BIGNOR D'ALVEAR'S GOLDONIETOR !! THE GOLD-SEEKER'S GUIDE:

Or Secret art of finding Mines of Gold, Silver, Iron, Lead, Copper, Coal, and other Mineral Riches.

The first discovery of Gold in California was made by DON JOSE D'ALVEAR, an eminent Spanish Geologist, Chemist and Natural Philosopher, by means of a newly invented Magnetic in-strument, called the

These contemplating Marriage. It will be found of special value to first whose memory, health or other circumstances, do not, permit them to increase the num-ber of their family, great inconvenience, substring, or perbaparisk of life. A method of avoiding these troubles and dangers, at will, (excently discovered, by a cetterated French Physician), is fully communicated in this work, so that any percon may avail binself of it at once, without cost. The means of preventions here set forth are therefore within the treach of all. The process is new, and infailible, convenient, simple, and cannot injure the beakth of the most delicate. GOLDOMETER, or GOLD-SE! RER'S GUIDE Signor D'Alvear has just arrived at New York from the Gold egions of California, by way of Panama, Chigres, and New Ot-cans, bringing with him a very large quantity of Gold Ore, val-ed at nearly one million of Dollars, which he collected there ong hefore the existence of the Gold mines because known to the esidents of California generally.

HISTORY OF THE DISCOVERY.

HISTORY OF THE DISCOVERY. Bignor D Alvear went out to California nearly two years ago, in consequence of certain information which he had received of the geolog-ast character of that country, with the firm belief that vast mines of preclous metals would be revealed there u on carcial investigation. He was encouraged to the senterprise, also, by his confidence in a certain Magnetic instrument which he had investigation. He was encouraged to the senterprise, also, by his confidence in a certain Magnetic instrument which he had invested, called the "Goldoncier," by whose aid he expected to be directed at once to the "Gold Placers," If any such existed.— Nor were his expectations disappointed. His scientific calcula-tions proved to be Gounded in truth and profound wisdoni, and his new instrument, the "Goldonneice," fulfilled his highest hopes. In less taan two months after reaching Ch ifornia, he struck upon one of the richest Gold mineer, and steadily pursued this extremely rocky and difficult of access, and setdom visited by the native Californians. Disguasing his object under the preturee of purely scientific research, he obtained the aid of scope fiven or twen by simple and faithful Indians, and steadily pursued his task, collect-ing otten more than E3,000 worth of Gold in a wingle day, which he mountains were ramsacked by gold seckers, and Signor D'Alvear's "gold placer." their least of point and steading when the mountains were ramsacked by gold seckers, and selfor in drendre or sands of the rivers. Signor D'Alvear does not deem it necessary to encumber this notice with a long list of testimonials, in proof of the value of his GOLDOMETER, and GOLD STEKER'S GUIDE. The brithant results of his labors in California, and the discovery, this very week, of fresh verus of gold in Virginin, and fields of 'Coal in week of fresh verms of gold in Virginri, and fields of Coal in Riode Island, by its mee, are alone sufficient to stamp it as the greatest discovery of the age. Nothing but the extreme cheap-ness of the mixturgent, and his desire to see it used for the benefit of markinal, induces him to dispose of it at the low price for which he offers it. Besides this, his own desire for wealth is near-ly satisfied. The following Tertimonials, in proof of the value of the Gold-ometer, selected from a great number equally satisfactory, must suffice for the present: Asroa Hoves, New York, Dec. 21, 1848.
