ERIE, PA.

BATURDAY MORNING, MAY 31, 1851.

TP Ere this paper reathes its readers we shall be on our "winding way" down to Reading, to attend the State Convention for the nomination of Governor, and Canal Commissioner. Never having visited the . Eastern part of Pennsylvania, or mingled with her public men, we doubt not we shall see and hear many things to jot down for the amusement of our readers. They may therefore reasonably calculate to hear from us in our absence.

Death of Judge Bredin.

We are called upon to aunounce the death of another distinguished citizen of Butler county-that of the flon. John Bredin, President Judge of the Butler District, died in that place very suddenly on the 21st inst. He was attacked with paralysis and was not sick more than half an hour. The Mercar Press says his "death will cause a deep feeling of regret to pervade the whole community years. Few men on the beach were better versed in izen and member of the community, he was kind-hearted. benevelent and public-spirited. He has gone down to the grave while in full possession of the respect and confidence of the public, and the leve and veneration of those friends who enjoyed a more intimate acquaintance

We invite attention of those in want of Jewelry, Musical instruments, and fancy goods of almost all kinds, to the advertisement of H. P. Stockton, successor to W. N. Lewis & Co. The Gazette states that the Directors of the North East road have ordered their Locomotive and Passenger Cars, and that they are to be constructed for the 6 foot track. It also states that the iron is to be here in a few weeks. This latter piece of informatiod we have heard

The Charleston Mercury expressly contradicts the statements which have been published concerning the northern manufacture of arms for South Carolina, and says, that "ne arms of any kind are to be manufactured North of the Potemac, and the small arms will be constructed within the State."

The Governor of Massachusetts has appointed lawver of Boston as Inspector General of fish. Lawyers ought to have a practical knowledge of fish, for they are generally considered very good sharks.

A Move.-The friends of Daniel Webster are about making a spontaneous move in Massachusetts to nominate him for the Presidency. If the face of it can be made pleusible, the schemes will be tried in other States. Gen. Scott, A is said, will receive aid no from the friends of Mr. Webster.

EP IMPORTANT .- The Gazette is very kind to the Franklin Canal Company. It graciously tells them that "akanld the Courte declare their charter valid and suffcient, they will of course be permitted." The Dunkirk Bubble Bursting.

It is evident to all impartial absorvers that the Dunkirk hubble, which has been swelled to an under proportion by the supposed fact that the New York and Eric read would there terminate, is about to burst, and these testern gentlemen who have been lured, by flaming acsounts of its future greatness, into investing their spare dimes in lots, will find their purses so much the lighter without any corresponding advantage, either present or prospective. We are of the opinion, and we are not alone in it, that most of the managuvers of the board of managers of the New York and Eric road, for the past year in regard to the non-extension of the road woet, has been in some sense the result of schemes disigned to facilitate the sale of the immense number of lets owned by the company and those interested in its management. The last, as will be seen by advertisement in our columne, takes place in a few days, and then, or in a short time thereafter, if the compromise between the Buffale company and the New York and Eric company, is not blown to the winds, the reader will please not us down as ne prophet. Every thing conspires to point to this result as inevhable. Although the road has been finished but a few weeks, we already hear complaints, . both load and deep," at the insufficiency of the harbor and other accommodations at this boasted Western terminus And his, too, at the most favorable season of the year for steamboat navigation. What then will be complaints and the results when the rough weather, and tempestuous gales in the fall, will prevent steamboots stopping there entirely? The complaints may not be so loud, because this state of affairs will become known. ever the courts of which he has presided for neaf twenty and nebody will take that route either east or west; and the result will be that' the Central New York road will law-no judge more upright or considerate, and as a cit- stiff monopolize, as it ever has, the travel; and besieces of the west. We have seen many passengers within the past week who came over the road, and on arriving at Dunkirk found neither boats to take them away, or beds to sleep on while they remained. The traveling public will avoid all such aunovances as this, and ere the nummer is out the Directors of the New York and Eric road will fin 1 it so. It is evident to us, then, that this Dankirk bubble is on the eve of bersting, and that the great railroad interests east and west, will not long be held as a play thing in the hands of the "lot gamblers" of New York and Dankirk, but must find a common center HERE! Even the New Yorkers themselves are awaking to this fact. The Herald, immediately after the celebration, gave it as its decided ppinion that if the Directors expected to realize half their auticipations in regard to western trade and travel, they must use all diligent speed in extending the road to Erie, where truly adds the Harald, there is the best harbor on the Lake proclaimed so over and over again by the Bureau of reiterated so many times that we are about tired of it. In fact there is every prospect that a new impotus will be given to the growth of Baffale by the new channel of communication just opened. The harbor of Dunkirk has not the capabilities for extension commercial business. It is shallow and difficult of access, except in calm weather. I am inclined to think that the lake businces of the Erie road will not meet the expectations of the company. The Hornelleville branch will be likely to take the bulk of travel. But of this the directors should be the best judges. At present the great city of Dunkirk.' like poor Burne' religion is a great perhaps." esort to be closed at 11 o'clock at night. His Excellency, Manuel Maria Diez, has issued Proclamation to the vigilant Alcade of the district of Chagree, stating the interest that this Government takes in the completion of the Panama Railroad, and orders him and all other magistrates to apprehend and imprison all and every deserter that may be brought before them, and hold them at the dispostion of the Chief Engineer, or agents of the Company .- Echo

The Panama Hexald says that "about a hundred miles from this, within the province, there exists a native child, which was born with two distinct heads. the child is a mate and is now about ten years old. It has been seen by persons residing in this city, and their statement in relation to the most extraordinary malformation, is authentic. A well known medical gentleman and physiologist will proceed in he course of a day or two on a visit to the child for the purpose of making a scientific explanation, when we shall have the pleasure to publish his report."

From the Alta California, Agril 15. IMPORTANT STATE OF AFFAIRS-TERRATENED RUPTURE WITH FRANCE AND ANNEXATION TO THE UNITED STATES .—From the recent accounts received from Honolulu it would seem that the Prench had sent in their ultimatum and given until the 20th ult. for the government to decide whether to accede or refuse. What was to be the next step in case of refusal by the authorities, does not appear; but the supposition is that a blockade of the port would be declared or perhaps something more immediately effective resorted to. If either the one or the other be attempted, that moment will be the signal for running up the fleg of the United States with the

This is no guess work. It comes to us in the most positive form. It has been determined upon by the King and his Ministry, that if the French attempt a blockade, or to take possession, the government will hoist the stars and stripes, and throw the kingdom upon the United States. We think our authority for saying this is perfectly reliable .project, both in regard to its Charter, its road-grade The course has been decided upon in consideration prospects, dec., are beginning to be understood by capi- of the inability of the Islands to contend against the forces which France might send against them, and also from the fact the atmost cutto interests of the Island in the hands of foreigners are those of the Americans.

In Honolulu, at least four-fifths of the foreigners spirits on account of the supposed popularity of their fanot fire a shot into the towns of the Hawsiian kingdom without destroying the Citizens of the United felicitate themselves without a cause. Outside of the States. The moment she does so, she will find her account open with Uncle Sam, and a strict reckoning will be demanded and will be had. There is no near It is evident that the next campaign cannot be fought as | in beating about the bush in this matter any longer. The French must avoid collision with the Hawaiian kingdom, or they will oblige us to assume a responsibility not flattering to him.

THE FRENCH AT HONOLULU. - Cause of the difficulty .- We yesterday copied from the Alla Culifornis some eccount of a difficulty that had taken place between the government of the Sandwich Islands ty. Whichever way he turns he is sure to fail-fail as at Honolulu and the French, which bid fair to come signally as he hid when he laid down the sword and took to open rupture, in which case the Islands would be placed under the protection of the American flag .-The cause of this difficulty appears to be the enforcement of a treaty stipulation by the Hawhilan "Gos Scott is currently bruited by Northern President makers as THE candidate for the whige. In Peansal that on wines and spirituous liquors the duties shall vania he has been formally nominated, we believe. In New Jersey and New York he is confidently speken of. And all over the country he is regarded by many as the laid a duty of five dollars a gallon upon wine and well assertained candidate. We should not think Scott liquors, ale and beer included. Upon a proper representation to and by the british government, these duties upon ale and beer were refunded, upon the ground that they were neither wines nor spirituous liquers. Thereupon the French claimed that their wines and brandles should be admitted under the clause establishing an advalorem duty of five per cent., and also the refunding of the excess which had been collected. Both these demands have been strenuously refused compliance with.

The French had sent in their ultimatum, and given until the 20th of March, for the government to accede or refuse. Much excitement, in consequence, prevailed at the latest dates. The King's funds removed to a place of safety, and other steps precautionary taken. This is an unfortugate condition of things, and if pushed further, or longer persisted in, must prove detrimental not only to the business and prosperity of the Islands, but especially to our commerce.

THE SALT LAKE. - Lieut. Gunnison, of the Topegraph cal Engineers, who has been employed for a ong time past in the survey of the Great Basin in which the Salt lake is situated, speaks of the lake as an object of the greatest curiosity. The water is about enesthird salt, yielding that amount on boiling. Its density is considerable greater than that of the Dead Sea. One can hardly get his whole body in the surface. In a sitting position the head and shoulders will remain above water, such is the strength of the brine, and on coming to the shore the body is covered over with an incrustation of salt, in fine chrystals. The most surprising thing about i is the fact that during the summer season the Lake quantities. The reason of this is left to the scientific to judge, and also what becomes of the enoranother. Finally, an enermone stone fell at the feet of in 1833, the whig Council of that city, refused to receive men amount of fresh water poured into it by three

A Touch at Gan. Scott. - The United Service The choice of our people having recently fallen on generals for Presedents, is likely to exert a fearful influence on the destinies of the nation. Are we soon to sheer into the fatal vortex that swallowed up the great Roman Repuplic? What! are our people so easily bereft of their reason and sound judgment that instead of seeking out a citizen of experience to guide the helm of State—one whose great intelto guide the neimor state our abilities, prefound lectual qualifications, vast civil abilities, prefound

love of country, deep erudition, unquestionable in. tegrity, firmness of mind, one incapable of being swaved by flattery, they are willing now to take none but a general from the army?
