Muscat wine is very beautiful. "Mus" is the Latin for mouse. Only think of a "mouse" and a "cet," in full chase through your intestines .- Ex. Paper.

The new Editor of the Chronicle must be a great drinker of Muscat then, for upon this supposition alone can we account for his "imagination" being "disturbed" by visious of a "Tom-Cat."

Levin, the Nativist, who lives in Baltimore, is running for Congress in Philadelphia. The Times thints that the reason of his absence from his duties at Washington is owing to the "frequent condition" ho gets in! The Nativists of Pictadelphia, take "foreign men" for office .- no native Pennsyi, anians are fit to be run!!

TThe Warren Mail, an organ of whigery in Penneilvania, and a very poor organ, too, judging from the music it makes, assails Mr. Cunris, the democratic congressional nominoe of that district, because we impremed to speak well of him. This is very natural. Mr. Curtis is a decided democrat, and in nothing more decided than in his opposition to the swindling Galphinism of the party for which the Mail is pretended to speak. In this opposition we cordially concur with Mr. Curtis, and. therefore, approve of a nomination which gives assusurance of the ability and integrity necessary to detect and expose the frauds of whigery. When millions are squandered by a corrupt administration upon favorites and partizans, it is time that the honest democracy sho'd unite in opposition to it .- Buffalo Republic.

ANOTHER SCIPATIFIC WONDER!

PERIN,

An Artificial Digostive Fluid, or Gastric Juicol

A GREAT DASPEPSIA CURER.

Prepared from the BENNET, or the fourth Stomach of the ox, after directions of Baron Likmu, the great Physiological Chemist, by J. S. Hocourox, M. D., No. 11, North Eighth Street, Philadelphia, Pa.

This is a truly wonderful remody for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation, and Debituy, curing after Nature's own method, by Nature's own agent, the Gustric Juice.

anter Nature's own meetiod, by Nature's own agent, the existre Juice.

Trital's teaspoonful of this fluid, infused in water, will digest or dissolve Fire Pands of Rass Beef in about two hours, out of the stomach. DIGESTION.

DIGESTION.

DIGESTION is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health called the Gastric Julee. This fluid is the Girat Solvant of the Food, the Partysing, Preserving, and Stimulating Agent of the stomach and intestines. Without it Simulating Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, paluful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stomach produces no good Gastric Junce, and hence the disease, distress and debility which ensue.

PEPSIN AND RENNET

PEPSIN AND RENNET.

Persix is the chief element, or great digesting principle of the Gastric Juice. It is found in great abundance in the solid parts of the human stomach after death, and sometimes causes the stomach to digest itself, or eat itself up. It is also found in the stomach of animals, as the ox, calf, &c. It is the material used by furmers in making cheese, calked Rennet, the effect of which has long been the special wonder of the dairy. The curdiling of milk is the first process of digestion. Rennett possesses astonishing power. The stomach of a calf will curdle nearly one thousand limes its own weight of milk. Baron Liebig states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other fool." Discased stomachs produce no good Gastrie Juice, Rennet or Pepsin. "To show that this want may be perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE.

Baron Livero, in his celebrated work on Aulmal Chemistry.

Baron Liento, in his celebrated work on Aulmal Chemistry, says: "An Artificial Digestive Finld may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs. will be softened, changed, man stomach."

Dr. Perretra, in his famous treatise on "Food and Diet," published by Wilson & Co., New York, page 55, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Peperia.

Dr. Joux W. Draper, Professor of Chemistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 386, says: "It has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

netal digestion could be performed—but it is now universally admitted that it may be."

Professor Dunouson, of Philadelphia, in his great work on human Physiology, devotes more than fifty pages to the examination of this subject. His experiments with Dr Beaumont on the Gastrie Julee, obtained from the living human stomach and from animals are well known. "In all cases," he says, "digestion occurred as perfectly in the artificial as in the natural digestions."

As a Dyspensia Curor,

Dr. HOUGHTON'S preparation of Pierry has produced the most marvelous affects, curing cases of Debility, Emociation, Nervous Declins, and Dyspeptic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits of this advertisement—but authenticated certificates have been given of more than 200 REMARKABLE CURES!

STATE MUTUAL PIRE INSURANCE CO.,

BTATE MUTUAL PIRE INSURANCE CO.,

Of Harrisburg, Pa.,

In the business of the Company is confluered. The main object of the Company is to afford Merchants and Farmers an opportunity of procuring safe insurance, upon their property at a moderate cost, and strictly upon the Mutual principle. In order to preserve this principle, the Directors have adopted the popular, safe, and equitable plan of classifying their risks, and have divided them into two classes. The first class is exclusively a Farmers' company, in which no property more hazardous than dwelling houses, out bouses, and personal property therein will be insured. The second class is the Merchants, Company, in which may be insured the safe kinds of property.

The Company deem it indispensable to declibe all risks which are commonly demonitated Extra Hazardous; believing that if such risks are permitted to be mingled with those of the merchant and farmer, the premiums are likely to be disproportionate to the risks,—exacting from those who are insured upon the least hazardous property, more than a just and equal contribution to the risks,—exacting from those who are insured upon the least innet the class of risk with which he is associated, and the Cash Premiums and beposite Note of each Class, and the assessments for which members may become liable, shall be held and assessed to pay the losses occurring in the respective Classes, to which they belong, and no other, and the general expenses of the Company shall be apportioned to each Class according to the amount insured in each.

Insurance may be made for from one to three years, in the Merchant's class, and one to five years, in the Farmers' class.

The very extraordinay success of the Company in accumulating a large fund in eash premiums, has placed the financial stability of the Institution beyond any probable danger. The dividends which have been paid on eighting Folities in like companies, prove that the actual expense of the unance is very trilling, in a Brutani Office which is limited to the safer

CAMERON'S ESTRACT OF FLOWERS.

A Sure Preservative of the Hair. The Inventor having for more than twenty years been engaged in the manufactore of human hair, both in Europe and America, was led by his employment to feel the want of something that would give life to the decaying or decayed hair, and at the same time give a Luxuriance, Flasticity, and a Rich Gloss, without leaving it afterwards hard, Frittle and dry, as all the hair oils of the present do. This composition opens the pores, and causes a healthy action on the surface of the skin of the head, and at the same time a return of the humar that strengthens and remembers healthy action on the surface of the skin of the head, and at the same time a return of the humor that strengthens and nourishes the hair. To those whose hair is falling off from intense study, sickness, change of climate, dandriff, &c., this is an invaluable preparation. Being principally extracted from Flowers, it will be free from the loathsome cilluvia that usually arises from hair oils, and has the most agreeable odor. It is the lest adapted to give a lively appearance to Orunmental Hair, of any now offered to the public, as the experience of thousands testify. Be a articular to observe that none is genuine unless signed by the Inventor. To The best certificate is, that if this article does not prove as represented, the money will be refunded.
