and it owes its celebrity, and its extensive run f custom, almost entirely to the liberal manner its proprietor, G. W. Simmons, has patronized the press by advertising. He knows the secret of success, and has not scrupled to use it. The following description of the establishment will not be uninteresting to the general

reader, showing as it does the manner they do business in that "down east village of Bosting:"

A Model Clothing Establishment. There is in Boston one of the largest establishments for the manufacture of clothes in the United States. We allude to GEORGE W. SIMMONS'S "Oak Hall Rotunds," as it is termed by its enterprising proprietor. Some idea of its extent may be gathered from the fact, that the sales amount to half a million dollars per annum, and that there are employed in the manufacture 25 fashionable cutters and trimmers. 2 book-keepers, 1 cashier and assistant, 1 paymaster, 5 runners, 2 expresses, 30 salesmen, and 3000 operatives constantly plying the needle. The Boston Post furnishes the following description of this manimoth concern: Mr. Georgo W. Simmons, of Oak Hall, has marked the season by making a most important improvement in his vast establishment. He has added a spacious and lofty rotunds in the rear of the large sales rooms on Ann This rotunda is also for a clothes mart, and is well worthy of a description, and should be visited as an object of interest by those who are anxious in observing how the trade of Boston in the clothing branch is rapidly increasing. The dimensions of the rounda arc 50 fact by 47, giving an arca of 2350 feet on the basement floor. and the depth from the centre of the splendid variega-ted sky-light to the floor is 65 feet. The light is 20 feet by 13, and the stained glass is of the most beautiful patwered upa. Mr. Niles interrogated Mr. Yulee, and tern. The main saloon, open from the first raised floor to hatis alood of to dissolve the Union. to the stucce work ceilling, and filled with a flood of light from above and on every side, is in fact divided in-

to two apartments, by means of a gallery of oak, with an elegant iron balustrade. The gallery is reached by a short flight of stairs, which branch off into a pair, turning to the right and left on the west side. Above the bas mont portion the form is elliptic. On the first floor there are two elliptic counters, with room on each for nine sales-men to wait on customers at ease-making eighteen in all at the counters; and around the counters are shelves sald be willing to defend Southern institutions at all for 8300 articles of clothing. In the intervals are four small rooms, or lighted closets, for assorted made-up clothing. Between the counters and the well-room railing is a broad promenade from which may be seen not only all the parts of the rotunda, but the two sales rooms which project into Ann street. This view is obtained by means of two two lyo-feet doors, which afford access to the rotunda from the Ann street rooms. In the second, or gallery tier, are no less than twelve rooms for assorted garmonts, regularly classified scompletely lighted with ample windows. Here, teo, is Mr. Simmons's own ample which a set of the shall be allery, which commands a view of the whole stablishment, resembling a gay bazaar with two long streets. CALIFORNIA GOLD DISCOVERED BY

SIGNOR D'ALVEAR'S GOLDOMPTOR!!! THE GOLD-SEEKER'S GUIDE! Or Secret art of finding Mines of Gold, Sileer, Iron, Lead, Copper, Coal, and other Mineral Riches.

The first discovery of Gold in California was made by DON JOSE D'ALVEAR, an eminent Spanish Geologist. Chemist and Natural Philosopher, by means of a newly invented Magnetic in-strument, called the

GOLDOMETER. or GOLD-SETRER'S GUIDE Signor D'Alvear has just arrived at New York from the Gold regions of California, by way of Panama, Chagres, and New Or-leans, bringing with him a very large quantity of Gold Ore, val-ued at nearly one million of Dollars, which he collected there long before the extremence of the Gold mines because known to the residents of California generally.

HISTORY OF THE DISCOVERY.

HISTORY OF THE DISCOVERY.Signor D'Alvear went out to California nearly two years ago, in consequence of certain information which he had receved of the geological character of that country, with the firm belief that wast mines of precious metals would be revealed there upon careful investigation. He was encouraged to the enterprice, also, by his confidence in a certain Magnetic instrument which he had invented, called the "Goldometer," by whose ald he expected to be directed at once to the "Goldometer," fullible this highest hores. In the revealed there upon careful investigation. He was encouraged to theremetryle, also, one of the septentiations disappointed. His sejentific calculations proved to be founded in truth and profound wission, and his new instrument, the "Goldometer," fullibled his highest hores. In less than two months after reaching Ca lifornia, he struck upon one of the richest Gold mines in that country, upon an obscure branch of the Sacramento river, in a gorge of hills extremely scientific research, he obtained the aid of some fiftwen or twen ty simple and faithful Indiane, and steadily pursued his task, collecting often more than 91,000 worth of Gold in a slugle play, which he momentains were ranseked by gold seckers' and scinor D'Alvear's "gold placer." ADVENTURES TO CALIFORNIA.

Persons going to California cannot make a better investment han by purchasing one of these instruments, which will not only e worth fifty times its value there, to sell again, but will be of in-stimable worth to those who go in search of Gold, as has been roved by the most aban lant experiment both m C.difornia and he United States.

TESTIMON (ALS.

TESTIMON (ALS. Signor D'Alvear does not deem it necessary to encluder this notice with adong list of testimonials, in proof the value of his GOLDOMETER, and GOLD SEEKER'S GUIDE. The brilliant results of his labors in California, and the discovery, this very week, of fresh venus of gold in Virgina. and bels of Coul to Riode Island, by its use, are alone sufficient to stamp it as the greatest discovery of the age. Nothing but the extreme cheap-ness of the instrument, and his desire to see it used for the benefit of mankind, induceshim to dispose of it at the low price bar which he offers it. Besides this, his own desire for weight in near-ity satisfied.
