their Correctness.

Mr. Corwin, the present Secretary of the Treasury in his report of December last estimated, no doubt with the view of influencing! Congress to increase the tariff, that the receipts into the treasury would be comparative-Is small for the present year, and that by the 1st of July, there would be in the treasury a balance of only \$458,-996 99, and that by the first of July, 1852, there would be a deficiency of \$865,996 19. Now, how is Mr. Corwin sustained by the facts? Why, instead of there being only a small sum in the treasury on the first of July next, there will be a surplus of probably seven millions, at the receipts to the present time have exceeded his esguales six millions of dollars, and the probability is, that on the 1st of July, 1852, instead of there being a deficienthere will be a surplus of fifteen millions of dollars This is a fair example of the manner in which the affirs of the government are managed at Washington, and the credit which freasury estimates are entitled to. It , lows not only great want of intelligence on the subject, but quantity of ignorance in reference to the progress of the quantity of wine destroyed. Insured. entry. The fact is, our practical business men in New-Jork, know more about this and kindred-matters, than the whole cabinet combined. The progress which this souble has made in prosperity during the last twenty ears, has been wonderfully great. Twenty years ago ne'revenue of the government, from all sources, did not amount to over twelve millions of dollars, while the rev-Saus for this year will exceed fifty millions. Mr. Corwin the there saved himself the trouble of under-estimaning the revenue with the view of affecting the tariff question, for the whole subject of protective tariff has bees dead and buried for many years. The commercial

WILL HE DECLINE. - It has been generally understood that Governor Johnston would be unanimously re-nominated as the whig candidate for Govthe close of the term. The 3rd section of the 2nd article of the Constitution, says: "The Governor shalf hold his office during three

years from the third Tuesday of January hextensuing his election, and shall not be capable of holding ager than six in any term of nine years." Now, Governor Johnston held the office for one year after the death of Mr. Shunk-he was elected for three years, making four, and another term of three years would make seven, one more year than the Constitution allows him to serve, Our oppo-

nents will scarcely be willing to nominate agman who is unable to serve out his term, though they can spare themselves all uneasiness about the matter, as the people will settle the question by the election of Mr. Bigter. - Haston Argus.
