Eric County Teachers Institue.

At a meeting of the friends of Education, held in January hast, it the Court House in Eric, a Lecture was delivered by Rev. S. Newbury of Cleveland, Ohio, on the subject of Teaching and Organizing District Schools, in order to cheapen the expense of books by adopting a system of standard works of a character which would prevent the introduction of a great variety of books, and by having a series dapted to the various ages, the works used this rear by the oldest scholars would be handed down next year to the younger ones, and unnecessary expease be thus avoided. Another object was to bring the means of instruction within the reach of all, and as the pupils should progress in their attainments, they should be graduated into higher branches in a the youngest children begin to learn A. B. C. It was then resolved to revive the "Erie County Educational Society," which was done in May last, by the appointment of CHARLES W. KELSO, Pres-Hent. JAS. C. REID, WALTER CHESTER and A. E. FOSTER, VICE Presidents. E. W. JOHNSON, Recording Secretary. D. B. McCarary, Corresponding Secretary. Q. D. HENDRYX, Treasurer.

"Teacher's Institute" was appointed: Thos. H. Sill, Walter Chester, J. Towner, R. O. Hulbert, A. H. Caughey, Mortimer Phelps, John Scouler, John Brawley, D. B. McCreary, Chas. Hutchins, George IL Cutler and Evi Twitchell.

June 28, they adopted the following

- To the School Directors of Erie County. We would respectfully invite the attention of the School Directors of Erie county, as well as the friends of education generally, to an undertaking, the object of which is to improve our Schools and Teachers, and to render as efficient as possible our Common School system. It is perhaps evident to every one acquainted with the character of our schools, that an effort should be made to render them more thoroughly what they were designed to be, the means of a sound and solid English education, open to all, and free to all. But by no school system. however perfect, can this end be attained, unless the matruments of its operation are in every way qualified to act well their part. Were the most ample means of education freely afforded by the munificence of the State, still unless able and qualified instructors were provided, all would be worse than useless expenditure. Undoubted ability, then, in the teachers, is after all, the soul, the life of every school system. In order to afford facilities to those who are, or intend to become teachers, to prepare themselves more thoroughly for this important work, it is proposed to hold a "Teacher's institute" in Erie, commencing on the 2d Monday in September next, to continue in session two weeks. Instructions will be given, competent persons hereafter to be selected, on the various branches of a common school education, but more especially on the most efficient methods of teaching, and on the art of governing and conducting a school. Lectures will be delivered on various subjects connected with education and with the objects of the Institute, on each eveuing during the session. The expense to teachers of others wishing to attend the Institute will be but small; nothing more than that necessarily incurred for boarding during the time.

In carrying out this plan for the improvement of

the teachers and schools of our County, we would ors of the various districts. Endeavor to induce all who pretend to act in the capacity of Teachers, even for a limited time, to attend the session of the Institute. Attend yourselves, and there make your selections of teachers. On this may, and in this alone, can a step of advancement be made in raisour schools, and in rendering the teachers more thoroughly qualified, useful and efficient.

The "Institute" will be held in Erie for this year, and be removed for its next annual session to some town in the county, to be refected at its close, where a suitable building and accemedations may be obtained.
