THE GREATEST DISCOVERY OF THE AGE!

DR. TRASE'S MAGNETIC OINTMENT HE following from Dr. Hebbell, a noted Physician: who has sold over 900 Bottles within the last ten months. Hear him S. Bekell—Sir. I write to give you some account of the admit

scription.

CARE let.—A Mrs. More, who was given up to die by three celebrated physicians, as being in the tast stage of Consumption, by the use of the Magnetic Ointment has regained her health, and is now as well as ever, and has been for the last six months.

the use of the Magnetic Ointment has regained her health, and is now as well as ever, and has been for the last six months.

Case 2d.—Some time in July last, I was called to see Mrs. Allen living some 22 miles distant. Her case had been given up by several physicians. Slie was first attacked by malignant dysentery, followed by severe inflammation of the bowels. I arrived about to clock in the evening, and found her in a very dangerous sluntion, apparently on the baink of the grave. I commenced applying the ointment freely to the stomach and bowels, attended with some simple remedies administered internally, and by morning I found her so much better that I left for home, with directions to continue the use of the Ointment. She fully recovered in a few days, and is now enjoying good health.

Case 3d.—A Mr. Winters had lost nearly all his hair, had been baid for many years; by the use of three bottles of the Magnetic Ointment, had his hair entirely restored, and now has as beautiful a head of hair as any man could wish. His age is about 50 years. Case 4th.—A son of Mr. Warren of this town, II years of age, had been afflicted with the Astrika from his cradle. He had the benefit of the best medical advice that a loving and wealthy father could procure without avail. It was one of the most nggravated cases I ever saw; he was emaciated atmost to a skeleton. By the use of a few bottles of the Uintment he was thoroughly cured, and for 7 months part has enjoyed robust health.

Case 3th.—This was an extreme case of inflammation of the spine, of long standing; had a variety of treatment from no less than eight different physicians, without receiving benefit—was cured by the use of only four bottles of the Magnetic Ointment.—This was four nonths ago, and the lady (a Mrs. Dunham) is still in good health and able to attend to her usual household duties.—I have treated two cases of Chronic Sore Eyes with the Ointment.—I have treated two cases of Chronic Sore Eyes with the Ointment.—I have treated two cases of Chronic Sore Eyes

I have treated two cases of Chronic Sore Eyes with the Ofintment both of the patients so nearly blind, as to need an attendant to lead them from place to place. One of them had been afflicted By ears, the other about 9 years. They had tried the best physicians in the state, without benefit; and one of them had been under the treatment of the celebrated Doct. Muzzy, of Cincinnati, for righteen months, and had expended hundreds of dollars in vain efforts to effect a cure. They are now, by use of the Magnetic Ofintment, nearly or quite cured, and are able to read and attend to ordinary business. I have used the Ofintment in a number of cases of the Piles, and in no case has it failed to give immediate relief, and generally a permanent curs. I have also used it beneficially in several cases of Euvspeless. And last but not least, I have within the last year cured four cases of CANCIR by the use of the Magnetic Ominent alone!!! Magnetic Omiment alone!!

THE MERCHANTS' AND EARMERS' STATE MUTUAL FIRE INSURANCE CO.,

Of Harrisburg, Pa.,

Of Harrisburg, Pa.,

Invite the attention of the public to the principles upon which the business of the Company is conducted. The main object of the Company is to after defended and opportunity of procuring safe insurance upon their property at a moderate cost, and strictly upon the Mutual principle. In order to preserve this principle, the Directors have adopted the popular, saie, and equitable plant of classifying their risks, and have divided them into two classes. The first class is exclusively a Farmers' company, in which no property more hazardous than dwelling houses, out houses, and personal property therein will be insured. The second class is the Merchants, Company, in which may be insured the safe kinds of property.

second clast is the Merchauts, Company, in which may be masted the safe kinds of property.

The Company deem it indispensable to decline all risks which are commonly denominated Extra Hazardous; believing that it such risks are permitted to be mingled with those of the me chant and farmer, the premammare likely to be disproportionate to the risks,—exacting from those who are Insured mon the least hazardous property, indice than a just and equal contribution to the expense of insurance. The Policy of each member will despite the class of risk with which he is associated, and the Cash Premums and Deposite Note of each Class, and the assessments for which members may become liable, skall be held and assessed to pay the losses occurring in the respective Classes, to which they belong, and no other, and the general expenses of the Company shall be apportioned to each Class according to the appoint of the company shall be apportioned to each Class according to the amount insured in each.

Insurance may be made for from one to three years, in the Merallo and the cash.

ount ip-sured in each.

Insurance may be made for from one to three years, in the Merchaus's class, and one to five years, in the Farmers' class.

The tery extraordinal success of the Company in accumulating a large fund in eash premiums, has placed the financial stability of the Institution beyond any probable danger. The 'dividends which have been paul on expiring Policies in like companies, prove that the actual expense of insurance is very trifing, in a Mutual Office which is limited to the safer classes of risks. DIGESTION.

DIGESTION.

DIGESTION is chiefly performed in the stomach by the aid of a fluid which freely evolve from the inner coat of that organ, when in a state of health, called the Gastrie Juice. This fluid is the Great Solvent-of the Food, the Partfunz, Preserving, and Minustating Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stomach produces no good Gastric Juice, and hence the disease, distress and debitity which casue.

PEPSIN AND RENNET. PEPSIN AND RENNET.

Persin is the chief element, or great digesting principle of the Gastric Juce. It is found in great alundance in the solid parts of the human stomach after death, and sometimes causes the somach to digest itself, or eat itself up. It is also found in the stomach of animals, as the ox, call, &c. It is the material used by farmers in making cheese, called Rennet, the effect of which has long been the special wonder of the dairy. The curding of milk is the first process of digestion. Rennett possesses astonishing power. The stomach of a calt will curde nearly one thousand times its own weight of milk. Baron Liebig states that, "One part of Pepsin dissolved in stay thousand parts of water, will digest meat and other food." Biseased stomachs produce no good Gastric Juice, Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE. BARON LIERIO, in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid may be readily prepared from the nucous membrane of the stomach of the Calif, in which various articles of food, as meat and eggs. will be softened, changed, and digested, just in the same manner as they would be in the human elomach."

ons articles of 100d, as meaner as they would be in the human stomach."

Dr. Praeira, in his famous treatise on "Food and Diet," published by Wilson & Co., New York, page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereria.

Dr. John W. Draper, Professor of Chemistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 280, says: "It has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

Professor Divocusors, of Philadelphia, in his great work on human Physiology, devotes more than fifty pages to the examination of this subject. His experiments with Dr. Beaumont on the Gastric Juice, obtained from the living shiman stomach and from animals are well known. "In all cases, he says, "digestion occurred as perfectly in the artificial as in file natural digestions."

As a Dyspensia Curor,
Dr. HOUGHTON'S preparation of Persix has produced the most markelous effects, curing cases of Debility, Emaciation, Nercous Decline, and Dyspeptic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits of this advertisement—but authenticated certification beam given for the control.

I AM constantly receiving and selling the cheapest Goods in town, and would briefly aumounce another arrival this morning of Dress Goods, which the Ladies will find beautiful indeed, and in prace as are below auxiling in Eric, as the pulling from some quarters proves short of convincing proof of cheapness to purchasers.

It is not my myroses and the first provincing proof of cheapness to the purchasers.

some quarters proves short of convincing proof of cheapness to purcha-sers.

It is not my purpose now to spend time and room with a catalogue of prices. I will give prices to the full satisfaction of all as I sell the goods. I cannot refrain, however, from remarking on this subject, having recently observed some swelling advertisement quoting Lawns at 8 cents, and some other articles in proportion, that doubtless all who read this advertisement, and have just been buying of me full yard wide and perfectly fast colored Lawns at 6 cents, are satisfied on the secore of my being undersold at the rate of fitteen per cent by any one in this city. If mistake not they are better satisfied that I am selling 30 per cent cheaper than some at least. But I confine not this unatter to Lawns, or Ginghams, or Frints. Let it here be distinctly undersold, that within the range of a DRY GOODS trade, from a paper of Needles to a Three Ply Garpet, I am "posted up" and prepared for any competition in Eric, whether from those long in trade, or from those of mushroom growth and "have a little yet to the quantities sufficient are here—the BATNAINS are here. A flure Preservative of the Hair.

The Invenior having for more than twenty years been engage in the manufacture of human hair, both in Europe and America, was led by his employment to feel the want of something that would give life to the decaying or decayed hair, and at the same time give a Luxuradre, Elasticity, and a Rich Gless, without leaving it afterwards hard, brittle and drt, as all the hair eils of the present dy. This compastion opens the pores, and causes a healthy action on the surface of the skin of the head, and at the same time a return of the humor that strengthens and nourishes the hair. To those whose hair is fulfing off from intense study, sickness, change of climate, dandruff, &c., this is an invaluable preparation. Being principally extracted from Flowers, it will be free from the loadbone effluvia that usually arises from hair oils, and has the most agreeable odor. It is the lest adapted to give a lively appearance to Ornamental Hair, of any now offered at the observe that none is genuine unless signed by the Inventor. OPINION OF THE PRESS.

[From the Cineminal Commercial, Cet. 31.]

We take pleasure in referring the reader to the testimony of our prominent druggists and well known chitrens to the virtue of Davis' Parn Killer. We have used the article and found it valuable. The sale of this article in the Virtue data is legond all precedent, as the books of the other will show.

[From the Cinemiant Nonpariel, Nov. 16th.]

DAVIS' PAIN KILLER.

We call the attention of our readers to the advertisement of this great remedy for the most instant relief of pain. No medicinal preparation with which we are acquainted, appears to possess such power for the extinction of pain. No preparation has ever become so popular to our community, or created such a sensation in the public maind through the section of the country where it has been introduced and become known.

It will be seen that some of our most prominent citizens, and business men, strongly recommend it to the public, as an article of cancer of the country where it has been introduced and become and that they never knew any medicine to become so deservedly popular in so short a time.

[From the Cineminal Dispatch, Oct. 31.]

DAVIS' PAIN KILLER.—Whatever may be the prejudices entermined against a great many patent archicines, we can ourselve bear willing testimony to the efficacy of this article. We have seen its magic effects in southing the severest pain, in a great many cases, and know it to be a good article for the uses and purpose to which it is devoted, and even in cases where it may not prove infallible, it pose-see the rac virtue of doing no injury.
