The Reward of Perseverance-

Not more surely does the patient husbandman, who has carefully prepared his grounds, and cast in the fruitful seed, reap his reward in an abundant harvest, than does he who practices perseverance in any pursuit, find himself, sooner or later, amply rewarded. A vacillating, doubting spirit is minous to success, as well as to happiness. Like Pliable, in Pilgrim's Progress, the poor victim finds himself in the slough of despond, and then gives up the undertaking he had commenced as an unlucky affair. Instead of believing, with every true and resolute soul, that there is no such thing as luck, and that each one must carve out his own destiny. Pliable vields to the first gust of misfortune, and gives up the journey which he finds too difficult, and returns to the city of Destruction. So do irresolute and uncertain characters relinquish schemes, which they find attended with diffilinquish schemes, which they find attended with diffi-culties, and take up others, which in their turn would be rel'nquished; thus accomplishing nothing, and spending their lives in a way which John Bunyan has well designated as the city of Destruction.

If we had no other proof of the benefit of perseverance, we might find a sufficient one in the influence which those persons acquire, who are most remarkable for this quality! Let us select those among our own acquaintances who have the respect and esteem of all, and we shall find them to be persevering characters. It is impossible to respect a vacillating man or woman. We may find a fascination in the society of such a person, but respect is out of the question. In a man this is especially true. As soon might the vine lean for support upon a reed, as a weman look for support from an uncertain and vaciliating man. But the man who pursues his purpose with steadiness and perseverance, not permitting himself to be turned aside by slight obstacles, is like the strong oak, which the winds and sterms cannot suproot, and upon him may a woman leau in the storms of life, and find that he is indeed, worthy of her confidence.

Nor is this quality less important to the gentler sex. To woman is entrusted a noble and glorious charge. We are not among those who look upon woman's as an "inferior position," or a lower destiny than man's. To us nothing seems more absurd than this clamor about "woman's rights." What are the rights how granted her? The charge of children, the power to mould their clarrence, to educate the flees who are to be ear judges and rulers, our farmers and mechanics. Woman has a right be do this, and there is nothing which could be granted her by legislatures, of which she should be so pread. In this work she needs patience, for there are many times when she will be sorely tried, and she needs perseverance to overcome difficulties, and to keep her from discouragement. Let her go forward with a streng hope and steadfast courage in her work, for the child will become the man, and with Ged's blessing she shalt see him a right-minded, true-hearted, God-fearing man, and this processes advantages for his insurance over most of the company my thanks, believing as I do that your company elections and carried managers and agents. Home and Women.

If ever there has been a more touching and elequent enlogium upon the charms of home and its dearest treasure, woman, than is contained in the following extract from the Christian Inquirer, it has not been our good fortune to meet it: ~

fortune to meet it:

"Our homes—what is their corner-stone but virtue of women? And what does social well-being rest but on our homes? Must we not trace all other blessings of civilized life to the door of our private dwellings? Are not our hearth-stones, guarded by the holy forms of Church and State—more sacred than either—more necessary than both? Let our temples cramble and our academics decay—let every public edifice, our halls of justice, and our capitols of State be leveled with the dust—but spars our homes. Man did not invent and he cannet improve or abrogate them. A private shelter to cover in two, hearts decarer to each other than all the world; high walls to seclude the profane eyes of every human being—seclasion enough for children to feel that mother is a peculiar name—this is home; and here is the mother is a peculiar name—this is home; and here is the birth-place of every virtuous impulse—of every sacred thought. Here the Church and State must come for their origin and support. Oh, spare our homes! The leve we experience there gives us our faith in an infinite goodness; the purity and disinterested tenderness of home is our foretaste and our earnest of a better world. In the relations there established and fostered do we find through life the chief solace and joy of existence .-What friends deserve the name compared with those whom a birthright gave us! One mother is worth a thousand friends—one sister deservand truer than twenthousand friends—one sister deservand truer than twenty intimate companiess. We who have played on the Men's Congress Gaillers, Oxford Tree, same hearth under the light of smiles, who date back to fadies Congress Gauters, Polka the same season of innocence and hope, in whose voice runs the same blood-do we not find that years only make more sacred and important the tie that binds us?-Coldness may spring up, distance may acparate, different spheres may divide; but those who can love anything, who continue to love all, must find that the friends whom God himself gave are wholly unlike any we can Children's Kid. cheese for enracires, and that the yearning for these se the strengest spark in our expiring affection."

Dull and Stupid.

y You may be surrounded by dull and stupid men; will you let their low spirits be infused into your nature? Rather granse them to action. Strike them with words of love, and like the hard and dead steel they will emit sparks. They were not created to live like water loge, forever souking in and throwing nothing out, and you know it. Whilst you have sparks and light and heat, warm, and enlighten and arouse them. Who knows the amount of good you may accomplish? There is enough crude and unshapen, dull and inactive material around you, which, if enlightened and put in proper metion, would be sufficient to regenerate the world. All you need to wark with is the right spirit and the benevolent heart. With these properly directed, you can accomplish an amount of good of which you at present

Dr. H. Swaype—Dear Sir.—Being for a length of time afflicted with a very violent cough, with pain in the side and breast, socraces of luigs, shortness of breath, loss of appetite, night sweats, &c., I made trial of various remedies which were recommended highly in the paper—but gradually grew worse. The violence of my cough was such that the blood rushed profusely from my nostrils when the paroxyms came upon: indeed, my whole system seemed prostrated, and the bour of my departure seemed near at hand. At this time you recommended the use of your Compound Syrup of Wild Cherry, which immediately began to noothe, comfort, and allay the violence of my cough, relieved the pain is my side, strengthened and bealed my lungs, &c. I continued the use of it, but now, thanks to God, and to the effect of your Compound Syrup of Wild Cherry. I am cured, and able to pursue my daily labor. I think it as invaluable medicine in coughs, colids, and diseases of the lungs, and one that should be known to all afflicted. If persons would purchase the original and genuine stricle, as prepared by you, and not tamper with the many spurious and worthless preparations which are alternated to be palined off on the reputation of yours, it might be the means of saving many valuable lives. I freely offer this statement for the beundt of those who are suffering as I was.

Cherry st. three doors west of Scuytkili Second Street, Phila. VERY IMPORTANT CAUTION.

Be very particular to enquire for Dr. Swayne's Compound Syrup of Wild Cherry, as some unperincipled individuals have stolen the name of Wild Cherry, thinking to borrow a reputation from that already established. Remember the groulne is put up in square bottles, covered with a beautiful wrapper, is elected in the pain of the beautiful wrapper, is elected in the other of the pain of the standard positively ficticious and counterfeit.

Swayne's Celebrated Vermifuge.

Swayne's Celebrated Vermifuge.

"A safe and effectual remedy for worms, dyspepsia. Cholera Morbus, sickly or dyspeptic children or adults, and the most useful Family Medicine ever offered to the public."

This remedy is one which has proved success ful for a long time, and is universally acknowledged by all who have tried it, to be far superior (being so very pleasant to the taste at the same time effectual) to any other medicine ever employed in diseases for which it is recommended. It not only destroys worms, but it invigorares the whole system.

Letter to Dr. Swayne from Andersontown la. Dear Sir:—A man purchased a bottle of your Vermifuge, the other day, for his child, and by its use discharged \$3 or the largest worms he had ever seen. It is somewhat difficult to get the people to ity it, as they have often been so guliet by naccous worm medicines. Yours leng so very pleasant to the taste, at the same time effectual, I shall be able to dispose of a large quantity.

Yours,

READ FURTHER A FEW FACTS.

The "Philadelphia Democrat," the leading German journal of Philadelphia. The editor says, November 21th.

"We again call attention to the removal of the German Medicine Store, the principle depot for the sale of Dr. Hoofland's German Bitters, from 258 Race to 120 Arch street, one door below Sixth. Owing to the increased demand for this medicine, and for the accommodation of his numerous patients, Dr. Jackson has been compelled to occupy a large store, We wish him success in his new quarters; he is deserving of it. The Bitters Mixture is without doubt the greatest medicine estant for diseases of the Lever and Bowels. A stubboth case of Chronic Diarrhea has come under jour notice, wherein the patient had exhausted the Materia Medicine.

therefore a medicine of which he was the inventor and endorser may be confidently relied on. He specially recommended it in Liver Complaint, Dyspepsia, Debih y, Verigo, Aedity of the Bomach, Constitution, and all complaints arising from a disordered condition of the stomach, the liver and the interiores. Nine Philadelphia papers express their conviction of its excellence, and magnetic the others considered.

MORE EVIDENCE.

The "Philadelphia Saurday Gazette," the best family newspaper published in the United States, the editor says of DR. HOOFLAND'B GERMAN BITTERS,
"It is seldom that we recommend what are termed Patent Medicines to the confidence and patronage or our readers; and, therefore, when we recommend Dr. Hoofland's German Bitters, we wish to be distinctly understood that we are not speaking of the mostrums of the day, that are noised about for a brief period and then forgotten after they have done their guilty race of mischief, but of a medicine long established, universally prized, and which has met the heavy approval of the Faculty itself."

Evidence upon evidence has been received (like the foregoing) from all sections of the Union, the last three years, and the stron-

DR. TRASE'S MAGNETIC CINTMENT. THE following from Dr. Hi BBETT, a noted Physician: who has sold over 900 Bottles within the last ten months. Hear him, S. Bernt.—Sir: I write to give, you some account of the admirable effects produced by the use of Dort. Track's Magnetic Ontement in my own practice as a physician. The following cases have all been under my own observation, and by my own pre-

courage the afficied to persevere with the strong assurance that the use of the "CHERRY PECTURAL" will relieve and utitate the will be considered to the public unsolicited testimonials from some of the first seen in our country, upon whose judgment and experience implicit confidence may be placed.

18. PERKINS, President Vermont Medical College, one of the most leained and intelligent physicians, as seeing in the last strage of Communication, by the use of the Magnetic Unitment has regained been excellence for the cure of this considers it a "comportion or farce excellence for the cure of this considers it a "comportion or farce excellence for the cure of this considers it a "comportion or farce excellence for the cure of this control of the most least state."

Nowich, Arall 28, 1846.

19. J. C. Aper—Dear file—Agreeable to the request of your agent, we will cheerfully state white when he have known of the edited for the cure of the control of the contr

nouths, and had expended hundreds of doll its in vain efforts to effect a cure. They are now, by use of the Magnetic Omment, nearly or quite cured, and are able to read and attend to ordinary business. Thave used the Omment in a number of eners of the Pills, and us no case has it failed to give immediate relief, and generally a permanent cure. I have also used it beneficially in several cases of Envisterias. And last but not least; I have within the last year cured four cases of CANCER by the use of the Magnetic Onlinear alone."

From a torrough trial of the Ointment in nearly every disease for which it is recommended. I can confidently recommend it to be one of the most useful remedies ever offered to the public.

Respectable yours.

FEMALE COMPLAINTS.

Falling of the Womb, Gonorrhea or Whites, Obstructed, Excessive, Irregular or painful Menses, Propsy of the Womb.

Dr. La Croix isoften called upon by young and immetent females which have had their health in jured for years by pills and nostrums purchased from celebrated female imposters, under the false presence of effecting cures—those medicines in nineteen cases of Iwenty have an injurous effect upon the constitution, without producing the desire-leffect, or can signs of it. Ladies who wish for inedicines, the effichery of which has been tested in thousands of cases, and never failed to effect greedy cures without any bad results, will use none but

ach to digest itself, or cat itself up. It is also found in the semaach of animals, as the on, ealf dec. It is the material awed by far
for making cheese, called Rennet, the effect of which had
long been the special wender of the dairy. The conding of not
is the first process of digestion. Rennett possesses assumbing
power. The siomach of a call will curdle nearly one thousand
times its own weight of milk. Baron Leitig states than "Ompart of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food," Diseased stomach's produce as good
fastic Juice, Rennet or Pepsin. To show that this want may be
perfectly supplied, we quote the following.

Bagox Lieria, in the selectrated work on Animal Chemistry,
says: "An Artificial Digestice Fluid may be readily prepared from
the mineous membrane of the stomach of the Call, in ward various articles of food, as ment and eggs, will be softened, changed,
and digested, just in the same measure as they would be in the hemean stomach."

Dr. Perrina, in his famous treatise on "Food and fliet," published by Wisson & Co., New York, page 35, states the same
fact, and describes than Dr. Pegeria.

Dr. Combe, in his valuable writings on the "Physiolox of the
Castile Lines is a propringer and all weers the cause of the

gastion," observes "that a diminution of the de quantity of the Gastric Junes is a prominent and all-prevailing causeof Dypepsia." and he states that "a distinguished professor of melical in London, who was severely afficient with this complaint had ing everything else to fail, had recourse to the Gastric Junes. btained from the stomach of living animals which proted ton

says: "it is a remarkable fact in physicogy, that the stomached animals, macerated in water, impart to the fluid apropert of dissolving various satieles of food, and of effecting a kind of artificial digestion of them in no wire different from the natural artificial digestion of them in no wire different from the natural digestive process."

Dr. Simon's great work, the "Chemistry of Man," (Jr. & Blanchard, Phila, 1846, pp. 221-2) says: "the discovery of PLF. SIN forms a new era to the chemical thistory of Digestion. From recent experiments we know that food is dissolved as rapidly is an artificial digestive fluid, prepared from Pepsin, as at his the natural Gastine Junce itself."

Professor Dusorison, of Philadelphia, in his great works he man Physiology, devotes more than fifty paces to the examination of this subject. His experiments with Dr. Beaumont on the fair trie Junce, obtained from the living human someth and from a time in the subject of the case," he says, "direction occurred as perfectly in the artificial as in the satural digestions."

innis are well known. "In all cases," he says, "discretion occurred as perfectly in the satisficial as in the natural digestions."

"A GREAT MEDICINE."

"We have uniformity refrained from recommending to the public any of the various Falent Medicines of the day, unless thoroughly convinced of their value. Among those we consider worthy of notice is the German Bilters, invented by Dr. Hoofman, and prepared by Dr. Jackson, in Philadelphia. One instance in particular, in which the superior virtues of this medicine thave been tested, has fallen under our observation. During the last runmer, a son of Mr. Abraham Crabill, of this county, was very seriously afficiated with Liver Complaint, and after trying in varies virtues of the medical business, and after using it, was so-such released of his durings mildly, that he procured another bookle, and is restored entirely to health."

Indge M. M. Noah a gentleman with great scientific and literary attainments, said in his "New York Weekly Messenger,"
January 6, 1-30.

DB. Hoofland's German Bittpras.—Here is a preparation which the leading presses in the Union appear to be unanimous in recommending, and the reason is obvious. It is made after a prescription firmshed by one of the most celebrated physicians of modern times, the late Dr. thristopher Withelm Hoofland, Protessor to the University of Jena, Private Physician to the King of Prussia, and one of the greatest moderal writers Germany has ever produced. He was emphatically the enemy of kinds gr, and therefore a medicine of which he was the inventor and endorser may be confidently relied on. He specially recommended it in Liver Complaint, Dyspepsa, Debit y, Vertigo, Acidity of the

Philadelphia impere express their conviction of its excellence, and several of its editors speak of its effects from their own individual experience. Under these circumstances, we feel warranted, not only incalling the attention of our readers to the present proprietors (Dr. C. M. Jackson's) preparation, but in recommending the article to all afflicted," MORE EVIDENCE.

Evidence upon evidence has been received (like the foregoing) from all sections of the Union, the last three years, and the strongest led imony in its facer, is, that there is more of it used in the practice of the regular Physicians of Philadelphia than all other nostrumacombined, a fact that can easily be established, and fully proving that a scientific preparation will meet with their quiet approval when presented even in this form.

That this inedictine will cure Liver Complaint and Dyspepsia, no one can doubt, after using it as directed. It acts specifically upon the storageh and livae—it is preferable to calonicl in all bilious direases—the object is immediate. They can be administered to remark or tyraxt with safety and reliable benefit, at any time.
