Dr Our free-soil cotemperary, of the Northern Citizen, thus humovorosly takes off the weather, and whig politicians, at one dash of the pen. "About the weather" will do for this latitude as well as any other:-

ABOUT THE WEATHER .- We have finally become se died and firm in the belief, that the weather is no more to be depended on than a Whig member of Congress.

Febuary, that has always adhered rigidly to its Northern reducty, the this year turned out to be a perfect dough principles, has this year turned out to be a perfect dough face. March made its appearance when the clements were terribly at war, and shook our dwellings with wrathful howlings, but is to day as tame as a cosset lamb. Cold as was its beginning, it may turn out like Whig free Soilism—best suited to a Southerne latitud. But, "sufficient unto the day is the evil thereof."

The Last year the girls (farmers' daughters) of three counties in Massachusetts, turned out straw hats and bonnets valued at \$1,646,596. The result is, they have in June last, I have used Sloan's Ointment and Condition Powders

DEATH OF CAPTAIN MAY .- The St. Louis Union, of of this young officer, who won the earliest laurels that were gathered in the late Mexican war. He died, says the Union, in San Francisco, after a short illness from acurvy and bronchitis, produced by a long and disagreeable passage from New York to that place, by the course of Cape Horn. At the period of his death he was about twenty-seven years of age, and in the very prime of his manhood and his hopes.

IMPORTANT .- The Gazette is out against "Moustaches and Imperials," and thinks they "ought to be prohibited in decent society." This is important, as it demonstrates that there is one great question of the day in regard to which our cotemporary does not "ride the fence."

PRILADEL PHIA March 9 We have just received information of a steamboat explosion at New Castle, Deleware, this morning, attended with fatal consequences—several were scalded—the porter killed. The Clifton had just undergone through repairs-the lower part of her boiler was entirely now, having had steam in it but once before, during the trial trip yesterday.

Owing to a vessel lying in the way at the wharf, some difficulty occured in landing and while attempting to land the blowing out of the stay bolts produced the calamity -the fireman was killed in the fire room-the engineer standing at the engine was not injured, nor any of the persons standing immediately over the boiler-in all, five New York, March 4-3 P. swept away. While this great fleed destroys a great deal of property, it will wash out the gold in great quantities-A party of Chilians made an attack on the Americans at the mines in the vicinity of Stockton, in which two of the assailants were killed and others imprisoned, though the latter were afterwards released. This affair orested great excitement. Steamer Ohio sailed yesterday for Chagres with 480

WASHINGTON, March, 4. SENATE.—At an early hour the galleries and all the accessible parts and passages to the Senate Chamber were density crowded to hear Mr. Calhoun's speech read. The Senate adopted a resolution offered by Mr. Dickinson The Senate adopted a resolution offered by Mr. Dickinson enquiring of the Post Master Gen'l, why appointments were made; and then when the order of the day was reached. Mr. Calhoun rose and thanked the Senate for the courtesy shown him, and handed his speech to Mr. the courtesy shown him, and handed his speech to Mr. other establishment of the kind in this city. The stock is large. Mason of Virginia to road. She speech concluded with stating the loss of the equilibrium. He said the North was | Teas, | Molasses the primary cause of the southern discontent and if the Bbi Salt question was not settled, it would end in disunion; he re-viewed the charges of northern aggression. He said the north was foxcing the south to eccede, but it must come Cinnamon, Lead, unless the question was fairly settled, and speedily settled. Justice connot be done this speech in a brief telegraphic article, it occupied about two hours in reading, and was listened to with profound attention when it was conclulestdes a great many things too numerous to mention. House.-Mr. Doty withdrew his resolution. His pur pose he said had been accomplished by the bill he had introduced, and which had been referred to the committee of the whole. On motion of Mr. McLean, the House went into committee of the whole and took up the special order the day, being Mr. McLoan's bill concerning the port of Baltimore. He proceeded to give a brief explanation of the object of the bill pending its consideration the House took up the California message. Mr. Sackett being entitled to the floor addressed the committee at length. Mr. McWillie followed and spoke with much emotion, and he cincorely believed that the Union was in imminent danger. Mr. VanDyke of N. J., made a speech in which he endeavored to show that the South had been the agressors. Mr. Hall of Missouri next obtained the floor when the committee rose. The House resumed the consideration of the Baltimore bill-was amended-when the House adj.

CINCINNATI. March 2. The resolutions appointed delegates to the Nashville Convention, were effectually killed in the Kentucky'Senate by the decisive vote of 29 to 6. Only one Whig voted for them, and only two Democrats against them.

NEW YORK, March 5, 3 P. M. An immense Union meeting was held at Baltimore las erening. It is estimated that there were ten thousand persons present. Col. Giles. officiated as President. A series of resolutions were adopted, in which the sustaining of the Union by the adoption of compromise measures Was reecommended.

The Hotald of this morning publishes Mr. Calhoun's weech entire. It occupies five and a half columns of that journal. The speech commonees by stating that here is danger to the Union, and traces the cause to the discontent of the South, not of sudden but of slow and Palient growth. The first charge is, that the South has been excluded, from, all interest in the teritories common to the Union; second, that the adoption of a system of tevenge and disbursement enenormous to the South, has been forced upon the county, taking away an undue proportion of the procedes of the South, and pressing upon her an unequel taxation for the bonefit of the North; third, that the system of political measures which has been therished has changed the original character of the Federal compact. He believes that under the present state of things, the South cannot, with honor, remain in the Union. He details the origin of that belief in the longcontinued aggressions of the North. He takes the census of 17,60 and 1840, and shows that, the equilibrium between the North and South has been, destroyed, not by time, but by the interference of the Government, and then lays down the modes by which this Governmental interposition has been accomplished. He next proceeds to show by statistics how is that the equilbrium has been destroyed, and the whole power, centralized in a sectional majority. From this he passes to the Tariff, manufactories, and the general matters pertaining to the Protective and American System, and concludes this division of the subject by asserting that, instead of living in a Republic, we are swayed entirely by the National
