A Sure Freeservative of the Hair. The Inventor having for more than twenty years been engaged in the manufacture of human hair, both in Europe and America, was led by his employment to feel the want of something that would give hid to the decaying or decayed hare, and at the same time give a Latrurance, Elasticity, and a Rich Gloss, without leaving it afterwards hard, brittle and dry, as all the bair onl- of the present db. This composition opens the pores, and causes a heading action on the surface of the skin of the head, and at the same time a return of the humor that strengthens and non-sides the hair. To those whore hair is falling off from litenes study, sickinge, change of climante, candruit, S.c., this is an unvaluable preparation. ### THE MERCHANTS AND EARNERS STATE MUTUAL FIRE INSURANCE CO.,

**BIG TOTAL FIRED INSURANCE CO., Of Harrisburg, Pa.,** INVITE the attention of the public to the principles upon which the husiness of the Company is conducted. The main object of the Company is to afford Merchants and Farmers an opportuni-ty of produring safe insurance upon their property at a moderate cost, and atrictly upon the Mutual principle. In order to preserve this principle, the Directors have adopted the popular, safe, and equitable plan of classifying their risks, and have divided them into two classes. The first class is acclusively a Farmers' com-pany, in which no property more hazardous than dwelling houses, out houses, and personal property therein will be insured. The record class is the Merchants, Company, in which may be insured the safe kinds of property.

Accound class is the Merchants, Company, in which may be insured the safe kinds of property. The Company deem it indispensable to decline all risks which are commonly denominated Extra Hazardous, belleving that if such risks are permitted to be mingled with those of the incre-nant and farmer, the premiums are likely to be disproportionate to the risks,—clacting from those who are insured upon the least hazardous projerty, more than a just and equal contribution to the crpulse of insurance. The Pollcy of cach member will des-larate the class of risk with which he is associated, and the Cash "fremiums and Deposite Note of cach Class, and the assessments" Tremiums and Deposite Note of the associated, and the case tremiums and Deposite Note of cach Class, and the assessments for Which members may become liable, shall be held and assesses to pay the losses occurring in the respective Classes, to which they belong, and no other, and the general expenses of the Com pany shall be apportioned to each Class according to the an onn insured an each.

omi insured in each. Insurance may be made for from one to three years, in the Mer-chanis' class, and one to five years, in the Farmers' class. The very extraordiany success of the Company in accumulating The very extraording sense of the or from one to three years, in the Aler-chants' class, and one to five years, in the Farniers' class. The very extraording success of the Company in accumulating a large fund in cash premiums, has placed the financial stability of the Institution beyond any probable danger. The dividends which have been paid on expiring Policies in like companies prove that the actual expense of insurance is very trilling, in a Mutual Office which is limited to the asfer classes of risks.

An Artificial Digestive Fluid, or Gastric Juicel A GREAT DASPEPSIA CURER. Prepared from the RENNET, or the fourth Stomach of the ox, af-ter directions of BARON LEBIG, the great Physiological Chem-ist, by J. S. Horauryox, M. D., No. 11, North Eighth Street, Philadelphia, Pa. Thus is a truth wonderful temply for Indication Durantic Philadelphia, Pa. ' This is a truly wonderful remedy for Indigestion, Dyspepsia, 'Jaundice, Livor Complaint, Constipation, and Debility, curing after Nature's own method, by Nature's own agent, the fastric luice LOTS EOR SALL

Juice. Dillifa teasponful of this fluid, infuned in water, will di-ter or dissolve Fice Pounds of Roast Beef in about two hours, out the thread of the second s the stomach. DIGESTION.

DIGESTION. DIGESTION is chiefly performed in the stomach by the nid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, chief due Gastrie Juice. This fluid is the Great Solecat of the Food, the Partying, Preserving, and Stiamleting Agent of the stomach and intestings. Without it there multiple activations are compared to food into blood and the order solvers of the soor, he arrying, receiving, and Simulating Agent of the stonach and intestines. Wilhout it there will be no digestion—no conversion of food into blood, and no nutrition of the body; but rather a fout, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured atomach produces no good Gastric Juice, and hence the disease, distress and debilly which casue.

### PEPSIN AND RENNET.

PEPSIN AND RENNET. Parsix is the chief clement, or great digesting principle of the Gastic Juice. It is found in great a humance in the solid parts of the human stomach after death, and sometimes causes the stom-ach to digest insoft, or cat itself up. It is also found in the stom-ach to digest insoft, or cat itself up. It is also found in the stom-ach to digest insoft, or cat itself the function of the stom-ach to digest insoft, or cat itself Rennet, the effect of which has long been the special wonder of the dairy. The eurdling of milk is the first process of digestion. Rennet possesses astonishing power. The stomach of a call will curdle nearly one thousand limes its own weight of milk. Baron Liebig states that, "One part of Pepin dissoftwed in sixity thousand parts of water, will di-gest meat and other food." Diseased stomachs produce no good Gastrie Juice, Rennet of Pepsin. To show that this watt may be perfectly supplied, we quote the following SCIENTIFIC EVIDENCE, Baron Lieno, in bis celebrated work on Andinal Chemistry,

BARON LIEDTO, In his celebrated work on Antiquel Chemistry, says: "An Artificial Digrative Fluid may be readily prepared from the nuccous membrane of the stomach of the Calf. In which vari-ous articles of food, as meat and eggs, will be soffened, changed, and digested, just in the same manner as they would be in the har-man stomach."

and digested, just in the same manner as they would be in the hu-man stomatch." DR. Pezerna, in his famous treatise on "Food and Diet," pub-lished by Wilson & Co., New York, page 35, states the same great fact, and-weed" the method of preparation. There are few higher authorities than Dr. Teretia. Dr. Joya W. Dasper, Professor of Chemistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 380, says: "It has been a question whether arti-ficial digestion could be performed—but it is now universally ad-mitted that it may be." Professor Duroussor, of Philadelphia, in his great work on hu-man Physiology, devotes more than fifty pages to the examination of this subject. His experiments with Dr Beaumont on the Gas-trie Julee, obtained from the living human stomach end from an' imats are well known. "In all cases," he says, "digestion occur-red as perfectly in the artificial as in the salwral digestions."

As a Dyspopsia Curer, Dr. HOUGHTON'S preparation of Persis has produced the most warecloss of the curing cases of Debutiky, Emactation, Ner-rave Define, and Dyspoptic Consumption, support to be on the very verge of the grave, it is impossible to give the details of ca-ses in the limits of this advertisement-but authenticated certifi-eater base here of the grave of the set of the details of ca-ses in the limits of this advertisement-but authenticated certifi-tering the set of the grave of the grave of the grave of the grave and the set of the grave the set of the grave cates have been given of more than

OPINION OF THE PRESS.
(From the Cincinual Connectial, Oct. 31.
We take pleasure in referring the reader to the testimony of our prominent druggids and well known e ditizens to the vitue of Ba-vis' Pain Killer. We have used the article and found it valuable.
The sale of this article in the United Stans is beyond all precedent, as the books of the office will show.
(From the Cincinnii Nonpariel, Nor. 10th.) DAVIS' PAIN KILLER.
We call the attention of our readers to the advertisement of this great remedy for the most instant relief of pain. No methchant preparation with which we are acquainted, appears to provide such power for the extinction of pain. No preparation has ever lectione so popular in our community, or created such a scienation in the pable mind through the section of the country where it has identify the scient that some of form.
I. will be scien that some of form most prominent citizens, and business men, strongly recommend it to the public, as an article of "mater Attern a vierue," and that they never knew any medi-cine to become so descrived to popular in so short a time.
I. From the Cincinnal Dispatch, Oct. 31.
DAVIS' DAIN KILLER.—Whatever may be the prefudices entertained against a great many patent medicines, we can our-evers hear willing testimony to the efficacy of this article. We have scen its magic effects in soothing the severest train, in a great many cases, and know it to be agood article for the uses and pur-poses to which it is devoted, and even in crease where it may med-prove institute, it possesses the rare virtue do to in jury.
