ANOTHER SCIENTIFIC WONDER! **P B P S I N**, **An Artificial Digestivo Fluid, or Gastric Juicó!** *A GREAT DASP CP SI A CURER.* Prepared from the RENNET, or the fourth Stomach of the ox, af-ter directions of Banos Luzza, the great Physiological Chem-ist, by J. geri or dissolve Fice Pounds of Roast Beef in about the hours, out of the stomach. DHEESTION. DIGESTION is chiefly performed in the stomach by the abl of a thuid which freely (xudes from the inner coat of that organ, when in a state of localth, called the Gastrie Juice. This fluid is the Great Solcent fibe Foot, the Program, Preserving and Stimulating Agent of the stomach and interthes. Without It there will be no digestion-mo conversion of food muto blood, and no mutrition of the body, but rather a logal to plot, and weak, half dead, or injured stomach produces no good Gastrie Juice, and hence the discuse, distrogent of deal this weak. PEPSIN 'ADD RENNET'

hence the discate, distress and debility which ensue. PEPSIN (ND RENNET) PEPSIN (ND RENNET) Persix is the chief element, for great digesting princip¹c of the Gastrie Juice. It is found in great inhuidance in the solid parts of the human stomach after death, and sometimes causes the stom-ach of animals, në the ox, calf, &5. It is the unterial used by far-mers in making cheese, called Remet, the chect of which hav long heen the special wonder of the dairy. The curdling of milk is the first process of digestion. Remet postesses astonishing power. The stomach of a calf will curdle nearly one thousand times its own weight of milk. Baren Lishing stome thousand ince its own weight of milk. Baren Lishing to make that, thus performed and other fool." Discaged stomach prohese the good Gastrie Juice, Remet or Pepsin. To show that this want may be perfectly supplied, we quote the following SCIENTIFIC EVIDENCE,

SCHENTIFIC EVIDENCE, SCHENTIFIC EVIDENCE, Banow Distito, in his celebrated, which was a standard the mission was "An Artificial Digestive Fluid may be readily prepared from the nuccois membrane of the ston ich of the Calf, in which warf-ous articles of food, as mean and egss. will be softened, changed, and digested, just in the same manner as they usual be in the hu-man stomack."
