Election of Judges.

The people of this State are to decide next month whether they will take the election of their judiciary into their own hands, or keep it in the hands of the L'accutive. It appears to be the voice of the press that the judiciary shall be elected at the ballot box, an overwhelming majority.

The new Fditor of the Chronicle, in speaking of the "power of ridicule" says that, "while the wounds inflicted upon the body may be healed, and the patient restored to health and vigor, the deep wounds inflicted by the remorseless flings of sarcasm often strikes one down with a Herculean blow, and souds him to an untimely grave;" and that, "there is a certain democratic editor not a hundred miles from here whom kind nature hath endowed with this most dangerous gift. In doing this, she made no blunder, no journey-work; she went the whole hog."

Now we should really like to know whether our cotemperary has been actually "kilt" by this remorseless feertain democratic editor," or is he only playless lecertain democratic editor," or is he only playing possum! If he is actually defunct, our advice is that his friends have this "certain democratic editor" indeted-that is, if killing a calf with ridicule is an indictable offense!

This should teach politicians not to "reckon their chickens before they are hatched," as, from present appearances there is precious little prospect that any whig will be elected to the senate from othat State.

That queer editorial fish, Brockway, of the Oswego Palladium, is still hammering away about "I'lee Soil," Free Territory," "Free Men," and "Nigerology" \generally. We hope none of kisfranks will think of sending him to Utica, as he is at meane the is only talking to hear himself.

AT NO. 7, REED HOUSE!

AT NO. 7, REED HOUSE!

A FTER profound cogitations, extensive and minute observations, I have made up my mind that it's not the fault of least some of the people of this town and expanty, that their graments are of such indifferent materials and workmanship. ments are of such indifferent materials and workmanship for never before was a fown cursed with such vile stocks of wares called and sold for clothing. Take a coat of the ordinary kind-old in some of the shape of this town; examine it and what Judement do yonpronounce—con founded cleat!! you exclaim without hesitation—here's a button hole that looks as though it had been made by turusting a finger through the cloth—there a seam so open that you might drop a jack knife through it—here, but enough—you have seen, handled and worn these goods till you are tired of them, and it is useless for me to enlarge on their frailties. Here follows more cherring intelligence, at No. 7, Reed House; I have this day opened a magnificent stock of

Gentlemen's Turnishing Goods, Cloths, Gentlemen's Furnishing Goods, Cloths,
Cassimeres and Vestings of German; French, English and Amerlean production; New est Fall styles, purchased by myself at the fashionable establishments in Boston. Buff, Cassimere Yesting; also, Oil Cloths, and a great variety of "notions." The clothing that I keep and make to order shall be unexceptionable in quality and cut, as may be ascertained by Inspecting my goods, at No. 7, Reed House, where I have just removed, and with a view of conducting business upon my own responsibility.

Commercial Exchange STILL TRIUMPHANT! \$30,000 WORTH OF NEW GOODS.

A RRIVING and to arrive, \$30,000 worth of New and Chean Goods at the Commercial Exchange, where the subscriber has had his liteal Quarters established for the last five years; and where, with the permission of the merchant Princes of Erie, the intends for some years to come, to offer to his former customers and all these the merchants are exceeded to any month. where, with the permission of the merchant Frinces of Erie, lie intends for some years to come, to offer to his former customers and all others, the greatest bargains ever extended to any people. His store is now so arranged as to accommodate all clastes of purchasers; having fixed them up into two separate departments. The first of which is well supplied with a large and rich stock of PANCY GOODS adapted solely to the wants of the tadies. The other department is well supplied with every variety of staple Goods. By the above arrangements, he will be enabled to wait upon those wanting goods with facility and dispatch. He would therefore say to persons who wish to purchase profile, which chables thin to sell 25 per cent. cheaper than those who purchase goods in the ordinary mode.

Among his stock may be found black and blue black Satin Dress Patterns, black, blue black and watered Gro de Rhine, spotted Lawns, linen tissues, Jeanv Lind embroidered silk and merino Gloaks, Broche and Long Shawls, silk warp Paramatus, figured a wastering, fleit Ribbons, Robs Roy embroidered Segres, striped and interting fleit Ribbons, Robs Roy embroidered Segres, striped and plain Cashmere de Lains, black silk lace; a large assortment of Jules Hautes Pertunery, together with every other article kept in a Fancy Dry Goods More.

The Goulder with the last stage of Consumption, by the use of Doct. Track's Magnetic Olintonian Cashmere de Lains, black silk lace; a large assortment of Jules Hautes Pertunery, together with every other article kept in a Fancy Dry Goods More.

wilk, satin, Marcellie & Valencia Vests, Shirts, Collars, Unaves, that Hose, Gloves, Drawers, Under Shirts, Handkerchiefs, &c.

A large assortment of India Rubber Goods, Cloths, Cassimeres, Tweeds, Cashinerts, Salinetts, Alac, Envised Crawing Wat. ting, Oil Cloths, Hearth Rups, &c., &c.

The above enumeration embraces but a small part of my stock of goods—suffice it to say, I have one of the most complete assortments ever before oilered in this market, and pledge myself to cell cheaper than any other establishment in this section of the country; the Herculean puffs and advertisements of others to the contrary. Come and look through my stock, and my word for it you will not go away dissatisfied. My system of business is on the Cash plan, and I am hereby enabled to undersell any firm west of Buffalo, for as well might the Ethiopean change his skin or the Leopard his spots, as any Merchant in Eric to attempt to compete with me in prices, who sells goods on the credit system—it can't be done. Therefore I say again to those who pay cash for goods, that if they will call on me at Commercial Exchange, I will astonish them by showing goods at lower prices than the same qualities have ever been offered in this market. The Greeks and Gentiles must stand aside, for the Jew has the inside track. MOSUS KOCIL Erle, Sept. 7, 1850. .

For the Cure of COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP ASTHMA and CONSUMPTION

N offering to the community this justly celebrated remedy for diseases of the throat and lungs, it is not our wish to trifle with the lives or health of the afflicted, but frankly lay before them the opinions of distinguished men and some of the evidences of its succes, from which they can judge for themselves. We sincerely pledge ourselves to make no wild assertions or false statements of its efficacy, nor will we hold out any hope to suffering humanity which facts will not warrant. Many proofs are here given, and we solicit an inquiry from the

public into all we publish, feeling assured they will find them perfectly reliable, and the medicine worthy ther best confidence FROM BUNJ. SILLIMAN, M. D. L. L. D., ETC., Professor of Chemistry, Minerology, &c., Vale College, Member

THE GREATEST DISCOVERY OF THE AGE!

scription.

Case lat.—A Mrs. More, who was given up to die by three celchrated physicians, as being in the last stage of Consumption, by
the use of the Magnetic Obtament has regained her health, and is
now as well as ever, and has been for the last six months.

Case 2d.—Some time in July last, I was called to see Mrs. Al'en
tiving some 22 mitted distant. Her case had been given up by sevcral physicians. Bhe was first attacked by malignant dysentery,
followed by seable inflammation of the bowels. I arrived about
0 o'clock in the evening, and found her in a very dangerous situation, apparently on the baink of the grave: I commenced applying the ointiment freely to the stomach and bowels, attended with
some simple remedies administered internally, and by morning I
found her so much better that I left for home, with directions to
continue the use of the Ontment. Bhe fully recovered in a few
days, and is now enjoying good health.

Case 3d.—A Mr. Winters had lost nearly all his hair, had been
baild for many years; by the use of three bailtes of the Magnetic
Oistmeat, had his hair salirely restored, and now has as leautiful
a head of har as any man could wish. His age is about 50 years

Case 4th.—A son of Mr. Warten of the bown, It years of age,
had been afflicted with the Asritaa from his cradic. He had the
could procure without await. It was one of the most aggravated
cases fever saw; he was canceited atmost to a skeleton. By the
use of a few bottle; of the Ointment he was thoroughty cared, and

for 7 months past has enjoyed robust health.

Case whth.—This was an extreme case of infammation of the spine, of long standing; had a variety of treatment from no less than eight different physicians, without receiving benefit—was cured by the use of only four bottles of the Magnetic Olutinent.—This was four months ago, and the lady (a Mas. Dunham) is still in good health and able to attend to her usual household duties.—I have treated two cases of Chronic Sore Eyes with the Olutinent both of the patients of scary blind, as to need an attendant to lead them from place to place. One of them had been utilized by years, the other about 9 years. They had tried the best physicians in the state, without benefit; and one of them had been under the treatment of the celebrated Bock Muzzy, of Cincinnati, for eighteen months, and had-expended hundreds of dulars in vals efforts to effect a cure. They are now, by use of the Magnetic Olutinent, nearly or quite oured, and are able to read and attend to ordinary business. I have used the Olutinent in a number of cases of the Prins, and in no case has it failed to gate numediate relief, and generally a permanent cars. I have used the beneficially in several cases of Experiences. And last but not least, I have within the last year circle four cases of CANCER by the use of the Magnetic Olutinent alone!!

From a thought text of the Ontingent In nearly exery divines.

E. K. CRANDALL, Traveling agent. August 17, 1930. CAMERON'S EXTRACT OF PLOWERS.

The Inventor having for more than twenty years been engaged in the manufacture of human bair, both in Europe and America, was led by his employment to feel the want of something that would give life to the decaying or decayed hair, and at the same time give a Luvuriance, Elasticity, and a Rich Gloss, without leaving it afterwards hard, brittle and dry, as all the hair oils of the present do. This composition opens the perce, and causes a healthy action on the variace of the skin of the head, and at the same time a return of the humon that strengthens and noutrains. healthy action on the surface of the skin of the head, and at the same time a return of the humor that strengthens and nourshes the hair. To those whose hair is falling off from intense study, sickness, change of climate, dandruff, &c., this is an invaluable preparation. Being principally extracted from Plowers, it will be free from the loathsonic effluent that distably arises from hair oils, and has the most agreeable odor. It is the best adapted to give a lively appearance to Ornamental Hair, of any now offered to the public, as the experience of thousands testify. Be particular to observe that none is genuine unless signed by the Inventor.

The best certificate is, that if this article does not prove as represented, the mostly will be refunded.

INVITE the attention of the public to the principles upon which the business of the Company is conducted. The main object of the Conductory is to afford Merchanks and Farmers an opportunity of procuring safe insurance upon their property at a moderate cost, and strictly upon the Mutual principle. In order to preserve this principle, the Directors have adopted the popular, safe, and equitable plan of classifying their risks, and have divided them into two classes. The first class is exclusively a l'armers' company. In which no property unore hazardous than dwelling houses. equitable plan of classifying their risks, and have divided them into two classes. The first class is evelusively a Tramers' company, in which no property more hazardous than dwelling houses, out houses, and personal property therein will be insured. The second class is the Merchants, Company, in which may be insured the safe kinds of property.

The Company deem it indispensable to decline all risks which are commonly denominated Extra Hazardous; believing that' if such risks are permitted to be mingled with those of the merchant and farmer, the premiums are likely to be disproportionate to the risks,—exacting from those who are insured upon the least hazardous property, more than a just and equal contribution to the expènse of insurance. The Pol, cy of each member will designate the class of risk with which he is associated, and the Cash Fremiums and Deposite Note of each Class, and the assessments for which members may become liable, shall be held and assessed to pay the losses occurring in the respective Classes, to which they belong, and no other, and the general expenses of the Company shall be apportioned to each Class according to the amount insured in each.

Insurance may be made for from one to three years, in the Merchants' class, and one to five years, in the Farmers' class.

The very extraordinal success of the Company in accumulating a large fund in each premiums, has placed the financial stability of the Institution beyond gny, probable danger. The dividends which have been paid on expiring Policies in like companies, prove that the actual expense of insurance is very triffing, in a Mutual Office which is limited to the safer classes of risks.

DIGESTION is chiefly performed in the stomach by the aid of a fluth which freely exudes from the inner cotion that organ, when in a state of health, called the Gastrie Juice. This fluid is the Great Solcent of the Food, the Purifying, Prestering, and Ministating Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injuryed stomach produces no good Gastrie Juice, and hence the disease, distress and debitity which ensue.

nence the disease, giveness and debitity which ensue?

JEPSIN IAID RENNET.

Persus is the effect element, or great digesting principle of the Gastric Junce. It is found in great abundance in the solid parts of the hum in strongth after death, and semetime a causes the stomach to the state. For each to there states, or cat its if in. It is also found in the stomach of a faint is, as the ox, exit, see. It is the material used by fars mers in making cheese, called Rennet, the effect of which has long less a the special wonder of the drivy. The carding of milk power. The stomach of a call will-curdle nearly one thousand times its own weight of milk. Baron Liel is states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest ment and other food." Diseased stomachs produce no good Gastrie Juice, Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the following

Barox Likrin, in his epidented work on Animal Chemistry, says: "An Actional Dige-sive Find may be readily prepared from the mucros expedience of the stompth of the Call, in which various articles of food, as ment and eggs, will be softened, changed, and digested, just in the same manner as they would be in the km man stompth."

DR. PARLIUA, in his famous treatise on "Food and Diet," published by Wilson & Co, New York, page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Precia.

Dr. John W. Darrer, Professor of Chemistry In the Medical College of the University of New York, in his Text Book of Chemistry," page 386, says: "It has been a question whether artificial direction could be performed—but it is now universally admitted that it may be?" retted that it may be."

Professor Descrisos, of Philadelphia, in his great work on hus redessor by solvery, divotes more than only pages to the examination of this subject. His experiments with Dr. Reaumont on the Gastric Juce, obtained from the Rying human stomach and from ansimals are well known. "In all cases," he says, "digestion occurated as perfectly in the artificial as in the natural digestions."

As a Dyspopsia Guror,
Dr. HOUGHTON'S preparation of Parsix has produced the most mercelous effects, curing cases of Debildy, Emaciation, Nercous Decline, and Dyspoptic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits of this advertisement—but authenticated certificates have been given of more than
