OLD DR. JACOB TOWNSEND,

THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of age, and has long been known as the 2017HER and DISCOVERER of the GEN-UINE ORIGINAL "TOWNSEND SARSAPARILLA." Being UNE ORIGINAL "TOWNSEND SARSAPARILLA." Being poor, be wai compelled to limit its unnufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had groved its worth, and known its value. It had reached the cars of many, nevertheless, as those persons who had leen headed of sore discases, and saved from death, proclaimed its excellence and wonderful. Its excellence and wonderful. Knowing, many gear ago, that he had, by his skill, science and experience, devised an article which would be of incalcuble ad-vantage to mankind when the means would be furnished to bring it into universal notice, when its enestimable virtues would be known and appreciated. This time has come, the means are sup-plied; this

plied, this plied, this is manufactured on the largest scale, and is called for throughout the length and hredit of the land, expecially as it is found incapa-lie of degreneration or deterioration. Unlike young S. P. Townsend's, it improves with ege, and nev-er changes, but for the better, because it is prepared on scientific principles by a scientific mas. The highest knowledge of Chem-istry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Dr's. Sarsapartila. The Sarsaparilla coi, it is well known to medical men, contains many incides, which if retaized is prepared which are inert or useles, and others, which if retaized is preparing it for use, pro-duce fermentation and acid, which is injurious to the system.— Some of the properties of Sarsaparilla are so colatife, that they pentirely evaporate and are lost in the preparation, if they are not preserved by a scientife process, known ouly to those experienced in its manufacture. Moreover, these volatile principles, which if of in vapor, or as an exhalation, under heat, are the very es-scartafical properties of stew the root util they ge tha dark colored liquid, which is more from the coloring matter in the root than from anything clee, they can then easilit "SARSAFARA LLLA EXTRACT or SYRUP." But such is not the article known as the GENUINE OLD DR. JACOB TOWNSEND'S SAREAGA-MERCHANT TAILON, and Habit Maker.-Store, South side of the Public Square, three doors East of the Erie Bauk. H. B. as the GENUINE OLD DR. JACOB TOWNSEND'S SARSAPA-NILLA. This is so prepared, that all the inert properties of the Sarsaya-rilla root are thrst removed, everything capable of becoming acid or of fermentation, is extracted and rejected; then every parti-cle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuablecand heating properties. TOWNSEND, and yet he would fain have it understood that Old Dr. Jacob Townsend's Genuise Original Sarsaparilla, is an IMITATION of his inferior preparation! Heaven torbid that we should deal in an article which would bear the most distant re-sublance to S. P. Townsend's article: and which should bring down upon the Old Dr. such a mountain load of complaints and criminations from Agents who have sold, and purchasers who have used S. P. Townsend's FERMENTING COMPOUND. // We wish it understood, because it is the absolute truth, that f. P. Townsend's article and Old Dr. Jacob Townsend's Sarsaparil-la are bases wide apart, and infailed g dis-similar; that they are unlike in every particular, having hot one single thing in com-mon.

unlike in every particular, having bot one single thing in com-non. As S. P. Townsend is no doctor, and never was, is no chemist, no pharmaceutit-knows no more of medicine or discase than any other common, unscientific, unprofessional man, what guar-scates can the public have that they are receiving a genuine scien-tific medicine, containing all the virtues of the articles used in preparing it, and which are in capable of changes which might render them the AGENTS of Discase instead of health. But what else skyndl be expected from one who knows nothing comparatively of medicine or discase! It requires a person of nome experience to cook and serve up even a common decent meal. Now much more important is it that the persons who man-ufacture medicine, designed for weak Btomachs and Enfoeblod Systems, should know well the medical properties of plants, the best farm-ner of securing and concentrating their healing witnes, also an
