A THE PARTY NAMED IN COLUMN TO THE PARTY NAME or the fine-arts, for he would have pilaged "the rest of mankind" to have enriched his capitol. Indeed, be had laid Europe under heavy contributions for paintings and culpture. But all this is matter of history.

For amusements Paris is never wanting. At present the aristocracy are in the country enjoying rural sports, but the unwashed millions are in town, always excepting Sundays, when the reilroads carry at least a hundred-thousand into the countrysome to the sea-shore, and some to Versailles, ect. For five france one can go to Havre of a Saturday night and return Sunday-a ride of three hundred miles. Cheop enough, is'nt it? The newest thing in the way of a musement is the ascension of a gentleman and his horse in a baloon. An immense crowd collected in the Champs de Mars a few Sundays ago to see this new feature in the navigation of the air, and all came away highly delighted-they had seen something new. The horse was suspended beneath the car and the neronaut seated upon his back. Everything succeed admirably, both horse and rider reaching terra, firms several leagues from Paris "alive and kicking," Adieu; vive et vale.

AT NO. 7. BEST IN OUR ET.

AFTER profound egitations, extensive and influte observations, i have made up my mind that it's not the foult of at least some of the people of this town and county, that their garments are of such indifferent materials; and workmanship, for never before was a town cursed with such vile stocks of wares called and sold for clothing. Take a coal of the ordinary kind sold in some of the shops of this town; examine it and what judgment do youpronounce—con founded cheat!! you exclaim without besitation—here's a button hole that looks as though it had been made by thrusting a finger through the cloth—there a seam so open that you might drop a jack knife through it—here, but enough—you have seen, handled and worn these goods till you are tired of them, and it is useless for me to enlarge on their frailities. Here follows more cheering intelligence, at No. 7; Recd House; Phave this day opened a magnificent stock of Gontlomon's Furnishing Goods, Cloths,

Gentlemen's Furnishing Goods, Cloths, 1 Gentiomon's Furnishing Goods, Oloths,
Cassimeres and Vestings of German, French, English and American production; Newset Fall styles, purchased by myself at the fashionable establishments in Boston. New York and Philadelphia atso, Military and Plain Trimmings in great variety and of the best quality, Cravats, silk and linen Glores and Handkerchiefs, fine shirts, collars, Suspenders, Buf Cassimere Vesting; also, Oil Cloths, and a great variety of "notions." The clothing that I keep and finks to order shall be unexceptionable in quality and cut, as may be ascertained by inspecting my goods, at No. 7, Reed House, where I have just removed, and with a view of conducting business upon my own responsibility.

ANOTHER SCIFNTIFIC WONDER!

ANOTHER SCIENTIFIC WONDER!

PIPS IN,

An Artificial Digostive Fluid, or Gastric Juice!

A GREAT DASPEPSIA CURER.

Prepared from the RENNIT, or the fourth Stomach of the ox, after directions of Bano Lizano, the great Physiological Chemist, by J. S. Houddison, M. D., No. 11, North Eighth Street, Philadelphia. Pa.

This is a truly won-terful remedy for Indigestion, Dyspersia, Justific, Livor Complaint, Constipation, and Debility, earing after Nature's own method, by Nature's own agent, the Gastric Juice.

ETHAL associated of this fluid, Indused in water, will digest or dissolve Fire Postal of Russi Beef in about two hours, out of the stomach.

DIGESTION is chiefly performed in the stomach by the aid of a fluid which freely caudes from the inner coat of this torgan, when in a state of health, called the Gastric Juice. This fluid is the Great Soleest f the Food, the Purfying, Preserving, and Minutaling Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no nutrition of the shody; but rather a food, torpid, painful, and destructive condition of the whole digestics apparatus. A weak, half dead, or injuted stomach produces no good Gastric Juice, and hence the diseased distress and debility which ensue.

PEPSIN AND RENYET.

hence the disease, distress and debility which ensue.

PEPSIN AND RENNET.

Papsin is the chiefe dement, or great disesting principle of the Gastric Juice. It is found in great abundance in the solid parts of the human stoniach after death, and sometimes causes the stomach to digest itself, or eat itself up. It is also found in the stomach of a naturals, as the ox, call, &c... It is the material used by farming the store of the period of the dairy. The curding of mith is the first process of digestion. Remeet possesses asionishing power. The stomach of a calf will curdle nearly one thousand times its own weight of mith. Baron Liebig states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food." Diseased stomach produce no good. Gastric Juice, Remeet of Pepsin. To show that this want may be perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE:

perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE:

Banon Liebia, in his celebrated work on Animal Chemistry, sayes: "An Artificial Digestive Finid may be resultly prepared from the mucus membrane of the whomeh of the Call, in which various articles of food, as meat and eggs. will be softened, changed, and digested, jett in the same manner as they would be in the human stomach." and digestes, just in the same masner as they would be in the human stomoch."

The, Prantia, in his famous treatise on "Food and Diet," published by Wilson & Co., New York, page 36, states the same great lact, and describes the method of preparation. There are few higher authorities than Dr. Pereria.

Dr. John W. Da area, Probesor of Chemistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 38, says. "It has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

Professor Dunentson, of Philadelphia, in his great work on himan Physiology, devotes more than lifty pages to the examination of this subject. His experiments with Dr. Beaumont on the Gastric Julies, obtained from the living human stomach and from an imals are well known. "In all cases," he says, "digestion occurred as perfectly in the artificial aim the natural digestions."

As a Dyspopain Guror,
Dr. HOUGHTON'S preparation of Persix has produced the most mirrelous effects, curing cases of Debility, Emeciation, Nersons Decline, and Despetic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits of this advertibement—but authenticated certificates have been given of more than

200 REMARKABLE CURES! In Philadelphia, New York and Boston alone. These were nearly all despectate cases, and the cures were not only rapid and wonderful, but permanent.

It is a great Nerzons Antidote, and from the astonishingly small quantity necessary to produce a healthy digestion, is believed to act upon

CAMBRON'S DETRACT OF FLOWERS.

A Euro Prosorvative of the Mair. A Euro Prosorvativo of the Mair.

The Invents hiving for more than twenty years been engaged in the manufacture of human hair, both in Europe and America, was ted by his employment to red the wint of something that would give the to the decaying or decayed hair, and at the rame time give a Luxiarance, Elasticity, and a Rich Gloss, without leaving it offerwards hard, britte and dr., as all the hair oils of the present diff. This composition opens the pores, and causes a healthy action on the sufface of the skin of the head, and at the same time a return of the humer that terrestlems and nourishes the hair. To these whose bair is falling off from histone study, sickness, change of chunate, for human, for, this is an invaluable preparation. Hence principally extracted from Flowers, it will be free from the louth-some erbivac that youndly arises from hair oils, and has the most agreeable oder. It is the test adapted to be free from the loath-some erfliving that usually arises from hair offer, and has the most agreeable oder. It is the test adapted to give a lively appearance to Ornamental Harr, of any now offered to the public, as the experience of thomasulatestify. Be particular to observe that note is genuine unless signed by the inventor. If the best certificate is, that it this article does not prove as represented, the money will be refunded.
