Nervous Discases,

which complaints arise tran one simple cause, namely, A Deraugement of the Nervous System.

A Derangement of the Netvous System. Go- in NERVOUS CONFLAINTS, Drugs and Medacines increase the discase, for they worken the vital energies of the already prostrated system; while under the strengthen-ing, life-gis mg, vitalizing influence of tablannsm, as applied by this beautint and wonderial directory, the exhanated patient and weakened sudarer is restored to former health, strength, classicity and rigor. The great peculiarity and excellence of

Dr. Christie's Galvanic Curatives,

consists, in the fact that they arrest and care discase by out-ward application, in place of the usual mode of drugging and physicking the patient, till exhausted Nature sinks hope-lessly under the influcton. They strengthet the whole system, equalize the circulation of the blood, promote the stortelous, and neter do the singhest injury under any circumstances. Since their introduction in the United States, only three years since, more than

60,000 Persons

including all ages, classes and conditions, among which were a largo number of fudice, who are reculiarly subject to Nerveus Complaints, have been

ENTIRELY AND FERMANENTLY CURED,

ENTIRELY AND FERMANENTLY CURED, when all hope of rehef had been given up, and every thing else been tried in vint? To illustrate the use of the GALVANIC BELT, suppose the case of a person afficiend with that hane of civilisation, DYSFRISA, or sup other Cheppic or Neurous Disorder. In ordinary cases, atimulants are taken, which, by their action on the average and matcles of the stomach, addred temporary relief, but which leave the patient in a lower state, and with injured faculties; after the action thus excited has cased. Now compare this with the effect resulting from the opplica-tion of the GALVANU BELT Take a Dyspectre sufferer, even in the worse as mptoms of an attack, and simply the the Belt around the body, using the Magnetic Finid as dures ted. In a short period the inversible perspiration will act on the positive element of the Belt thereby cusing a Galvanic circu-lation which will pass on to the negative, and there basis again to the positive, thus beeping up a continuous Galvanic circulation throughout the system. Thus the most severe cive in of USPECMA more FERMANENTLY CURED A FEW DAYS IS OFTEN AMPLY SUFFICIENT TO ERADI-CATE, THE DISEASE OF YEARS.
