ERIE, PA. BATURDAY MORNING, JANUARY 11, 1851.

Governor's Message.

The annual message of the Governor will be found in our column to-day. It was received here by Wednesdistributed among the different offices on Thursday morning. Of course we have not time to read it, but its commendable briefness will insure it a general perseal. thus rendering a notice of its preminent points unnessury.

IT A great many things that we had intended no ticing in this number have been unavoidably postponed in consequence of the Message. Among others the unfortunate "Two-Convention" difficulty in which our State Committee, aided by certain would-be-dictators, have planged the Democratic party of the State at the present time when, if ever, we ought to present an unbreken front to the enemy. We shall not fail to give our epinion (ally bereafter.

TWo'did not hear Dr. Flint's Lecture before the Eris County Medical Society, on Tuesday evening last, upon "Medical Delusions," but from the public voice. both of approval and disapproval, we should judge it to have been one that made the "galled jade wince," and successfully, in the opinion of the Faculty, sustained their side of the contreversy. Will no one answer him? We of all things should like to see the "play go on."

TP Raselas Brown, Esq., of Warren county, has been appointed by the Judges of this Judicial District, one of the Board of Revenue Commissioners to assemble at Harrisburg on the 26th of February. This is an excellent appointment.

The Dunkirk Journal announces that "the preliminary operations on the Dunkirk and State Line Railroad are rapidly progressing, preparatory to the commercement of the work by contractors." This must be boasting, equivocating and dodging, it has now to "cave" and acknowledge itself "done up and busted." Alas, poor Journal! Alas, poor Dunkirk! Thy visions of being the terminus of the great New York and Eric Road' have vanished into thin, very thin air! We wonder what corner lets and eld dilapidated taverns are worth

II It is announced that the Prigate St. Lawrence has been designated by the Secretary of the Navy, as the Government vessel which will be dispatched to the World's fair.

"Suggestions upon Naval Reform."

We have upon our table a pamphlet, entitled "Sugcestions upon Naval Reform, by a few Sea Oficers, of both the Line and Staff." It is a vigorous and well written production, exhibiting with no sparing hand the iniquities and abuses of our present Naval System, and suggesting, in the spirit of a true Reformer, many practical and beneficial changes in the rules and regulations of that once popular branch of the public service. No ene is better acquainted than the patient himself with the seet of any vital disease, and although as may not have the power to apply a remedy, he must be a most consummate trifler if he does not embrace the first opportunity to lay his case before the Faculty. So it is with those attached to the Naval Service. None know better than our "Sea Officers" the cause of the vital disease which is fast sapping the popularity with the country-the life-of this heretofore right arm of our national defense. This pamphiet shows that its authors' knowledge de not-stop at that point; -they not only know the disease, but they suggest a cure, and call upon the Faculty, the people's representatives, to apply it. It is a cure, too, which we doubt not would prove highly efficacious, and aid materially in paving the way to many much needed radical Reforms in both the Nuvy and Army. That there is no branch of the public service, however, that needs the. the Mexican war. She left S an Francisco via. Valparaise

Instead of returning a substantial equivalent "for its mil- \$5,000. Two of the robbers were taken, one badly lions of expenditure," in protecting and promoting commorce, and making our name respected abread, all the people hear or see in relation to it is when they are called upon to "foot-the-bills" of "expensive and disgraceful Courts Martial." It is as shameful to the Service as it is disgraceful to the Nation, that we yearly "see officers of the highest rank arranged for high crimes-not crimes of a military scharacter only, such as disobedience of orders, but charged with embezziement, fraud, gambling, lying, drunkenness and neriory." The tree that hears such fruit the people water, from their golden spring, to the tune of "nine million of dollars annually." Pretty dear for the whistle, is it not?-yet, if the Service-was what it should be if its fruit bore any proportion to the cost of production-the public would be the last to complain-for the public is a most patient Goose from whose breast every one can plack a feather at will. But for- expresses himself decidedly and strongly in fave of colobearance has ceased to be a virtue, and complaints are heard on every hand, until it is too "evident that a body says: "Whatever difference of opinion may exist as towhich had such a hold upon the public affections, and is allied with so much of national glory, must have sinued bowever the altra men in the North or South may oppose much and often to have produced so general a tone of or denounce them, there is but one course of action for dissatisfaction." This complaint the pumphlet before us the true patriet to pursue, that is unless tatingly and in acknowledges to be just, and preceeds to make some prac- good faith to carry out their enactments. There is 'no tical suggestions upon reform. In regard value the heritage, rich beyond all price, purchased not to this organization it is asserted that "it would puzzle with silver or gold, but with the life blood of the good and the greatest ingenuity to devise a scheme better calculated to develop the bed traits of character er, at the best, to which we in turn must bequeath invisiate to our derender men inoficient and useleen." In place of such a system, which only serves to extinguish all laudable ambition in the breast of the young, energetic and talented efficer, by contioning agod' imbecility, dranken senierity and mental incapacity as his superior, it is proposed "to make each grade elect from itself those who are most worthy to fill the highest grades; the choice or selection being made sufficiently in advance of occurring vacancies to gather the opinion of every officer, at he me or abroad - Captains to say who shall be, from themselves, Commodoras ar Admirals—Commanders who, of themselves, shall be Captains-Lieutenants whe, from their number, shall be Commanders-Passed Midshipmon, who shall be Lieutenants, and the same arrangement to apply to other corps of varied grades, every efficer being required to vote for some one, and prohibited from veting for himself. Good Democratic Doctrine.

The Beltimere Argus, says the Secretary of the Interier has boldly and fully met the old Whig dectrine of high duties being beneficial to the farming and planting interesta. In his report just submitted, he recommends the establishment of a separate bureau, for the advancement and protection of the agricultural interest, declaring emphatically and argumentatively, that "A TARIFF CAN De BUT LITTLE, DIRECTLY, TO BESEXIT THE FARMER OF PLAN-TER." Has not the Democratic party always contended that high tariffs were only useful to the manufacturerday night's mail, directed to the Post Manter, and by him hat they built up a privileged class at the expense of all others-and has it not been always the Whig doctrine tthat these high tariffs were the very best thing for the farmer, as they made a home market for his products! But the Home Secretary says they "do no such thing," and can do but little to benefit either the farmer or the planer " Thus it is, that one by one the Whige abandon their own and cherished dectrines, and adopt the principles of the Democracy. Well, we are glad to see them at last pening their eyes to the true interests of the country, and hope they may continue to improve until there shall be no creed known or practiced but the great Damecratc doctrine of "the greatest good to the greatest number."

The "Critter" in Diaguise.

A late Temperance paper describes a species of sugar plum now much in vogue, as follows:--"We have them before us as we write, have broken them and find them hollow, with about a fourth of a tea spoonful of brandy in them. We have poured out near a table spoonful from as many as a soy could purchase

is not soluble in water." It is a mistake to suppose that these sugar plums are of recent invention. They have been in use ever since the Temperance reform began; and are found very conwenient among Testotallers-enabling them to "take something" without fear of detection!

ARRIVAL OF THE GEORGIA.

New Your, Jan 6-2 P. M. The Georgia arrived this morning. She brings \$200,-000 in gold dust. She left Chagres on the 26th inst with 924 passengers and left 410 at Havana to go by the Pacific to New Orleans. The Oregon arrived at Panama cific to New Orleans. Those remaining on the fathmus would leave in sailing vessels. . The dry season was setting in, and Chagres growing more healthy. Havana was quiet. The new Capt. General was much liked. Five or six Californians were in prison for violating Spanish laws,

The general news is of little impertance. Many of the miners were preparing to winter in the mountains. The cholera has disappeared from Sagramento where it has raged with great malignity. Business has revived and the city is now in full tide of prosperity?

The Mayor of Sacramento is dead. The deaths in San Francisco are not so numerous in proportion to population as twelve months since. Many of the streets are planked and improvements going on. The rainy season commenced on the 19th in earnest. Much complaint is made of the neglect of Congress in previding for the wants of the people. Among their wants are a Mint. Post Office, Mail Routes and Land Titles.

The rains have opened the upper rivers so that steamers can now navigate. The rains also give the miners in the dry diggings a botter chance to work out the ore Many new voins have been discovered, and in feet the gold stories seem favorable. The political complexion of the Legislature is doubtful. Both parties are claiming n majority. The opinion was that it was democratic. -The election in Sacramento was yet to come off and may change the present aspect. The appointment of state officers gave general satisfaction.

Oring to the heavy arrivals and the late sickness. business is generally dull, and goods have been forced on the market at less than cost.

New York, Jan. 7th -2 P. M. The Storeship Fredinia arrived this morning-officers and crew all well. So has on board the remains of Midshimpen McLaughlin, who was killed at San Jose in

hands of passengers.

The specie train of the Crescent City was attacked by party of 16 men, five mules were led into the woods and \$100,000 taken, It was recoved with the exception of wounded. They were not Americans.
