OLD DR. JACOB TOWNSEND.

THE ORIGINAL DISCOVERER OF THE Genuino Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of age, and has long been known as the AUTHER and DISCOVERER of the GEA-UINE ORIGINAL "TOKNSEND SARSAPARILLA." Being poor, he was compelled to limit its manufacture, hy which means it has been keptout of market, and the safes circumscribed to those only who had proved its worth, and known its value. It had been keptout of market, and known its value. It had the cars of many, nevertheless, ns those persons who had been healed of sore diseases, and saved from death, proclaimed its excellence and wonderful.

here headed, of sore diseases, and saved from usain, proclaimed its excellence and wonderful. HEALING POWER. Knowing, many sear ago, that he had, by hisskill, science and experience, devised an àrticle which would be of incalcuble ad-vantage to innakind when the means would be furnished to bring it into unniversal notice, when its encosituabile virtues would be known and appreciated. This time has come, the means are sup-biled: this

plied; this GRAND AND UNEQUALLED PREPARATION

plied; this (GRAND AND, UNEQUALLED PREPARATION is manufactured on the largest scale, and is called for throughout theiong h and breath of the land, especially as it is found incapa-ble of degeneration or deterioration. Unlike young S P. Townsend's, it inproves with ege, and nev-er changes, but for the better because it is prepated on scientific principles by ascientific man. The highest knowledge of Chem-ietry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Dr's, Sarsaparilla. The Sarsaparilla root; it is well known to medical mea, contains many medical properties, and some properties which are inert or uscless, not others, which if retained in preparing it for use, pro-duce fermentation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are eo colatife, that they centirely evaporate and are lost in the preparation. If they are not preserved by a scientiffe process, known only to these experienced in its manufacture. Moreover, these relatife principles, which fly off in vipor, or as an exhalation, under heat, are the very es-sential edical properties of the coloring matter in the root than from anything else; they can then strain this insipid or vapid 1-quid, which is more from the coloring matter in the root than from anything else; they can then strain this insipid or vapid 1-quid, sweeten with sour molasses, and then call it "SARBAPAR LLA INTRACT or SYRUP." Eut such is not the article knowi as the GENUNE OLD DR. JACOB TOWNSEND'S SARSAPA-

BLLAN INTO OFFICE. For But shot is not the article known as the GENUINE OLD DR. JACOB TOWNSEND'S SARSAPA-RILLA. This is so prepared, that all the inert properties of the Sarsapa-tilla root are first removed, everything capable of becoming acid or of fermentation, is extracted and rejected; then every parti-cle of me heal virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and heating properties.
