Hear him, Surat.—Sir: I write to give you some account of the admission effects produced by the use of Doct. Trank's Magnetic Unital in my own practice as a physician. The following cases we self been under my own observation, and by my own programs.

Of Harrisburg, Pa.

Invite he sites of the formany is conducted. The main object of the Company is to first length of the popular, saic, and streetly upon the Mutual principle. In order to preserve ibis principle, the Directors have adopted the popular, saic, and sargetly upon the Mutual principle. In order to preserve ibis principle, the Directors have adopted the popular, saic, and continued of the said plan of classifying their risks, and have divided them into two classes. The first class is exclusively a Farmer's company, in which no property more havardous than due cling houses, out houses, and personal property therein will be insured the mek kinds of property.

The Company deem it indispensable to declined it risks which are commonly denominated Extra Hazardous; believing that if such risks are permitted to be ministed with those of the more than a farmer, the premium are likely to be disproportionate to the risks,—exacting from those who are insured upon the least hazardous property, more than a just and equal fourtibution to the expense of insurance. The Policy of each member will designate the flass of risk with which he is associated, and the Cash Premiums and Deposit Note of each Class, and the assessments for which members may become liable, shall be held and assessed to pay the losses occurring in, the respective Classes, to which they belong, and no other, and the general expense of the Company shall be apportioned to each Class ancording to the amount insured in each.

Insurance may be made for from one to three years, in the Merson. ignate the flass of risk with which be is associated, and the Cash Fremium and Deposite Note of each Class, and the assessments for which members may become liable, shall be held and assessed to pay the losses occurring in the respective Classes, to which they belong, and no other, and the general expenses of the Company shall be apportioned to each Class according to the amount insured in each.

Insurance may be made for from one to three years, in the Mericalastic class, and one to five years, in the Farmers' class.

The very extraordinar success of the Company in accumulating a large fund in each premiums, has placed the financial stability of the Institution beyond any probable danger. The dividends which have been paid on expiring Policies in like companies, prove that the actual expense of insurance is very triding, in a

DIGESTION.

DIGESTION.

DIGESTION is chiefly performed in the stomach by the sid of a fluid which freely exudes from the laner case of that orange when in a state of health, called the Gastrie Juice. This fluid is the Great Solvent of the Sound in Intertines. Without at their will be no digestion—no conversion of food more hand, and no nutrition of the body; but, rather a foul; hoppid, panels, and destructive condition of the body; but, rather a foul; hoppid, panels, and destructive condition of the whole digestive apparatus.
