Another reason is, we have the best apparatus. The importance of this will be obvious to any one.

We shall not offer those who favor us with their patronace, the flat, insipid, corpse-like things which many who call themselves arrists present to the public. Neither shall we offer those dark, gloomy images which human tengs are sometimes told resemble, themselves; but their and accurate likenesses, possessing the most beautiful blending of hight and shade, richness and depth of tone, remarkable districtness of teatures, true expression of the eye, boldness of relief, distance and mysibility of back ground, delicacy of finish, softmes, transparent and artistic effect.

Hold UP! Walk Up and see the Bang Up!!
THE public are invited to call at the Erie Steam Foundry, or at our Store, and examine the last Paragon of Cooking Stoves, just got out with an uncommon large Oven, high enough to bake a large Turkey on its feet, while six loves of bread are baking around it. The "noise and confusion" it has unde East, has induced the characteristic name of HANG UP. One who lately saw nine loaves of beautifully baked bread, taken from the oven at one time, "was reminded of the capacity of a small pig which drank two quarts of whey at a draught, and did not then fill the measure which contained the whey into four inches." See certificates.

LESTER, SENNETT & CHESTER,

Egy, January 22, 1850.

Messes. Lester, Sennett & Chester: Gent.—To your inquiry whether the "Bang Up" Cooking Stove purchased from you during the present month, has given satisfaction or not, I have the pleasure of answering that said stove has met our fullest expectation in every particular, and would not be exchanged for any other pattern now in use of which I have knowledge.

Very respectfully, your obedient servant.

Messes. Lester, Sennett & Chester: Gent.—We are us 'ng your improved inodern Cooking Stove, called the "Bang Up," and after a fair triar I can recommend it as surerior to any stove in use in this section of the country. Among the most prominent advantages of this stove, is the commoditusiess of the Oven, it being sufficiently capacious for the largest family, and also in a saving of fuel. I am satisfied that one half the fuel necessary for any stove we have ever used will amply supply this. Take it all in aft I think it difficult to improve.

Truly yours,

MILES W. CAUGHEY. MILES W. CAUGHEY. Truly yours,

the stock is small—remember heighta is faithful over a few things shall be unideruler over many. The subscriber returns his thanks to his friends for past favors and especially to those who have with warm hearts and open hunds patronized him in former years who, in prosperity, in adversity, in tribulation and oppression, showed by works of their father which is in heaven acted on the principle that it is no more klessed to give than to receive. He still wants the patronage of his friends, and, will be thankful for the smallest favors in his line. He has nothing to promise them in return at precent. He could pay them a fashionable compliment, but it would be like feeding them on husks. May they long live to gladden the hearts of the orphans, and whee the tear of affliction and grief from the eyo of the oppressed widow.

He believes that He that numbers the hairs of the head and does not allow a sparrow to fall without his notice, will enable the subscriber to show his gratitude by his works. Then he would almost be willing to say, in the language of good old Simeon, let thou thy servant depart in peace. Some few persons in former days have complained of his style of expressing himself. He regrets exceedingly that he should be so unfortunate as to express himself so as to offend the most sensitive, delicate and chaste car. A man by the name of CLAIP has engaged with a young man of the name of S. P. OLD DR. JACOB TOWNSEND.

THE ORIGINAL DISCOVERER OF THE Genuino Townsend Sarsaparilla.

Old Dr. Townsend is now about 70 years or age, and has long been known as the AUTHER and DISCOVERER of the GEN-UINE ORIGINAL "TOWNSEND SARSAPARIALA." Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known us value. It had reached the cars of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, proclaimed its excellence and wonderful. HEALING POWER.

HEALING POWER.

Knowing, many years ago, that he had, by his skill, science and experience, devised an article which would be of incalcuble advantage to mankind when the means would be furnished to bring it into universal notice, when its enestimable virtues would be known and appreciated. This time has come, the means are supplied; this GRAND AND UNEQUALLED PREPARATION manufactured on the largest scale, and is called for throughou belong in and bredth of the land, especially as it is found incupate of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with ege, and now the state of the state o ble of degeneration of deterioration. Unlike young S. P. Townsend's, it improves with ege, and never changes, but for the better: lecause it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Pr., Sarsaparilla. The Sarsaparilla root, it is well known to inclied men, contains many medical properties, and some properties which are inert or useless, and others, which if retained in preparing it for use, produce fermentation and oxid, which is injurious to the system.—Some of the properties of Sarsaparilla are so volatile, that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific process, known only to those experienced in its manufacture. Moreover, these volatile principles, which fly off in vapor, or as an exhalation, under heat, are the very esential endical properties of the root, which give to it all its value. Any person can boil or stew the root till they get a dark colored liquid, which is more from the coloring matter in the root than from anything else; they can then strain this insipid or vapid liquid, sweeten with sour molasses, and then call it "SARSAPAR-ILLA EXTRACT or SYRUP." But such is not the article known as the

as the GENUINE OLD DR. JACOB TOWNSEND'S SARSAPA-RILLA.

This is so prepared, that all the inert properties of the Sarsaparilla root are first removed, everything capable of becoming acid or of fermentation, is extracted and rejected; then every particle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the

Cure of Innumerable D'seases. Hence the reason why we hear commendations of every side in its favor by men, women, and children. We find it doing wonders to the cure of CONSUMPTION, DYSPEPSIA, and LIVER COMPLAINT; and in RHEUMATISM, SCROFULA, PILES, COSTIVENESS, all CUTANEOUS ERUPTIONS, PI bPLES, BLOTCHES, and all affections arising from IMPURITY OF THE BLOOD.

of his inferior preparation!!

Heaven forbid that we should deal in an article which would bear the most distant resemblance to S. P. But what else should be expected from one who knows nothing comparatively of medicine or disease! It requires a person of some experience to cook and serve up even a common decent meal. How much more important is it that the persons who manufacture medicine, designed for the diseases which aftect the human system, and how to adaptenedical properties of plants, the best inancer of securing and concentraints their healing virtues, also and extensive knowledge of the various ciscases which aftect the human system, and how to adaptenedicate to these diseases!
