LAKE STILL OPER .- Although we are now well in February, the last month of winter, the lake has not comnenced to freeze over, and our harbor has comparatively little ice in it. The New York companies generally divide about ten per cent. per annum; besides laying up a fand annu-ally, supposed to be sufficient for the renowal of the read by the time the plank are worn out. The Rome and Oswege road cost \$91,000 and the receipts for the first year were about \$17,000 or nearly 16 per cent. The Syracuse road has paid from twelve to fifteen per cent. during the three years it has been in us₇, and du-ring that time there has been out of the receipts a new track lain for two miles along aids of what was before a single track, and besides there was a surning of \$7,000 single track, and besides there was a surplus of \$7,000 provisions of the constitution, in regard to fugitive shares, in the treasury on the first of February last. Massachusette is one ahead of Pennsylvania in this espect. Not "the first discordant note" have we yet heard from the Delaware to the Lake, although there is not a whig paper in the State that has not denounced this "let-alone" doctrine of the President time and again.

HoLO YOUR BREATE!-The London Standard calls Gen. Taylor "the ablest man in the United States," and clames "Webster and Lawrence as the really great man of the republic."-Boston Post.

Yes, "hold your breath"-the Standard is right. Webster said the nomination of Taylor "was not fit to be made." and truth is always an evidence of greatness Taylor says we are at "peace with all the world and seek to maintain our cherished relations of amity with the rust of mankind." Who but a great man could have perpetrated such a bull without over baving seen Ireland. And as to Lawrence, why he has recently proved his claims

As Mr. Lawrence is only about 50 years old, he could not have been born for at least 20 years after the evidently thinks he's older than his daddy!
