Memrs. Painter, Gamble and Morrison, the gentlemen composing the Board of Canal Commissioners of this state, accompanied by the Clerk of the Bodrd, Thos. L. Their business in this section of the State is to settle land damages on the Eric Extension Canal, according to an aci of the Legislature passed some time since. Judicial Conferees Meeting.

We learn that the Conferees of Warren county to the Judicial Convention, have signified a desire that the meeting be held in this city, on Friday, September 12th. The murder of these fifty unarried men in Cubs will do the same for that island. Thousands fore; and the arm of the patriot will henceforth be strengthened by the hand of the averger. There is a providence in all this-a means made use of to accomplish a great work-and just so sure as day follows night, the island of Cuba will shake off its present cruel and barbarous rulers, and either become an independent republic, or seek protection along side of Texas under the folds of the American flag. Great Democratic Meeting in Philadelphia. Col. Bigler, our candidate to tiovernor, is emphatically "waking up the sleepers," by his stirring and eloquent appeals to the people. DEAR FRANK: I have just returned from a Domonra Convention held at Downieville, (the Forks of the Yuba I and hasten to give you an inkline of our doings sasure you it gave me grout pleasure to see the hall of necrosy so bravely relling on throughout the " Enraka State." We are endeavoring to put the old maxim Raise up a child in the way he should go," &c., in full force in this, the youngest of Untile Sum's daughters, and the work goes bravely on. Although the gathering was merely to nominate a Senator, three Representa tives, and the neural county officers, yet it was nameranaly attended, and the business done up after the old (ashion. We were in session nearly all day, and finished our labors in the greatest harmony-a little " log-reiling" and ascromency of course, but that is necessary ron know, in order to give it an old fashioned physiognomy. Nominations and other things completed, speech making was the order of the day, and we had a " right amart of speaking of it," as they would say in Missouri. There were Col. John B. Weller, of Onic, Hon. Henry Haun, of Ky., Hon. Stephon J. Field, of N. Y., Dr. Pierce, of Illinois, with a score of others, and you better believe they put the thing down flat-feeted. But the most comical and witty amongst them was a Mr. Pickett, of Ala. He discoursed upon the "rough and tumble" principle, and occasionally the mountain sides would reverborate with applicase at his "rough-shod" him and dovil may care thrusts at the Whige. McKibbin was nominated for Senator, and is "partain sure" to be elected if he lives. He is a real "chip of the old block," and worthy the conidence we have placed in him. So you see we are beginning to " feel our oats," and

Advantages of Railroads to Farmers.

Among the many advantages which the Farmers, as a class, derive from the multiplication of railroads through the country, is that of having an easy access to market, graph, to take advantage of the highest prices. For in: stance, cattle is former years were merely raised on the extensive prairies of the West, and driven to the State of Ohio to be fed, but of late years they have been monthy grain-fed west, and driven slowly seet to market. The cost and shrinkage of these cattle, says the indiana Sea. finel, in driving them to the Atlantic market from Indiana, is over \$2) per head; the beef looses much of its juicy sweetness in the process of driving. The catthe is near three menths on the road, and serve in large droves at the cities, temperarily glutting the market. All thus, that paper says, will soon be remedied. When the continuous line of railroad from the Exstern cities, through the States of Ohio and Indiana, now rapidly being constructed, shall be campleted, these cattle can be carried on the care from Anderson, the point where the drovers' route strikes the line of the Bellefontaine Radroad, at a heavy saving to the drovers as to the actual expense of shrinkage, leaving the booffresh and sweet. There will be another advantage in this change of process. In gatting these cattle to market, the d overs can have them kept at the western end of the railroad much cheaper, until the demand for beef at the cities is right, and then by colograph give notice and have themsent forward on the care in such numbers as may be required, in a few days, This change in the process of carrying western fat cattle. would doubtless be beneficial to all concerned,
